

# Pranay Reddy Gadepelly

## Python Developer

+1 (320) 803-0608 | [pranayreddygadepelly@gmail.com](mailto:pranayreddygadepelly@gmail.com)

### SUMMARY

Python Developer with 4+ years of experience building backend services, automation pipelines, and REST APIs using Python, Django, Flask, and FastAPI. Skilled in AWS, Docker, Kubernetes, SQL/NoSQL databases, and CI/CD pipelines. Strong problem-solving abilities with hands-on experience integrating business systems, consuming APIs, and debugging production issues in Agile enterprise environments.

### EXPERIENCE

#### Python Developer

08/2024 – Present

##### Northwestern Mutual, NH

- Participated in the full SDLC — requirements, design, development, testing, deployment, and production support — delivering scalable Python-based solutions.
- Developed and maintained backend applications using Flask, building RESTful APIs for seamless integration between frontend systems and backend services.
- Designed and deployed scalable cloud solutions using AWS EC2, S3, RDS, Lambda, SQS, and SNS, improving application reliability and performance.
- Worked with MySQL and MongoDB to architect efficient data models, optimize queries, and support high-volume data retrieval across web applications.
- Built interactive UI components using HTML5, CSS3, JavaScript, jQuery, and Angular, enhancing user experience and reducing page reload times with AJAX.
- Enabled smooth system-to-system communication by processing and exchanging XML, XSLT, and JSON in API integrations.
- Containerized Python applications using Docker and orchestrated deployments with Kubernetes, improving scalability and environment consistency.
- Implemented CI/CD pipelines with Jenkins, integrating automated builds, tests, deployments, and utilizing Maven for build automation.
- Wrote unit tests with PyUnit, improving code quality, preventing regressions, and reducing overall defect rates.
- Used GitHub, Jira, and Agile methodologies to collaborate with cross-functional teams, track progress, manage releases, and maintain detailed project documentation.

#### Python Developer

10/2021 – 08/2023

##### DXC Technologies, India

- Gathered client requirements and developed Python scripts and backend components to automate business workflows and support application functionality.
- Built modular Python code using standard libraries and reusable modules to improve maintainability and performance.
- Designed and executed SQL queries to store, retrieve, and process data for Python and Django applications.
- Integrated RESTful APIs into Django/Python services, enabling seamless data exchange across internal and external systems.
- Performed data cleaning, transformation, and preprocessing using NumPy and Pandas, supporting analytics and reporting needs.
- Implemented API interactions using HTTP methods (GET, POST, PUT, DELETE) and handled structured/unstructured data using XML and JSON.
- Used jQuery for client-side data manipulation, improving UI responsiveness and data handling.
- Participated in Agile ceremonies, contributed to team discussions, and prepared documentation to support project reporting and delivery.

#### Python Developer

02/2021-09/2021

##### Fruges Technologies, India

- Developed and deployed a Python-based customer feedback automation platform to collect, process, and analyze survey responses, support emails, and product reviews.
- Built and maintained RESTful APIs using FastAPI, enabling seamless integration with internal dashboards and third-party reporting tools.
- Applied NLP techniques with spaCy and TextBlob to extract sentiment insights and categorize customer issues for product and service teams.
- Designed ETL workflows using Python, Pandas, and SQLAlchemy, and automated data ingestion into PostgreSQL using Apache Airflow.

- Improved pipeline performance by 45% through profiling and optimizing Python functions, and added robust logging, exception handling, and monitoring (Prometheus, Grafana).
- Wrote unit and integration tests using pytest, ensured PEP8 compliance, and collaborated with cross-functional teams in Agile sprints to deliver reliable, production-ready features.

## SKILLS

---

**Programming & Scripting:** Python (2.x/3.x), SQL, JavaScript, Shell Scripting, C, C++, PHP, Go

**Python Frameworks:** Django, Flask, FastAPI, Pyramid, web2py

**APIs & Integration:** RESTful APIs, SOAP, JSON, XML, XSLT, HTTP Methods (GET/POST/PUT/DELETE), AJAX, jQuery

**Databases:** MySQL, PostgreSQL, Oracle, Microsoft SQL Server, MongoDB, Cassandra, Elasticsearch

**Data Engineering & Processing:** NumPy, Pandas, SQLAlchemy, ETL/ELT Workflows, Apache Airflow, Data Cleaning & Transformation

**Cloud Platforms:** AWS (EC2, S3, RDS, Lambda, SQS, SNS), Google Cloud Platform (GCP)

**DevOps, CI/CD & Automation:** Docker, Kubernetes, Jenkins, Git, GitHub, Maven, Apache Tomcat, NGINX, Prometheus, Grafana

**Web & Frontend Technologies:** HTML5, CSS3, JavaScript, jQuery, Angular, Typescript, XHTML

**Testing & Quality:** PyUnit, pytest, Unit/Integration Testing, PEP8 Standards, Code Reviews

**Tools & Environments:** PyCharm, Eclipse, Linux, Windows, macOS, CentOS, JIRA, Agile/Scrum

**Version Control:** Git, GitHub, GitLab, Subversion (SVN)

## EDUCATION

---

Master of Science | Computer Science

Rivier University

Bachelor of Technology | Information Technology

Sreenidhi Institute of Science and Technology
