

Alekhya Puppala

Data Analyst

puppala@careeremail.net | (948) 888-7888 | USA | [LinkedIn](#)

Summary

Data Analyst with 4+ years of experience delivering actionable insights through data wrangling, visualization, and predictive modeling. Proficient in SQL, Python, Power BI, AWS Glue, and Redshift. Skilled in ETL development, statistical modeling, and dashboard creation to drive decision-making. Proven ability to collaborate cross-functionally, automate reporting, and analyze complex datasets using tools like SSIS, Tableau, and Salesforce CRM to optimize performance and business growth.

Technical Skills

- Programming & Analytics:** SQL, Python (Pandas, NumPy, SciPy, Statsmodels), Linear Regression, Time Series Forecasting, Cohort Analysis, Survival Analysis
- Data Engineering & ETL:** AWS Glue, SSIS, Power Automate, Data Cleaning & Validation (Python, AWS Glue)
- Data Visualization & BI:** Power BI (KPI Tracking, DAX, Dynamic Filtering, Drilldowns), Tableau, Excel
- Databases & Warehousing:** Microsoft SQL Server, AWS Redshift
- Cloud Platforms:** AWS (Glue, Redshift), Azure, Google Cloud Platform (GCP)
- CRM & Data Sources:** Salesforce CRM, Web Analytics Tools, Survey Platforms
- Reporting & Collaboration:** Excel, Agile Methodologies, Stakeholder Engagement

Professional Experience

Data Analyst, HSBC 02/2024 – Present | Remote, USA

- Led Portfolio Performance Analysis initiatives at HSBC, collaborating with cross-functional Agile teams and stakeholders to define requirements and deliver performance insights for 25+ investment portfolios.
- Streamlined SQL queries and enhanced ETL pipelines using AWS Redshift and AWS Glue, reducing processing time by 40% and ensuring on-time, accurate reporting across critical datasets.
- Utilized Python libraries such as Pandas, NumPy, and Statsmodels to analyze over 1 million data points from 3+ years of historical portfolio data, identifying actionable performance trends.
- Built a predictive Linear Regression model to forecast portfolio returns, improving forecast accuracy by 15% and supporting data-driven investment strategies.
- Implemented data validation processes using AWS Glue to detect and correct 10,000+ data anomalies, significantly boosting reporting reliability and stakeholder confidence.
- Developed advanced Power BI dashboards with interactive filters, KPI visualizations, and drill-down capabilities, leading to a 20% increase in efficiency for executive-level decision-making.

Data Analyst, Harsco Corporation 01/2021 – 08/2022 | Hyderabad, India

- Joined during flatlining sales across 20 UK stores; supported data consolidation and behavior analysis, enabling marketing and inventory teams to access unified, actionable insights to enhance store-level performance.
- Built SSIS data pipelines integrating e-commerce and in-store transactions into a centralized Microsoft SQL Server warehouse, streamlining fragmented systems and improving data consistency across all channels.
- Conducted customer segmentation and trend analysis, uncovering performance gaps in four regions; enabled targeted campaigns that resulted in a 20% increase in customer repeat purchases.
- Delivered weekly Power BI dashboards highlight product performance, KPIs, and retention trends for executive reviews, enhancing decision-making and visibility across regions and product lines.
- Applied regression and time series models to improve demand forecasting; this drove a 25% improvement in stock alignment, directly impacting supply chain efficiency and reducing overstock.
- Automated Excel-based reporting with Power Automate, reducing manual workload; collaborated with business units to improve data collection and embed consistent, reliable data practices into planning cycles.

Jr. Data Analyst, BYJU 01/2020 – 12/2020 | India

- Analyzed parent and student engagement data, driving better campaign targeting and increased user acquisition during a critical growth phase. Collaborated closely with marketing teams to optimize strategies and improve overall campaign performance.
- Collected and cleaned data from Salesforce CRM, web analytics tools, and survey platforms, ensuring consistent and accurate metrics throughout the marketing funnel, leading to actionable insights and reliable reporting for campaign decision-making.
- Conducted behavior analysis that improved email and app campaign CTR by 15%. Wrote SQL queries and Python scripts to track user activity and churn, prioritizing interventions that boosted campaign efficiency by 30%.
- Build Tableau dashboards to visualize engagement frequency, conversion rates, and ROI, enabling leadership to assess campaign performance. Team up with product and marketing teams to refine tracking frameworks and feed real-time insights for optimization.

Education

Master of Science in Computer Science
Old Dominion University 08/2022 – 05/2024 | Virginia, USA

Bachelor of Engineering in Information Technology
Vasavi College of Engineering 08/2016 – 10/2020 | Hyderabad, India

Certificates

- Google Data Analytics Certificate – Coursera
- AWS Data Engineer Associate – Udemy
- Microsoft Power BI – Udemy
