PROFESSIONAL SUMMARY

- Automation Test Engineer with 3+ expertise in designing, developing and executing automated test scripts for Mobile applications using Manual and Automation testing on android, iPhone and different mobile platforms.
- Proficient in Agile, Scrum and Waterfall methodologies, with robust background in regression, functional, and integration testing.
- Good in Software Development Life Cycle (SDLC), Defect Life Cycle Management.
- Expertise in analyzing business specification documents, designing and developing Test plans, writing, executing and automated Test cases.
- Experience in testing User Interface applications using Selenium Automation Test Scripts.
- Worked with Automation Testing tools including Selenium – IDE, WebDriver, RC, Maven, Jenkins, load and performance.
- Experience in developing framework using Hybrid model.
- Experience in tracking issues with JIRA and various types of testing like Regression Testing, Acceptance Testing, Performance Testing, Automation Testing, Manual Testing, Integration Testing, End to End Testing, Unit Testing, system Testing, Black Box Testing, Functional Testing, Documentation and Reporting.
- Hands-on experience in test driven development (TDD) and Behaviour driven development (BDD).
- Professional in testing using HP interactive tools like – Mobile Quality Center, ALM and QTest.
- Knowledge of programming in Java, C, C++, Python, HTML, XML, and SQL on Windows environments.
- Experience with source vision control tools like GitHub, Bitbucket and Jira.
- Experience in creating DSA data to test Bank of America mobile app stability in different kinds of environments.

SKILLS

Proficient in Selenium WebDriver, Waterfall, Scrum, SDLC and Agile testing. Experienced in CI/CD Jenkins, Maven, TestNG, Jenkins, ALM, MQC, MS -Office Suite, Bitbucket and GitHub. proficiency in Java, SQLC, Bug Tracking tool JIRA, QTest and Page Object Model (POM). Expertise in SDLC, STLC, BLC and Agile Methodology.

EXPERIENCE

Project: Bank of America Mobile Banking (Feb 2021– August 2023)

Client: Bank of America, Hyderabad, India

Role: Automation Developer/Tester

Description: The Bank of America application user can bank conveniently and securely to check total balances, money transfers, bill pay, check deposits and various help me features. Responsible for building framework or automating the Mobile application using various frameworks like espresso, perfecto, Mobile Labs, Selenium and Appium.

Roles & Responsibilities:

- Working on building automation frameworks and test suites and making them executable on Mobile Labs.
- Worked on Agile/Scrum Methodology involved in giving points to User Stories, Backlog grooming, User story demos, attended retrospective meetings and worked on Iterations (Sprints) part of releases.
- Worked with all modules of test Cases, Requirements, Test Case Design & Execution Lists.
- Implement various logging strategies, framework design changes and create technical documentation.
- Tested compatibility of application for dynamic and static content under various cross browsers using HTML IDs and XPath in selenium.
- Engaged in Manual Testing of functionalities in construction pricing web-based application.
- Raise defects in JIRA after execution, monitor until defects get fixed and update different documents in Confluence. Create execution reports for planned releases.
- Doing regression, backward and market compatibility testing using automation suites.
- Excellent experience in source version control tools such as Git.
- Performed troubleshooting, fixed and deployed many bug fixes of the main applications that were maintained as the main source of data.
- Wrote test scripts from process flow diagrams.
- Involved in code review, pair programming, technical document drafting.
- Reported software defects in ALM and interacted with the developers to resolve technical issues.
- Android Link: <https://play.google.com/store/apps/details?id=com.infonow.bofa&hl=en>

Project: Bank of America Mobile Banking (Feb 2020 – Feb 2021)

Client: Bank of America, Hyderabad, India

Role: Automation Tester

Roles & Responsibilities:

- Involved in analysis, development, implementation, testing and maintenance of complete Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC) projects.
- Assessed and analyzed user stories and participated in Sprint Planning, Review Sessions, Scrum Meetings and developed Test Scenarios, Test cases, Test data, Test procedures and Test reports.
- Proficient in cross platform testing on iOS, Android, Android Tablet and iPad.
- Performed UI, Functional and Regression testing by automated using selenium, TestNG, Maven and Jenkins.
- Used Confluence solutions bitbucket and JIRA to gather and document information.
- Involved in smoke testing, System testing, Regression testing, Black box testing and White box testing.
- Involved in manual testing of various test cases with respective test scripts and generating analysis reports with Quality Center.
- Involved in setting up continuous integration systems and working knowledge with cloud-based code repository systems like GitHub.

EDUCATIONAL DETAILS

MS in Information Systems and Technology [GPA: 3.7/4.0]

Wilmington University, New Castle, DE *[September 2023 – May 2025]*

Bachelor's in Computer Science and Engineering [GPA: 7.3/10]

JNTUK University, Kakinada, India *[August 2015 – May 2019]*

CERTIFICATIONS

Core Banking – Accenture *[September 2022]*

Selenium Web Driver with Java – Udemy *[October 2023]*
