EDUCATION

Bachelor in Computer Information Systems Minor in BBA, California State University Chico	May 2025
GPA – 3.6, Cum Laude	
Associate degree in Natural Science: <i>Math and Technology Emphasis</i>, Ohlone Community College, Fremont, CA	July 2022
GPA – 3.7, With Highest Honors	
Certificate in Advanced Computing (IT) of Australia, Guru Nanak Institute of IT, Delhi, India	July 2019

SKILLS

Languages: Python, SQL, C++, JavaScript, Dart, HTML, CSS, R.

Tools: Django, Flutter, Bootstrap, Tableau, Power BI, Salesforce, Linux, Windows, macOS, Microsoft Office, Google Workspace, scikit-learn, Pandas, NumPy, Matplotlib, Hadoop, Git, Git Hub, TensorFlow, PyTorch, plotly, Seaborn, Keras

Technical: Machine Learning, Artificial Intelligence, Reinforcement Learning, Data Modeling, Data Visualization, Data Management

WORK EXPERIENCE

Data Science Intern SupplyOnyx New Castle, Delaware, US	February 2025 – Present
- Engineered Python/SQL ETL pipelines that ingested and cleaned 2 M+ daily supply-chain records from ERP and API sources, cutting data-prep time 70 % and delivering 99 % accurate feeds for analytics. - Built and validated forecasting models (scikit-learn regression & classification) to predict demand swings and supply-risk events, improving early-warning precision by 15 %. - Designed Tableau/Power BI dashboards for inventory, lead-time variance, and fulfillment KPIs, collaborating with product leadership to embed these insights into SupplyOnyx’s AI assistant roadmap.	
Data & Systems Analyst Community Legal Information Clinic Chico, USA	September 2024 – May 2025
- Provided technical support by troubleshooting software, hardware, and office systems (printers, scanners, communication networks), ensuring minimal downtime and smooth daily operations. - Automated and streamlined data management by building custom scripts and implementing data validation in Excel and Google Sheets, reducing administrative workload by 50% and data errors by 30%. - Managed digital workflows by administering attendance tracking for 100+ users and optimizing digital forms, cutting manual processing time by 60% and improving record accuracy and accessibility.	
Data Analyst Guru Nanak Institute of IT Delhi, India	October 2018 - December 2019
- Analyzed and managed 5K+ student records using SQL and Python (Pandas, NumPy), uncovering trends and reducing data entry errors by 35 %, which led to an 8 % increase in average pass rates. - Created impactful data visualizations with Tableau, Power BI, and Matplotlib to highlight student engagement, resource usage, and academic performance trends, driving a 20 % increase in timely faculty interventions. - Designed and implemented predictive models in scikit-learn to forecast enrollment and attendance behaviors, achieving 80 % accuracy and enabling 15 % more efficient resource allocation.	

PROJECTS

Diabetes Predictor (Python) GitHub	Sept - Nov 2024
- Developed a web application to predict the likelihood of type 2 diabetes using machine learning (LightGBM). - Built a robust backend in Django and integrated a LightGBM model for accurate predictions. - Designed a user-friendly frontend with HTML, CSS, and JavaScript and hosted the application on PythonAnywhere.	
MediMate (Flutter) GitHub	March - May 2024
- Designed and developed Mobile app to provide the general information about diseases and drugs. - Integrated location services to help users find nearby pharmacies and hospitals using the Google Maps API. - Built an intuitive interface for users to easily search for health conditions, medications, and nearby Pharmacies.	
Smart Traffic Light Simulation with Reinforcement Learning (C++/Python) GitHub	March - May 2023
- Built a real-time 4-way traffic simulation in C++/SFML with adaptive Q-learning-based light control, using object-oriented design, JSON Q-table storage, and a Python-based training pipeline. - Optimized traffic flow by dynamically adjusting green light durations based on real-time congestion. Integrated an interactive GUI for vehicle spawn control, reducing wait times and improving adaptive response.	

CERTIFICATIONS

TATA GenAI Data Analytics – Applied AI-driven analytics by performing exploratory data analysis, building predictive delinquency models, and designing data-informed collection strategies using GenAI tools for financial services.	June 2025
Dean’s List, CSU Chico – Recognized for academic excellence with a GPA above 3.5.	May 2024 & 2023
Microsoft Excel Level 3 “Purple Belt” - Demonstrated advanced data-analytics skills in Excel: (SUMIFS, INDEX/MATCH), PivotTables, scenario modelling, Solver, and VBA macros for automating and analyzing large datasets.	May 2023
