Professional Summary

- Expertise in architecting, designing, developing, testing, and maintaining secure, scalable, high-performance applications using C#, .NET Core/ASP.NET Core, Entity Framework Core, and RESTful APIs.
- Proficient in building interactive and responsive UIs using Angular, React, Blazor, and Razor Pages, ensuring seamless user experiences across devices.
- Strong expertise in integrating external systems and APIs using OAuth2, OpenID Connect, and industry-standard security practices for authentication and data protection.
- Skilled in database design and optimization, including schema refinement, indexing, and performance tuning for complex queries in SQL Server.
- Hands-on experience in Azure cloud services such as App Services, Azure Functions, Azure SQL Database, Key Vault, and Service Bus, along with Docker and Kubernetes for containerized deployments.

Core Skills

- **Backend & Frontend:** C#, ASP.NET, .NET Core, jQuery, XML, T-SQL, MVC, Web API, VB.NET, Python, Node.js, Angular, React, Blazor, Razor Pages, TypeScript, JavaScript, HTML, CSS
- **Databases:** SQL Server, PL/SQL, MongoDB, SSRS, SSIS, Schema Design, Indexing, Query Optimization
- **Cloud & DevOps:** Azure (Functions, Blob Storage, App Services, Event Grid, Service Bus, AKS, Key Vault), AWS, Kubernetes, Docker, Terraform, Bicep, CI/CD (Azure DevOps, GitHub Actions, Jenkins).
- **API & Security:** RESTful APIs, OAuth2, OpenID Connect, Swagger/OpenAPI, JSON, Secure Coding Practices
- **Architecture & Patterns:** Microservices Architecture, Event-driven Patterns, Redis Caching, gRPC, GraphQL
- **Collaboration & Tools:** GitHub, TFS, SVN, Visual Studio, Azure DevOps, Ansible, Agile/Scrum

Professional Experience

Software Developer with .NET – Indeed, USA

Aug 2023 – Present

- Led the complete software development lifecycle, including design, coding, testing, deployment, and maintenance of enterprise-grade .NET Core and Azure-based applications.
- Integrated AI-powered features into .NET applications to improve user experience, search accuracy, and decision-making.
- Used Azure AI services and OpenAI APIs to build intelligent workflows such as text analysis, recommendations, and automation.
- Built rich, dynamic, and modular UI components using Angular (v16+), Angular CLI, and Vue.js, ensuring efficient builds, lazy loading, and optimized bundle performance.
- Integrated Web APIs with frontend applications (Angular) and third-party systems.
- Created responsive, cross-browser front-end interfaces using Angular, HTML5, CSS3, and JavaScript, adhering to WCAG 2.1 accessibility standards and pixel-perfect design accuracy.
- Developed reusable Angular modules and shared components with Angular CLI to enhance scalability and maintainability across multiple projects.
- Used Azure App Services, Azure Functions, and Logic Apps to automate workflows and integrate external APIs.
- Implemented Azure API Management for API versioning, throttling, authentication, and monitoring across distributed microservices.
- Applied AI-driven logging and monitoring to identify performance issues and reduce production incidents.
- Integrated Azure Service Bus and Event Grid for reliable event-driven messaging and asynchronous background task execution.

- Designed and optimized data access layers using Entity Framework Core and LINQ, ensuring seamless integration with SQL Server, Cosmos DB, and MongoDB.
- Developed stored procedures, triggers, and views to improve data performance and consistency across enterprise applications.
- Designed and developed secure RESTful and SOAP APIs using ASP.NET Core, .NET 8, and C# for efficient communication across distributed systems.
- Experienced working with advanced C# features such as async/await, dependency injection, LINQ, and generics for cleaner, reusable, and efficient codebases.
- Deployed and managed containerized applications using Azure Kubernetes Service (AKS) and Docker, ensuring scalability, redundancy, and high availability.
- Automated CI/CD pipelines using Azure DevOps and GitHub Actions, creating YAML-based workflows for multi-environment build and deployment.
- Scheduled SSIS jobs and SSRS report execution using SQL Server Agent for automated data refresh.
- Utilized NUnit and XUnit frameworks for unit and integration testing, ensuring code stability and reliability.
- Managed version control and branching strategies using Git, enforcing pull requests, and peer code reviews.

.NET Developer – DXC Technology, India.

May 2019 – Nov 2021

- Streamlined business workflows by developing reusable service layers and optimizing the application lifecycle through design pattern implementation, API version management, and continuous performance enhancement.
- Engineered modern front-end applications using Angular (v15) and Vue.js, integrating Reactive Forms, state management with NgRx, and dynamic API binding for data-driven interfaces.
- Designed responsive, cross-browser layouts using HTML5, CSS3 (Flexbox, Grid), and JavaScript (ES6+), ensuring seamless functionality across web and mobile platforms.
- Designed and implemented Blazor Server and Blazor Web Assembly components to provide real-time user interactivity with minimal page reloads.
- Configured Azure Key Vault and Managed Identities for credential management and application configuration.
- Developed cloud-hosted APIs and deployed microservices via Azure Kubernetes Service (AKS), improving horizontal scalability and deployment automation.
- Developed and optimized PL/SQL stored procedures, triggers, and functions for transactional integrity, performance tuning, and complex data processing.
- Built and maintained backend microservices in C# and ASP.NET Core, delivering secure SOAP and RESTful APIs for integration with internal systems and external third-party clients.
- Implemented JWT-based authentication, role-based access control, and custom middleware for API security and governance.
- Developed and automated SSRS reports and SSIS ETL packages to extract, transform, and load large datasets from multiple sources into Azure SQL and on-prem databases, delivering real-time analytical dashboards and business intelligence visualizations for operational insights.
- Integrated SonarQube for code quality checks, Postman/Newman for API testing, and terraform for consistent infrastructure provisioning.
- Managed deployment, security, and maintenance of SSIS packages and SSRS reports in enterprise environments.

Certifications

Microsoft Certified Azure Developer Associate

AWS Certified Developer Associate

Education

Master of Science in Computer Science – Texas Tech University, TX, USA, 2023

Bachelor of Technology in Computer Science – Narasaraopet Engineering College, India, 2019
