

RAGHAVIREDDY KONDAM

Dallas, TX, USA | +1(945) 400-5346 | raghavireddy.kondam@aogjob.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Product and Data Analyst with over 3+ years of experience driving data-informed decisions through stakeholder collaboration, A/B testing, and performance reporting. Skilled in SQL, Python, Tableau, and Google BigQuery to deliver real-time insights, automate reporting, and support strategic product development. Proven track record of enhancing business outcomes by aligning analytics with cross-functional goals across global teams.

EDUCATION

Master of Science in Data Analytics

University of North Texas

January 2023 – December 2024

PROFESSIONAL EXPERIENCE

PTC

Remote, USA

Product Analyst

March 2024 – Present

- **Led stakeholder meetings** with product, marketing, and business teams to gather requirements, present data insights, and ensure alignment with business goals, driving **data-driven decision-making**.
- **Developed and presented A/B test results** using **Tableau**, offering insights into audience segmentation, traffic patterns, and product feature success, enabling informed decisions on product improvements.
- **Designed and maintained key business metric dashboards** in **Tableau** and **Google Data Studio**, providing real-time updates on KPIs like conversion rates and user engagement for product and marketing teams.
- **Conducted ad-hoc data analysis** with **SQL** and **Python** to answer stakeholder queries, providing timely insights on product performance and customer metrics.
- **Automated reporting workflows** to enhance the speed and accuracy of data delivery, reducing manual effort and improving key performance tracking for stakeholders.
- **Collaborated with senior management** to provide forecasts and performance analysis reports, guiding long-term product strategy and supporting strategic planning through clear, **data-driven recommendations**.

Environment: SQL, Python, Google BigQuery, Tableau, Google Data Studio, Power BI, Agile, Jira, Confluence, Business Analysis, KPIs Reporting, A/B Test Reporting.

Version 1

Bengaluru, India

Data Analyst (Product)

January 2021 – December 2022

- **Facilitated cross-functional stakeholder meetings**, collaborating with product managers, business leads, and marketing teams to define **data analysis requirements** and align with business objectives, ensuring clear communication and delivery of insights.
- Created and maintained **interactive dashboards** using **Tableau** and **Power BI**, allowing stakeholders to visualize key business metrics like product adoption, conversion rates, and customer satisfaction, driving data-informed decisions.
- **Presented complex data insights to executive leadership**, translating analytics into actionable recommendations that shaped product development strategies and optimized the user experience.
- Collaborated with stakeholders to define success metrics for product launches and implemented **real-time reporting** solutions using **SQL** and **Google BigQuery**, offering immediate visibility into KPI performance.
- Analyzed large-scale datasets, extracting key trends, opportunities, and risks, and delivered insights to stakeholders across product, sales, and marketing teams, supporting strategic decision-making.
- Delivered periodic performance reports to **C-level stakeholders**, covering financial metrics, user engagement trends, and product growth, helping prioritize key areas for business development.
- **Automated routine reporting workflows** with **Google BigQuery** and **SQL**, reducing turnaround time for data insights and improving access to up-to-date performance metrics for stakeholders.

Environment: SQL, Python, Google BigQuery, Tableau, Google Data Studio, Power BI, Agile, Jira, Confluence, Data Reporting, KPI Analysis, Product Performance Dashboards.

TECHNICAL SKILLS

Methodologies:	Software Development Life Cycle (SDLC), Agile/ Scrum, Waterfall, SAFe
Language & Databases:	Python, SQL, R, MySQL, MS SQL Server
Python Packages:	Pandas, NumPy, Matplotlib, SciPy, Scikit-Learn, SeaBorn, PyTorch, ggplot2, Plotly
Data Analytics Skills:	Data Manipulation, Data Cleaning, Data Visualization, Data Analysis, Business Analysis
Others Skills:	Tableau, Power BI, QlikSense, QlikView, Visual Studio, Jupyter Notebook Advanced Excel, JMP, Visio, SAS, Confluence, JIRA, Trello, UAT, A/B Testing, Business Analysis, Kanban, VBA
Product & Analytics Tools:	Python, SQL, R, Google Analytics, Mixpanel, Amplitude, Pendo, Looker
Domain Knowledge:	User Behavior Analysis, Conversion Rate Optimization (CRO), Customer Journey Mapping

PROJECT

Customer Churn Prediction | Python, TensorFlow, Tableau, Excel, AWS SageMaker

- Developed a machine learning model to predict churn across OTT platforms. Created an interactive dashboard to present insights for non-technical stakeholders.
