

PURNA CHANDRA DONKALA

Data Analyst

Location: GA | Phone: (404) 590 1116 | Email: burnadonkala21@gmail.com | [LinkedIn](#)

SUMMARY

- Having **3+ years** of experience as a **Data Analyst**, specializing in **data visualization, data mining, data cleaning, and data wrangling** to drive business insights and optimize decision-making.
- Utilized **Python** for in-depth analysis of extensive datasets, extracted valuable insights from unstructured text data, and ensured data integrity through expert cleansing methodologies.
- Hands-on experience with **AWS services** (EC2, S3, IAM, Lambda) for cloud-based data processing, storage, and security management.
- Created interactive **dashboards and reports using Tableau, Power BI, Excel, and visualization libraries**.
- Expertise in **SQL** for efficient **data extraction, transformation, and optimization of queries**, enhancing data retrieval speed and accuracy.
- Applied **Python** with libraries like **Pandas, NumPy, SciPy, Matplotlib, and Seaborn** for **advanced preprocessing, analysis, and modeling**.
- Strong understanding of **ETL processes**, text mining, and statistical analysis to extract meaningful insights from structured and unstructured data.
- Skilled in **Agile methodologies (SCRUM)**, collaborating with cross-functional teams to ensure efficient data-driven solutions.
- AWS Certified Cloud Practitioner, demonstrating expertise in cloud computing and data management on AWS.

EDUCATION

Master of Science: Computer Science

Kennesaw State University, Kennesaw, GA | May 2023

Bachelor of Science

Jawaharlal Nehru Technological University, Andhra Pradesh, India | Jul 2021

CERTIFICATIONS

AWS Certified Solutions Architect – Associate | 2025

TECHNICAL SKILLS

Programming & Scripting Languages:	Python, SQL, Pandas, NumPy, SciPy, Matplotlib, Seaborn
Data Analysis & Visualization:	Power BI, Tableau, Excel, DAX, Data Modeling, Report Automation, Storytelling, Data Blending
Databases:	MySQL, NoSQL, PostgreSQL, SQLite, MongoDB
Methodologies:	Agile, SCRUM, Waterfall, Git
Cloud Technologies:	AWS (EC2, S3, IAM, Lambda, Redshift)
Machine Learning & Statistical Analysis:	A/B Testing, Predictive Analytics, Time-Series Forecasting, Text Mining, Sentiment Analysis, NLP
Analytical Skills:	Data Mining, Data Cleansing, Statistical Analysis, Data Visualization, Text Mining, ETL

WORK EXPERIENCE

Data Analyst

Cigna Healthcare, Atlanta, GA

July 2024 - Present

- Designed and developed interactive **Power BI** dashboards to visualize business KPIs, improving decision-making efficiency.
- Wrote complex **SQL queries** to extract, clean, and transform datasets, enhancing data accuracy and retrieval speed.

- Utilized **Python (Pandas, NumPy, Seaborn)** to analyze in-depth data and identify trends, anomalies, and actionable insights.
- Implemented **AWS EC2** for scalable computing and automated data processing tasks, improving efficiency in handling large datasets.
- Created automated ETL pipelines using **Python** and **SQL**, significantly reducing manual data processing efforts.
- Created **Tableau** dashboards to analyze customer behavior trends, leading to data-driven marketing strategies.
- Performed statistical analysis using **SciPy** and **Seaborn**, helping teams make data-driven decisions with a 20% improvement in accuracy.
- Led the migration of on-premise databases to **AWS S3** and **Redshift**, improving storage efficiency and data accessibility.
- Integrated **third-party APIs** for data enrichment, improving customer segmentation accuracy.
- Utilized **MongoDB** to handle unstructured data and enhance the analysis of customer feedback and social media sentiment.
- Optimized **SQL queries** and **indexing strategies**, reducing database query execution time by 30%.
- Integrated **AWS Lambda** functions to automate data workflows and reporting.
- Developed real-time anomaly detection models using **Python** to identify fraud and operational inefficiencies.
- Assisted in cloud data migration from on-premise **SQL databases to AWS**.

Data Analyst
BCBS, Atlanta, GA

Aug 2023 - June 2024

- Designed **SQL-based ETL workflows** to extract, transform, and load (ETL) data from multiple sources into a centralized data warehouse.
- Implemented **advanced data cleaning and transformation techniques** using **Python**, ensuring high data quality.
- Conducted statistical analysis with **Seaborn** and **SciPy**, identifying patterns in large healthcare datasets.
- Utilized **AWS Lambda functions** to automate data processing tasks, reducing manual workload.
- Developed interactive **Power BI dashboards**, enabling executives to track key business metrics in real time.
- Developed **SQL stored procedures and triggers** to automate data validation checks.
- Utilized **AWS EC2 instances** for scalable computing power, facilitating complex data analysis tasks and handling variable data workloads effectively, a critical aspect for dynamic data analyst roles.
- Implemented role-based access controls (**RBAC**) in **AWS IAM**, ensuring secure data access.
- Created **ad-hoc reports and data extracts** to support business and regulatory reporting needs.
- **Used Power BI's DAX** functions to enhance data calculations and visualizations.
- Optimized **MongoDB queries** for faster data retrieval and reporting, improving query response times by 25%.
- Performed time-series analysis to track healthcare cost trends and optimize budgeting.
- Monitored and resolved data integrity issues, ensuring accurate reporting.
- Conducted knowledge-sharing sessions with team members to enhance analytical capabilities.

Data Analyst
KPMG, India

Dec 2020 – Nov 2021

- Applied advanced proficiency in **NumPy** and **Pandas** for intricate data preprocessing and analysis, resulting in significantly improved data processing time and accuracy in complex **data modeling**, positively impacting decision-making processes.
- Led **Agile (SCRUM)** meetings to coordinate cross-functional data analytics projects.
- Designed and implemented **SQL queries** to extract and analyze large datasets, improving operational insights.
- Created **Tableau** dashboards to visualize financial data, supporting leadership in strategic decision-making.
- Built **ETL pipelines** to automate data ingestion and transformation, reducing manual work by 50%.
- Executed advanced **SQL** techniques to streamline and optimize data queries, notably improving overall data analysis efficiency and expediting the generation of actionable insights for informed decision-making.
- Optimized **MySQL** queries to improve data retrieval speed and reduce database load.
- Employed **AWS Identity and Access Management (IAM)** to manage secure access to data resources, ensuring data integrity and confidentiality - key components in data analysis workflows.
- Developed **Power BI reports** to track key business performance indicators.
- Optimized **database query indexing** and partitioning to enhance performance.
- Conducted sentiment analysis on customer reviews using **NLP techniques** to enhance service strategies.
- Applied statistical analysis to measure campaign effectiveness, improving ROI tracking.
