EDUCATION

Hofstra University

Bachelor of Sciences in Computer Science and Cybersecurity

Masters in Computer Science - Networking and Security

Relevant Coursework

Ethical Hacking, Data Structures & Algorithms, Software Engineering, Operating Systems, Secure Networking

Hempstead, NY

December 2025

May 2026

GPA: 3.61

TECHNICAL SKILLS

Languages: Java, Python, C/C#/C++, PHP, Rust, Fs, SQL (Postgres), Dart, JavaScript, HTML/CSS, MASM

Cyber Security Tools: Kali Linux, Metasploit, WireShark, ReverseRaider, GDB, Nmap, TCPdump

Developer Tools: Git, Docker, Flutter, VS Code, Visual Studio, PyCharm, Vim, Linux

Libraries: Pandas, NumPy, Matplotlib, Sklearn

EXPERIENCE

Computer Science Tutor

Department of Computer Science at Hofstra University

January 2025 – Present

Hempstead, NY

- Assist 25+ students with python lab and provide step by step explanation
- Evaluate student Python, C++, and Java code, providing feedback to improve coding skills during weekly office hours

Student Technician

Maurice A. Deane School of Law at Hofstra University

October 2022 – Present

Hempstead, NY

- Resolved issues with Outlook, Virtual Machines, Network Environments, Printers, and Mobile Applications
- Managed, maintained, upgraded and re-imaged 50+ machines for faculty and administrators
- Trained and mentored 10+ technicians over 2 years, enhancing team skills and productivity
- Troubleshoot, fix and replace zoom equipment in all classrooms and lecture halls

EXTRACURRICULAR EXPERIENCE

Founder and President

Hofstra C.O.D.E at Hofstra University

September 2023 – May 2025

Hempstead, NY

- Led a team of 5 executive board members to manage club operations for over 100 active members
- Founded and grew the only independent, student-led computer science club to promote academic and professional excellence
- Secured over \$3000 in funding for a successful coding competitions, supporting event logistics and participant engagement

PROJECTS

AirSecure | Rouge Access Point Detection

September 2024 – May 2025

- Led a team of 4 in developing a hardware-based rogue access point detector using scanning tools for network analysis
- Implemented an RFC-based decision tree to flag unsafe networks, leveraging edge computing
- Served as Scrum Master, coordinating development, managing sprints, and ensuring project deadlines were met

Offensive Security and Exploit Development | Advanced Cybersecurity Techniques

September 2024 – December 2024

- Simulated replay attacks and developed custom Metasploit scripts to test and exploit system vulnerabilities
- Exploited command injection and SQL injection flaws to identify critical weaknesses in web applications
- Performed binary debugging of x86 assembly using GDB, enabling detailed analysis of program behavior and vulnerabilities
- Conducted memory and core-dump analysis to uncover root causes of system crashes and enhance debugging skills
- Explored varieties of buffer overflow techniques, including heap spray attacks, and implemented defense approaches to mitigate exploitation

phishNet | Phishing Detection Web Extension

February 2024 – May 2024

- Led a team of computer science students to successfully develop a sophisticated phishing detection extension
- Implemented an optimized RFC decision tree model with advanced text processing algorithms, achieving 87% accuracy and improving back-end efficiency
- Oversaw project development as a project manager, utilizing SDLC principles to ensure timely progression

Linux Management | Linux System Installation and Configuration

October 2023 – December 2023

- Installed and configured Linux systems, including Apache server and SSL certificates, to ensure secure web hosting
- Set up and managed LDAP server and Network File System(NFS) to enhance system authentication and file sharing
- Conducted system call tracing to analyze and optimize performance, ensuring secure and efficient operations
- Diagnosed and resolved network issues through advanced troubleshooting techniques, improving overall network reliability and security
