

PRUDVI MADHALA

☎ +1-945-536-9582 | ✉ Prudvimadhala@gmail.com | [LinkedIn](#) | [GitHub](#)

Full Stack Java Developer with over 4 years of hands-on experience designing, developing, and maintaining scalable web applications. Proficient in Java, JavaScript, HTML, CSS, and frameworks such as Spring Boot, Hibernate, and Angular, to build dynamic and responsive applications. Skilled in utilizing RESTful APIs, microservices architecture, and integrating front-end and back-end systems to create seamless user experiences. Experienced with relational databases (MySQL, PostgreSQL) and NoSQL databases (MongoDB), with a strong understanding of data modeling, querying, and optimization. Expertise in version control systems such as Git, CI/CD pipelines, and deploying applications to cloud platforms like AWS and Azure for enhanced scalability and performance. Adept at applying agile methodologies, performing unit testing, debugging, and troubleshooting to ensure optimal application functionality. Passionate about delivering high-quality, user-centric solutions and driving continuous improvement in the development process for greater business impact

SKILLS:

- **Programming:** Java, Python, C
- **Tools & Technologies:** Spring Boot, Hibernate, Angular, RESTful APIs, Microservices, MYSQL, PostgreSQL, SQL Server, Visual Studio, Eclipse
- **Web Technologies:** JavaScript, HTML5, CSS3, React, Node.js
- **Databases:** MySQL, PostgreSQL, MongoDB, Database Management, Data Modeling, Query Optimization
- **Version Control & Collaboration Tools:** Git, GitHub, Jira
- **Project Methodologies:** Agile, Scrum, Kanban, SDLC
- **AWS Services:** EC2, S3, ECS, ECR, Lambda, DynamoDB, CloudWatch
- **DevOps Tools:** Docker, Kubernetes, Jenkins, AWS Code Commit, Docker Hub
- **Development Practices:** Unit Testing, Debugging, Troubleshooting, Continuous Integration, Continuous Deployment
- **Deployment & Scalability:** Microservices Architecture, RESTful APIs, Cloud Deployment, CI/CD Pipeline

PROFESSIONAL EXPERIENCE:

NORTHERN TRUST | DALLAS, TX

SEP 2024 – PRESENT

FULL-STACK DEVELOPER

RESPONSIBILITIES:

- Developed highly interactive web applications using React, Angular, and Spring Boot, enabling secure customer transaction portals with responsive UI/UX designs.
- Built RESTful APIs and integrated microservices architecture to enhance communication between the front-end (React) and back-end (Java) systems.
- Created and maintained scalable backend microservices with Java, Hibernate, and RESTful APIs interacting with MySQL and PostgreSQL databases, implementing advanced query optimization techniques.
- Implemented CI/CD pipelines using GitLab and Jenkins to automate build, testing, and deployment processes for both Java and React applications.
- Managed full lifecycle microservices deployments on AWS EC2 using containerized environments with Docker and Kubernetes, ensuring 99.9% uptime and seamless scalability.
- Automated build and release pipelines using Jenkins integrated with AWS Code Commit and Docker Hub, accelerating delivery and reducing manual errors.
- Implemented continuous monitoring and alerting using AWS CloudWatch to proactively detect and resolve system anomalies.
- Developed RESTful APIs with secure OAuth2 authentication, adhering to banking compliance and data privacy standards.
- Collaborated across cross-functional teams using Git and GitHub for version control and peer code reviews to maintain high code quality.
- Implemented unit testing and automated testing strategies for both React and Java applications, ensuring high-quality, bug-free code.

Environment: Java, Spring Boot, Hibernate, React, Angular, HTML5, CSS3, JavaScript, RESTful APIs, Microservices, PostgreSQL, SQL Server, Docker, Kubernetes, Jenkins, AWS (EC2, S3, CloudWatch, Code Commit), Git, GitHub, Jira, Agile, CI/CD Pipeline, OAuth2, Eclipse, Visual Studio

ACCENTURE PRIVATE LIMITED | INDIA.

APR 2021 – DEC 2022

JAVA DEVELOPER

RESPONSIBILITIES:

- Designed and implemented HIPAA-compliant backend microservices using Java, Spring Boot, and Hibernate for healthcare data management systems.
- Created ETL workflows with AWS Lambda and Glue to process and integrate data from multiple medical providers into DynamoDB and MySQL databases.
- Deployed containerized applications on AWS ECS with Docker and managed orchestration through Kubernetes to maintain scalable and fault-tolerant systems.
- Enhanced database query performance via indexing and query tuning on MySQL and PostgreSQL databases.
- Automated CI/CD pipelines using Jenkins and integrated with AWS Code Commit repositories to enable reliable, repeatable deployments.
- Collaborated with Kanban teams using Jira, maintaining high productivity and rapid issue resolution cycles
- Developed Python scripts for data validation, processing, and reporting, reducing manual errors by 50%.
- Implemented RESTful APIs to support secure access and data exchange, incorporating role-based authentication and logging.
- Monitored system health and logs using AWS CloudWatch, setting up alerts to reduce response time to failures.
- Ensured code quality through comprehensive unit and integration tests using JUnit and Mockito frameworks.
- Debugged and resolved complex issues across multiple layers, from frontend to backend databases.
- Integrated real-time data handling into applications using WebSocket and React, improving the interactivity and responsiveness of applications.

Environment: Java, Spring Boot, Hibernate, Python, RESTful APIs, MySQL, DynamoDB, PostgreSQL, AWS (Glue, Lambda, ECS, ECR, S3, CloudWatch), Docker, Kubernetes, Jenkins, AWS Code Commit, Git, GitHub, Jira, Kanban, JUnit, Mockito, CI/CD, SDLC

HCL TECHNOLOGIES LIMITED | INDIA.

JAN 2020 – APR 2021

SOFTWARE ENGINEER

RESPONSIBILITIES:

- Developed end-to-end e-commerce platforms using React and Node.js alongside backend microservices in Java and Spring Boot.
- Designed efficient MongoDB and PostgreSQL schemas for handling large-scale product catalogs, customer profiles, and transaction records.
- Implemented secure RESTful APIs with OAuth2 and JWT for customer authentication and authorization
- Managed containerized deployments with Docker and orchestrated environments with Kubernetes, supporting rapid scaling during sales events.
- Built CI/CD pipelines leveraging Jenkins, GitHub Actions, and AWS Lambda for automated testing and deployment workflows
- Enhanced UI responsiveness and accessibility by optimizing frontend components in React, JavaScript, HTML5, and CSS3.
- Conducted extensive unit testing with JUnit and frontend testing using React Testing Library, raising product stability.
- Created logical and physical data models, putting into practice the concepts of normalization and RDBMS.
- Delivered detailed design of web application that includes UML case, class, and sequence diagrams.
- Performed Unit, functional, and integration testing and was part of 24x7 on-call and on-site support.

Environment: Java, Spring Boot, React, Node.js, MongoDB, PostgreSQL, MySQL, HTML5, CSS3, JavaScript, RESTful APIs, AWS (Lambda, S3, CloudWatch), Docker, Jenkins, Git, GitHub, GitHub Actions, Agile, SDLC, OAuth2, Visual Studio, Eclipse, JUnit, Docker Hub, CI/CD Pipeline.

EDUCATION:

University of North Texas
Master of Computer Science

Denton, TX | Jan 2023 - July 2024
3.5/4.0

K L University
Bachelor's in engineering

India | Aug 2016 - May 2020
3.5/4.0
