SKILLS

Business Intelligence & Data Analysis: Microsoft Power BI, Excel, Python (Pandas, NumPy), SQL Server

CRM & Workflow Tools: Salesforce, PEGA, ServiceNow

SDLC, Testing & QA Expertise: Functional Testing, Regression Testing, Agile (Scrum, Kanban), Jira

PROJECTS

Mortgage Trading Analysis (Power BI)

- Analyzed 5,000+ mortgage and market data points to identify optimal trading decisions (Whole Loan vs. Securitization), improving profitability and operational efficiency.
- Built advanced Power Query transformations and DAX measures to automate financial risk assessments (e.g., weighted LTV/DTI).
- Drove process improvement by uncovering \$15.1M in additional revenue and achieving a 7.07% weighted profit margin—exceeding the 5% target and reducing trading inefficiencies.

Net Revenue Management Analysis (Excel)

- Conducted in-depth pricing, packaging, and promotion analysis for a fast-moving consumer goods (FMCG) company to improve revenue and market performance.
- Managed and cleansed large datasets to ensure accuracy and consistency, using Excel pivot tables, charts, nested IF formulas, and lookups for actionable insights.
- Identified high-performing product categories and optimized promotions, directly contributing to over \$600K in incremental annual revenue.

YouTube Influencer Marketing Analysis (SQL Server + Power BI + Excel)

- Used SQL to clean and transform raw performance data (~100K+ rows) from Kaggle, enabling reliable downstream analysis.
- Designed and delivered a dynamic Power BI dashboard with DAX metrics to assess influencer ROI, subscriber engagement, and brand alignment.
- Recommended high-impact partnerships (e.g., Dan Rhodes, estimated \$1M net profit per campaign), improving marketing decision-making and reducing budget waste.

EXPERIENCE

Business Analyst, Accenture (Dell EMC)

Notification as a Service Platform in a Salesforce and Pega Environment

April 2018 – September 2018

- Led analysis and design of scalable communication workflows by configuring inputs that triggered real-time, rule-based customer notifications—improving system responsiveness and reducing manual intervention.
- Authored and maintained detailed functional documentation (FRDs, JIRA stories, API specs), ensuring consistency in training and execution across teams.
- Reduced system integration rework by 70% through precise documentation and data mapping of API payloads.
- Collaborated with cross-functional teams to continuously improve platform logic and communication efficiency, aligning technology outputs with customer and business needs.

Quality Assurance Analyst, Accenture (Dell EMC)

S-360 & Pega Integration

May 2016 – March 2018

- Designed regression and scenario-based test suites to validate critical business rules in high-volume systems (15K+ SR creations and 50K+ updates), supporting a seamless transition during enterprise-wide platform changes.
- Maintained structured test documentation and issue logs, providing traceability and enabling continuous performance monitoring.
- Contributed to solution validation for enterprise-scale notification enhancements, ensuring consistent data processing and accurate rule execution across legacy and new systems.

EDUCATION

Certified Professional Scrum Master (PSM-1) from Scrum.Org

May 2025

Data Camp Certifications

January 2024 – July 2025

- **Power BI:** Data Analyst in Power BI, Power BI Fundamentals
- **Data Engineering:** Associate Data Engineer in SQL (Intro to Snowflake, Data Warehousing Concepts)
- **Fundamental Certifications:** Excel, ChatGPT (Prompt Engineering), Python
- **Courses:** Intro to Git

Bachelor of Engineering, Computer Science

August 2012 – May 2016

Sri Krishna College of Engineering and Technology, Tamil Nadu, India
