Education	
University of North Texas Master of Science - Advanced Data Analytics (GPA: 3.5/4.0)	Denton - Texas Jan 2023 – May 2024
Osmania University Bachelor of Engineering (GPA: 3.0/4.0)	Hyderabad - India Aug 2016 – Sep 2020
Work Experience	
Predictive Data Analyst LA County - Developed scalable ETL/ELT pipelines with Python, PySpark, Azure Data Factory & Azure Databricks (Medallion Architecture- Bronze, Silver, Gold). - Managed and modeled data in Azure SQL, Snowflake, applying Great Expectations for automated quality checks. - Built real-time streaming workflows using Kafka and Azure Event Hubs for timely claims insights. - Created RESTful APIs with Flask and delivered interactive dashboards in Power BI & Tableau. - Implemented MLOps practices via MLflow, Docker & Kubernetes (AKS) for reproducible, production-ready models. - Conducted statistical hypothesis testing and applied machine learning techniques (e.g., Logistic Regression, Random Forest, XGBoost) to identify trends and risk factors. - Managed agile workflows in Jira & Confluence for on-time, goal-aligned delivery.	Oct 2024 – Present Los Angeles, CA
Data Analyst Intuit Inc - Prototyped and deployed ML Models for customer segmentation and fraud detection using Python (Scikit-learn, XGBoost, Pandas, and AWS SageMaker). - Automated data ingestion and preprocessing workflows with PySpark, Hive, Snowflake. - Enabled CI/CD for ML pipelines using MLflow and Git; deployed and endpoints Via SageMaker. - Built Tableau dashboards and performed A/B testing to evaluate marketing and product optimization strategies.	Feb 2023 – Aug 2024 San Diego, CA
Data Analyst Albertsons - Built machine learning models for customer behavior prediction, recommendation engines, and personalization. - Enhanced mobile app and ecommerce user experience using deep learning models in Python and Spark. - Applied statistical anomaly detection to monitor and flag operational KPIs. - Collaborated with digital, marketing, and loyalty teams to translate data into strategic growth actions. - Created Power BI dashboards to communicate ML impact and customer insights to executive stakeholders.	Oct 2020 - Dec 2022 Plano, Texas
Project Experience	
Retail Demand Forecasting Using Machine Learning University of North Texas - Built time series models (ARIMA, Prophet) and ML models (XGBoost, LSTM) to forecast retail product demand. - Cleaned and structured data using SQL and Python; engineered features based on seasonal and external drivers. - Delivered a Power BI dashboard for real-time forecasting and trend analysis to guide procurement and logistics teams.	Mar 2024 – May 2024 Denton, Texas
Customer Segmentation and Sales Analysis University of North Texas - Utilized SQL to extract and transform transactional data, identifying key purchase patterns and KPIs. Python (Pandas, Scikit-learn) applied to perform clustering and classification for customer segmentation based on behavior. Developed Tableau dashboards to visualize sales performance, segment profiles, and business trends for strategic insights.	Feb 2024 – Apr 2024 Denton, Texas
Student Performance Prediction and Risk Analysis Osmania University - Developed classification models (Logistic Regression, SVM, Decision Tree) to identify at-risk students. - Processed academic and demographic data using MySQL and Python, visualized insights in Tableau. - Created early warning system reports used by faculty to implement academic interventions.	Jul 2020 – Sep 2020 Hyderabad, India
Technical Skills	
Programming Languages Machine Learning Algorithms Databases & Cloud Services Frameworks & Platforms Data Visualization & BI Other	Python (NumPy, Pandas, Scikit-learn), SQL, R, SAS, Scala Logistic Regression, Decision Trees, Random Forest, SVM, KNN, XGBoost, NLTK, LLMs, Predictive Modeling, Deep Learning (Neural Networks), Hypothesis Testing, NLP MySQL, PostgreSQL, MongoDB, Snowflake, GC, Azure (ADF, Synapse, Blob Storage, Cosmos DB,), AWS (S3, SageMaker, Glue) Hadoop, Apache Spark, PySpark, TensorFlow, PyTorch, Kafka, Azure Databricks Tableau, Power BI, MS Excel, Matplotlib, Seaborn Git, Docker, MLflow, Great Expectations, Data Warehousing, Data Modeling, ETL/ELT Data Mining, CI/CD
Certifications	
Microsoft Azure AI Essentials
