

## SUMMARY

Software Engineer with 5+ years of experience in building scalable web applications using **Python (Django, Flask, FastAPI)** and **Java (Spring Boot, Hibernate)**. Proficient in front-end development with **React.js, Angular, JavaScript, HTML5, CSS3, Bootstrap**, and back-end microservices with **REST APIs, GraphQL, and WebSockets**. Skilled in working with **SQL and NoSQL databases**, deploying applications on **AWS, Azure, and GCP**, and automating CI/CD pipelines using **Jenkins, Docker, Kubernetes, and Git**. Strong background in unit testing, integration testing, and performance optimization, consistently improving efficiency by **20–40%** across projects.

## SKILLS

- **Programming Languages:** Python, Java, JavaScript, TypeScript, SQL, PL/SQL, Shell Scripting
- **Python Frameworks:** Django, Flask, FastAPI, Pandas, NumPy
- **Java Frameworks:** Spring Boot, Hibernate, JSP, Servlets, JPA
- **Frontend Technologies:** React.js, Angular, JavaScript, HTML5, CSS3, Bootstrap, jQuery
- **Databases:** MySQL, PostgreSQL, Oracle, MongoDB, DynamoDB, Redis
- **APIs:** RESTful APIs, GraphQL, JSON, XML, WebSockets
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, RDS, ECS), Azure, GCP, Jenkins, Docker, Kubernetes, Terraform, Git, GitHub, GitLab
- **Testing Tools:** PyTest, JUnit, Selenium, Postman, JMeter
- **Other Tools:** IntelliJ, Eclipse, VS Code, Maven, Gradle, Jira, Confluence, Agile/Scrum

## EDUCATION

- Master's Degree in computer Science from Texas Tech University, Lubbock, TX

## CERTIFICATIONS

- Meta front-end Developer Professional Certificate-Coursera
- AWS Certified Developer-Associate

## PROFESSIONAL EXPERIENCE

### SOFTWARE ENGINEER | META | DEC 2024 – CURRENT

- Developed scalable web applications using **Python (Django, Flask, FastAPI)** with **React.js and Angular**, improving load times by **28%**.
- Designed **RESTful APIs and GraphQL services** handling **100K+ requests daily**, reducing response time by **22%**.
- Optimized data workflows with **Pandas, NumPy, and Celery**, improving processing efficiency by **35%**.
- Integrated **PostgreSQL and MongoDB databases** using ORM frameworks, enhancing query performance by **20%**.
- Automated deployment pipelines with **Jenkins, GitHub Actions, Docker, and Kubernetes**, cutting release cycles by **40%**.
- Deployed microservices on **AWS (EC2, Lambda, S3, RDS)** achieving **99.9% uptime**.
- Built **unit and integration tests** using **PyTest, Selenium, and Postman**, ensuring **93%+ test coverage**.
- Implemented **OAuth2, JWT authentication, and role-based security**, reducing unauthorized access by **18%**.
- Designed **responsive UI components** with **React.js, Angular, and Bootstrap**, increasing user satisfaction by **15%**.
- Implemented **caching with Redis** and asynchronous processing, improving API performance by **25%**.
- Monitored applications with **AWS CloudWatch and ELK Stack**, reducing production issues by **30%**.
- Participated in **Agile ceremonies** (stand-ups, sprint planning, retrospectives) and ensured **98% of sprint tasks were delivered on time**.

### SOFTWARE DEVELOPMENT ENGINEER | AMAZON | SEP 2019 – JUN 2023

- Built enterprise-grade web applications using **Java (Spring Boot, Hibernate, JSP, Servlets)** serving **50K+ daily transactions**.
- Developed **REST APIs and microservices** with **Spring Boot** and **JPA**, boosting feature deployment by **25%**.
- Built **dynamic and responsive UIs** with **React.js, Angular, JavaScript, HTML5, CSS3, and Bootstrap**, improving user engagement by **18%**.
- Optimized SQL queries in **MySQL and Oracle databases**, achieving **98% transactional accuracy**.
- Implemented **NoSQL solutions (DynamoDB, MongoDB)** to handle unstructured data, improving flexibility by **20%**.
- Automated builds and deployments using **Jenkins, Maven, Docker, and Kubernetes**, reducing downtime by **35%**.
- Integrated **AWS services (EC2, S3, Lambda, RDS)** for scalable cloud-based solutions, cutting infrastructure costs by **15%**.
- Secured applications with **Spring Security, OAuth2, and JWT**, reducing vulnerabilities by **20%**.
- Wrote **unit, integration, and load tests** with **JUnit, Postman, and JMeter**, ensuring **95% defect-free releases**.
- Enhanced system performance by implementing **caching (Ehcache, Redis)**, improving response time by **25%**.
- Deployed **serverless features with AWS Lambda**, automating background processes with **30% cost savings**.
- Maintained detailed **technical documentation** in **Confluence**, ensuring smooth knowledge transfer across teams.
- Participated in **Agile/Scrum development cycles**, completing **95% of assigned tasks within deadlines**.
