PROFILE

Data Analyst with 2+ years of experience in data analytics, business intelligence, and cloud-based data solutions. Skilled in SQL, Python, and advanced data visualization (Power BI, Tableau) to deliver insights that drive business strategy and compliance reporting. Experienced in building ETL pipelines, data warehouses, and predictive models for marketing, finance, and regulatory domains. Adept at data governance, automation, and KPI reporting to improve decision-making, reduce risks, and optimize operations.

SKILLS

Programming: SQL, Python, R, MATLAB, Matplotlib	BI & Visualization: Tableau, Power BI, QlikView, SSRS, SSAS, Excel (pivot, VBA)	Databases: Oracle, MS SQL Server, MySQL, PostgreSQL, IBM DB2
Machine Learning and AI: CNN model design, model optimization, deep learning framework	Data Quality & Modeling: Data Profiling, Cleansing, Standardization, Lineage, Star/Snowflake Schema, OLAP Cubes, Erwin, Power Designer	Collaboration & DevOps: Git, JIRA, Confluence, ServiceNow
ETL & Data Integration: SSIS, Informatica, Alteryx, Talend, SQL Loader	Cloud & Platforms: Azure, AWS, GCP, SharePoint	Operating Systems: Windows, Linux, UNIX

WORK EXPERIENCE

Velor Pathway's, USA Data Analyst	Jan 2025 - Current
- Designed and optimized ETL workflows (SSIS, Informatica) to integrate large compliance and regulatory datasets into enterprise data warehouse, improving pipeline performance by 30%. - Developed Power BI dashboards with advanced DAX, drill-through, and row-level security; enabled compliance officers to monitor KPIs and reduced audit cycle time by 40%. - Performed SQL-based data audits and validation checks (outliers, duplicates, missing values) to ensure high-quality data for regulatory and risk monitoring reports. - Partnered with compliance teams to refine sanction screening models, leveraging data profiling, root-cause analysis, and threshold optimization, reducing false positives by 15%. - Built and maintained data lineage and governance documentation, supporting regulatory compliance and transparency in data flows. - Assisted in cloud migration projects (AWS & Azure), including migrating on-prem SQL workloads to cloud databases for faster query performance and scalability. - Collaborated in Agile ceremonies with cross-functional stakeholders to gather reporting requirements and deliver sprint-based analytics solutions.	
Mphasis, Hyderabad, India Data Analyst	Aug 2021 - Jul 2023
- Built interactive Tableau dashboards with parameters, LOD calculations, and KPI scorecards for marketing ROI, customer segmentation, and churn prediction. - Automated data integration pipelines using Talend/Alteryx and Python (Pandas, NumPy), consolidating structured and semi-structured data into a unified data lake. - Designed and implemented dimensional data models (star/snowflake schema) and OLAP cubes in SSAS to accelerate reporting and reduce ad-hoc SQL queries by 35%. - Conducted SQL performance tuning (partitioning, indexing, CTEs, window functions), reducing report generation time by 30% on datasets exceeding 200M+ rows. - Delivered predictive analytics solutions using Python/R (Scikit-learn, TensorFlow) for churn modeling, customer retention, and forecasting sales trends. - Applied data governance best practices by cleansing, deduplicating, and standardizing data, improving customer master accuracy by 20%. - Collaborated with product, finance, and business teams to define KPIs, reporting frameworks, and visualization standards for enterprise-wide adoption. - Supported API-based data ingestion and warehouse integration, reducing reporting delays by 2 days and enabling near real-time analytics.	

EDUCATION

Master's in Software Engineering Cleveland State University Cleveland, OH	Aug 2023 - May 2025
Bachelor's in Computer Engineering Swarnim Startup & Innovation University Gandhinagar, Gujarat	Jun 2019 - Jul 2022
