

Prosenjit Das

SOFTWARE QA/TEST/MANUAL/AUTOMATION ENGINEER/ANALYST
BACHELOR OF SCIENCE (B.S.) – BROOKLYN COLLEGE (CUNY)

Cell: 347-863-6401 || Brooklyn, New York || Email: prosenjit.pjdas@gmail.com

CAREER OBJECTIVE

Software Test Engineer/Analyst with Manual & Automation Testing experience throughout Software Development Life Cycle (SDLC) by utilizing various software testing tools. I'm currently seeking to utilize my extensive & professional experience at a new opportunity in the testing industry.

TECHNICAL TOOLS

Test & Defect Management Tools	HP QC/ALM, HP QTP/UFT, HP Sprinter, Jira, ClearQuest, Selenium Web-Driver, Selenium Grid, jMeter, LoadRunner
Programming Languages & DB:	HTML, CSS, Java, XML, VBScript, MySQL, SQL Server, Toad, Oracle,
MS Suite & Misc. Tools:	MS Word, MS Excel, MS PowerPoint, MS Outlook, SharePoint, Skype, WebEx, Slack, Jing, Microsoft Project, BrowserStack, GitHub, TCU

PROFESSIONAL SUMMARY

- Over 5+ years of QA experience with hands-on on the phases of Software Development Life Cycle (SDLC), **Software Testing Life Cycle (STLC) & Bug Life Cycle (BLC)**
- Experienced with **Requirements** gathering, Test Case creation & execution, **Defect** management, and Reporting Results to Dev Team and Stakeholders
- Expertise in **Automated** and **Manual Testing** of various scales of projects in cross-domains
- Hands on experience in **Agile/Scrum, Waterfall and Iterative Development Methodologies**
- Extensive knowledge on **Selenium WebDriver, Selenium RC** using **Java language, Junit** as a testing framework, **Maven** as project building tools
- Possess strong **System Testing** techniques including **Functional, Integration, Regression, Smoke, Negative, End-to-End** and **User Acceptance testing (UAT)**
- Experienced and understanding of health care industry, claims, membership enrollment & payment
- Development and execution experience on **Use Case, Test Plan, Test Case, Automated Test Scripts, Traceability Matrix** and **Test Summary** documentations
- Exhibits appropriate interpersonal styles and communication methods to work effectively with team members
- Strong understanding and advocate of Software Quality Assurance (SQA) concepts and practices
- Proficient with reporting, tracking and escalating anomalies discovered during testing and ensure closures
- Capable of writing complex **SQL queries** and retrieve data needed for testing & verification
- Experience in **Point of Sales (POS)** application scenarios - store systems, Inventory and supply management
- Strong **analytical & problem-solving** skills with excellent **interpersonal & communications** skills
- Excellent verbal and written communication skills in expressing ideas clearly to individuals and groups
- Ability to take complete ownership, multi task and ability to work to agreed deadlines with outmost commitment
- Overcome barriers instead of getting blocked and always stick to maintain deadline for assigned works
- Maintained Traceability Matrix/RTM to make sure all requirements converted to test
- Experienced in testing Healthcare device/Application

PROFESSIONAL EXPERIENCE

Quality Assurance Analyst

Job Duties/Responsibilities:

- Reviewed Business Requirement Documents, Functional Specifications, UX Design Documents, and obtained Business Scenarios to create Manual and Automated Test Scripts using Selenium
- Created & executed Manual & Automation Test Suites in supporting various Test Cycles within phases of Software Development Life Cycle (SDLC) in Agile Development Environment
- Developed and executed Test Cases according to the department's QA standards and procedures within test management tools – HP Quality Center & Jira with Zephyr
- Created, Executed and Maintained the Manual and Automated test suite for Functional, Regression, Ad-Hoc Testing, and User Accepted Testing
- Represented QA and attended Daily Stand-up Meetings on a daily basis and actively provided Test Progress, Defect status, Automation Test Coverage and discussed Test Deliverables from QA Team
- Reported and tracked Defects within HP Quality Center and properly communicated Severity & Priority for successful closure to Management, Stakeholders and Project Manager (PM)
- Assisted Test Manager on estimation of testing activities based on requirement documentations, meetings with other Functional Teams and discussions within QA Team
- Worked very closely with Business System Analysts and Devs to understanding Requirements, dependencies, creating Test Cases & Automated Test Scripts for STHI, STHIR, and General Directory Project
- Created Automated Smoke Test Suite using Selenium WebDriver with Java to assist Dev-Ops with Continuous Integration and Delivery
- Actively Participated in Developing and implementing Test Strategy and Test Plan to increase requirements and design coverage for Short Term Health Insurance & Short Term Health Insurance Regulations
- Hand-on expertise in developing reliable & robust Automation Test Scripts using Selenium Webdriver with Java and creating Class & Methods for Page Object Module (POM) Framework
- Enhanced & maintained Automation Framework in Selenium by improving custom XPath, error handling methods, recovery scenarios and custom reporting results using TestNG
- Mapped & accurately maintained Requirements Traceability Matrix (RTM) to Use Case, Test Case, Test Scripts within Automation Framework in measuring the Automation Test Coverage
- Configured Selenium Webdriver to launch multiple browsers running Test Scripts on remote VMs and reporting Test Execution Status via TestNG
- Performed Backend Testing on Provider Registration and Claim Processing by writing Structured Query Language (SQL) queries against Oracle DB

Software Test Engineer

Merck & Co, Kenilworth, NJ | 11/2013 - 06/2016

Job Duties/Responsibilities:

- Reviewed project documentations and worked closely with business and technical team to determine testable Requirements & Test Cases
- Setup, coordinated and conducted System and User Acceptance Training (UAT) testing with Business Analysts and End-Field users and reported results in HP Quality Center (QC)
- Logged & tracked Defects found during UAT, Manual & Automation Testing in HP QC & Jira
- Converted Test Cases from HP Quality Center (QC) to automated Scripts in Selenium WebDriver and increased the automation coverage to 80%
- Worked with **Providers** and **Medicare/Medicaid** entities to validate **EDI** transaction sets; This includes **HIPAA 4010/5010; 837, 835, 270/271, 276/277, 277CA/999**
- Designed, developed and executed Regression Tests for web-based portals using BrowserStack
- Attended KT sessions involving entire project team to share knowledge & provide feedback on any difficulties faced and Positive/Negative attributes for merckEngage and Medical Wizard projects
- Performed Manual, Automated & Regression Testing for software rollouts and patches

- Developed and updated Test Cases to be automated and trained others on best practices for automated test script creation for Merck products - Merck Connect
- Worked with release engineering team to create and maintain automated nightly Build Verification Test (BVT) as part of Test Batch jobs for LOB - Claritin, Coppertone, DrScholl's, MiraLAX,
- Performed User Acceptance Testing (UAT) in UAT Env prior to handing over for Prod release
- Led test planning, test cases/scripts, reusable test data, test case automation using automation tool Selenium WebDriver
- Committed strongly to priorities and worked well in an integrated developer/tester environment
- Took ownership and strove to promote software and applications mitigating defects
- Conducted **Functional Requirement Specification (FRS)** requirement walk throughs with designers, developers and stakeholders in understanding test coverage & traceability
- Worked closely with development & product teams to ensure adherence to business requirements
- Identified and facilitated issue triage & resolution with functional and technical groups

Software Test Analyst

Verizon, NJ | 5/2012 - 10/2013

Job Duties/Responsibilities:

- Gathered requirements with Customers and business analysts, to make sure the testing covers all different scenarios of testing.
- Involved in creating Test plans, for different components within the project.
- Created Test runs, Test cases, Mockups, Process Flow diagrams from the functional documents.
- Created RTM Matrix, ensured the Test Planning, Testing Strategy, Test cases, Flows are capturing and covering all the Functional/Non Functional requirements.
- Worked with the development team in creating environment and loading and migrating data.
- Performed various kinds of testing, such as Exploratory, Smoke box, Regression, Integrated, System, Back-end validation, End to End, UAT.
- Developed, executed and maintained Selenium automation scripts for trading web application.
- Used Selenium Grid, JUnit test scripts to run automated test cases in parallel on 5 environments.
- Extensively performed Database testing using Selenium. Generated Production DB reports using SQL queries.
- Provided different build reports, Selenium automation reports, Performance testing reports to Senior Management.
- Utilized Selenium IDE for Open source web testing
- Implemented Page Objects, Data Driven, Keyword Driven, Hybrid automation frameworks using Selenium WebDriver, JAVA, JUnit.
- Expertise in Selenium automation using Selenium WebDriver, Selenium Grid, JAVA, JUnit & Maven
- Expertise in writing Selenium WebDriver automation scripts in JAVA for highly transactional E-commerce websites
- Designed and implemented different automation frameworks from starch like Page Objects framework, Keyword Driven framework, Data Driven framework and Hybrid framework for a number of projects
- Maintained the Selenium & JAVA automation code and resources in source controls like CVS, SVN over the time for improvements and new features
- Worked as liaison between users and development team by answering questions around usage, functionality and requirements.
