

Raghavendra Dubey

Software Engineer

Location: CA | Mobile: 562-739-5359 | Email: raghavendrad.2025@gmail.com | [Portfolio](#) | [LinkedIn](#)

SUMMARY

Software Engineer with 3+ years of experience specializing in Java-based development, designing scalable microservices, and optimizing high-performance systems. Expert in leveraging Java 8+, Spring Boot, and cloud-native technologies (AWS, Docker, Kubernetes) to deliver robust solutions, reducing latency by up to 35% and deployment times by 50%. Achieved 99.9% uptime for systems handling 1M+ daily transactions and improved test coverage to 90%+, cutting production bugs by 35%.

SKILLS

Methodologies & SDLC: Agile, Scrum, Kanban, SDLC, Waterfall, TDD (Test-Driven Development)
Programming Languages: Java (Core Java, Java 8/11/17), Python, SQL, JavaScript, TypeScript
Frameworks & Technologies: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, JUnit, Mockito, Microservices, Apache Kafka, Struts
Databases & Storage: MySQL, PostgreSQL, MongoDB, Oracle DB, AWS (S3, RDS, DynamoDB), Redis, Elasticsearch
Cloud & DevOps: AWS (EC2, Lambda, ECS, CloudFormation), Azure, GCP, Docker, Kubernetes, Jenkins, Git, Terraform, Ansible
Web Development & APIs: HTML5, CSS3, React, Angular, Node.js, RESTful APIs, GraphQL, SOAP
Tools & IDEs: IntelliJ IDEA, Eclipse, VS Code, Maven, Gradle, Apache Tomcat, Postman, Splunk
Additional Skills: Multithreading, Concurrency, Design Patterns (Singleton, Factory, Observer), Performance Tuning, Security Best Practices

EXPERIENCE

DXC Technology, CA | July 2024 - Current | Software Engineer

- Developed and maintained enterprise-level applications using Core Java and Java 8, implementing multithreading and concurrency to enhance application performance by 20% and scalability for 500+ users.
- Designed and implemented RESTful APIs using Spring Boot and Spring MVC, ensuring seamless integration with front-end systems and third-party services.
- Utilized MySQL and Hibernate for efficient database management, optimizing complex queries to improve data retrieval times by 30%.
- Employed JUnit and Mockito for Test-Driven Development (TDD), achieving 90%+ code coverage and reducing production bugs by 35%.
- Configured and managed Apache Tomcat for application deployment, ensuring 99.9% high availability for 1M+ daily transactions.
- Leveraged Maven for dependency management and build automation, streamlining development workflows by 25%.

Virtual Infotech Solution, India | April 2020 – Dec 2022 | Software Engineer

- Built scalable microservices using Java 11 and Spring Security, implementing secure authentication and authorization for 300+ users.
- Developed real-time data processing pipelines with Apache Kafka, handling high-throughput event streams for 10,000+ daily events.
- Managed and optimized PostgreSQL and MongoDB databases, designing schemas and indexing strategies to support 50% faster query performance.
- Deployed containerized applications using Docker and Kubernetes on AWS ECS, improving deployment efficiency by 40%.
- Automated infrastructure provisioning with Terraform and AWS CloudFormation, reducing setup time by 40% for 20+ development environments.
- Created dynamic front-end interfaces using React and JavaScript, integrating with GraphQL APIs for 30% faster data rendering.
- Utilized Jenkins and GitHub Actions for CI/CD pipelines, enabling 50% faster and reliable code deployments to production.
- Conducted performance tuning and monitoring using Splunk, resolving bottlenecks to improve application performance by 15%.

EDUCATION

Master of Science in Computer Science California State University, Long Beach Long Beach, CA	Dec 2024
Bachelor of Technology in Computer Science Kalinga Institute of Industrial Technology India	July 2021
