

ANJALI DEVI

Python Full Stack Developer

(513)409-3840 || anjalidevi.m0103@gmail.com || www.linkedin.com/in/anjalidevi10 || Ohio - 45324

SUMMARY STATEMENT:

With 5+ years of full-stack experience, I build scalable applications using **Python (Django, Flask, Fast API)** and **React, Angular, Vue**. I develop **REST/GraphQL APIs**, integrate **WebSocket's**, and manage data with **PostgreSQL, MySQL, MongoDB, Redis**, and **Elasticsearch**. I deploy on **AWS, Azure**, and **GCP** using **Docker, Kubernetes, EC2, Lambda, S3, RDS, Jenkins CI/CD, Terraform**, and **Ansible**. I design microservices and event-driven systems with **Kafka, RabbitMQ**, and **Celery**; implement **OAuth2, JWT, LDAP** security; and follow TDD using **PyTest, Jest, Mocha, Postman**, and **Selenium**. I also optimize performance with **Nginx, Gunicorn, Apache, Redis caching**, and handle large-scale data processing using **Python, HDFS, Logstash**, and **Elasticsearch**.

PROFESSIONAL EXPERIENCE:

Python Full Stack Developer - (Scyber) Progressive Insurance, Mayfield, Ohio, USA **Apr 2025 - Current**
The Progressive Corporation (USA) – Developed and maintained Python-based web applications and RESTful APIs using Django and Flask, with front-end integration (HTML, CSS, JavaScript).

- **Full Stack Development & APIs:** Built scalable **Python (Django, Flask, FastAPI)** and **React.js/Angular/Vue.js** apps; developed **RESTful/GraphQL APIs** and third-party integrations, improving UI performance by **30%** and communication efficiency by **25%**.
- **Databases & Cloud DevOps:** Optimized **PostgreSQL, MySQL, MongoDB, Redis** (–20% latency); deployed on **AWS, Azure, GCP**; automated CI/CD with **Jenkins, GitLab CI, CircleCI**, accelerating releases by **40%**.
- **Containerization & Security:** Used **Docker** and **Kubernetes/Docker Compose** for **50%** better scalability; implemented **OAuth2, JWT, LDAP, SSL/TLS**, reducing authentication issues by **40%**.
- **Testing & Big Data Systems:** Improved quality using **PyTest, Jest, Mocha, Selenium, Postman** (–35% bugs); built **Kafka/RabbitMQ/Spark/Flink/HDFS** pipelines, increasing data throughput by **30%**.

TECHNOLOGIES USED: Python, JavaScript, React.js, Node.js, Django, RESTful APIs, GraphQL, PostgreSQL, MySQL, MongoDB, AWS, HTML5, CSS3, SASS, Bootstrap, jQuery, Docker, Kubernetes, GitHub, Apache Kafka, RabbitMQ

Python Full Stack Developer - Cardinal Health, Dublin, Ohio, USA **Apr 2024 - Mar 2025**
Cardinal Health is a distributor of pharmaceuticals, a global manufacturer and distributor of medical and laboratory products. I developed the scripts and tools for data processing, analysis, and reporting using Python libraries such as **pandas, NumPy, and matplotlib**.

- **Full Stack & APIs:** Build scalable **Python (Django, Flask)** and **React/Vue/Angular** apps; develop **REST/GraphQL APIs** and optimize **PostgreSQL/MySQL/MongoDB/Redis/Elasticsearch**—improving UI performance by **30%** and reducing latency by **25%**.
- **Cloud & DevOps:** Deploy on **Azure/AWS** and automate CI/CD with **Jenkins, GitLab CI, CircleCI**; use **Docker/Kubernetes** for **50%** better scalability and **40%** faster releases.
- **Security & Big Data:** Implement **OAuth2/JWT**; build **Kafka/RabbitMQ** pipelines (+35% throughput); process large datasets via **HDFS/Spark/Hive**, reducing processing time by **40%**.
- **Testing & UI Optimization:** Improve reliability using **PyTest, Jest, Mocha**; optimize UI with **HTML5/CSS3/SASS** for faster load times.

TECHNOLOGIES USED: Python, Django, Flask, React.js, Vue.js, Angular, RESTful APIs, GraphQL, PostgreSQL, MySQL, MongoDB, Docker, Kubernetes, CI/CD, Jenkins, GitLab CI, PyTest, Jest, Mocha, OAuth 2.0, JWT, Apache Kafka.

Senior Python Developer - CreditAccess Grameen, Bangalore, India

Jan 2022 - Nov 2023

Credit Access Grameen Limited (CA Grameen) is an Indian microfinance institution. Involved in setting up deployment pipelines and automation scripts to deploy and manage Python applications in production.

- **Full Stack:** Built **Django/Flask** back-ends and **React/Angular/Vue UIs**, improving performance by **30%**.
- **APIs & Databases:** Developed **REST/Graph APIs** and optimized **PostgreSQL/MySQL/MongoDB**, cutting query time by **25%**.
- **Cloud & DevOps:** Deployed on GCP and automated CI/CD with Jenkins, GitLab CI, CircleCI, speeding releases by **40%**.
- **Security & Real-Time:** Implemented **OAuth2/JWT/LDAP** and built **Kafka/Hadoop/Spark** pipelines, boosting throughput by **35%**.
- **Testing & Agile:** Improved reliability by **20%** with **PyTest, Jest, Mocha**; delivered features efficiently using Agile workflows.

TECHNOLOGIES USED: Python, React.js, Angular, Vue.js, Django, Flask, RESTful APIs, GraphQL, GCP, Docker, Kubernetes, Apache Kafka, Hadoop, Apache Spark, PostgreSQL, MySQL, MongoDB, CI/CD, Jenkins, GitLab CI, OAuth 2.0.

Python Developer - BT Group, Bangalore, India

May 2020 - Dec 2021

BT Group plc is a British multinational telecommunications holding company. I wrote the unit and integration tests using PyTest or Unit test. Implemented test automation, continuous integration (CI), and continuous delivery (CD) pipelines.

- **Full Stack:** Built Python apps with **PostgreSQL/MySQL** and **React/Vue UIs**, improving performance by **30%**.
- **Big Data:** Optimized **Pandas/Spark/Hadoop/Kafka** workflows, boosting processing speed by **40%**.
- **ETL:** Automated Airflow pipelines, improving data accuracy and cutting manual work by **35%**.
- **CI/CD & Testing:** Used PyTest/unittest and Jenkins CI/CD to speed deployments by **40%** and reduce errors.
- **Security:** Applied **OAuth, JWT, SSL/TLS**, reducing security issues by **25%**.

TECHNOLOGIES USED: Python, SQL, Pandas, NumPy, PyTest, unit test, CI/CD, Jenkins, PostgreSQL, MySQL, React.js, Vue.js, Apache Spark, JavaScript, HTML5, CSS3, Kafka, Hadoop, OAuth, JWT, Apache Airflow.

KEY SKILLS:

- **Programming Languages:** Python, JavaScript, TypeScript, HTML5, CSS3, DHTML, SASS
- **Back-End Frameworks:** Django, Flask, FastAPI, J2EE
- **Front-End Frameworks & Libraries:** React.js, Vue.js, Angular, jQuery
- **Database Technologies:** PostgreSQL, MySQL, MongoDB, SQLite, Redis, Elasticsearch
- **Web & API Technologies:** RESTful APIs, GraphQL, WebSockets, Socket.io, JSON, XML, CSV, YAML
- **Version Control & Collaboration:** Git, GitHub, GitLab, Bitbucket
- **Cloud Platforms & Services:** AWS (EC2, Lambda, S3, RDS), Azure, Google Cloud, Heroku
- **Containerization & Orchestration:** Docker, Docker Compose, Kubernetes, Docker Swarm
- **DevOps & CI/CD Tools:** Jenkins, Terraform, Ansible, CircleCI, GitHub Actions
- **Testing & Quality Assurance:** PyTest, Jest, Mocha, Selenium, Postman, Swagger
- **Authentication & Security:** OAuth 2.0, JWT, LDAP, SSL/TLS, SAML
- **Message Brokers & Real-Time Data:** Apache Kafka, RabbitMQ, Apache Flink, WebSocket's, Socket.io
- **Caching & Performance Optimization:** Redis, Memcached, NGINX, Unicorn, Apache
- **Big Data & Distributed Systems:** HDFS, Apache Spark, Elasticsearch, Logstash
- **Build & Front-End Tools:** Webpack, Babel, Gulp, Grunt

EDUCATION: Masters in computer science from Wright State University.

CERTIFICATIONS: 1.AWS Certified Developer-Associate-Amazon web services.

2.CanCanIT Python Developer Certification – Core Python & application development.
