PROFILE

Proficient Data Analyst with expertise in SQL, Tableau, Power BI, and machine learning, with a Master's in IT from Arkansas Tech University, I bring extensive experience in data modeling and dashboard creation to drive growth and optimize processes. I am eager to leverage my strong technical skills and analytical mindset to take on new challenges and contribute to data-driven decision-making in future roles.

SKILLS

Data Visualization ♦ SQL ♦ Machine Learning ♦ Tableau ♦ Power BI ♦ Microsoft Report Builder ♦ Microsoft Visio ♦ Data Analysis ♦ JIRA

PROFESSIONAL EXPERIENCE

2023/08 – present
New York, United States

Data Analyst, Algorizin, Inc 📄

- Used **SQL** and **Power BI** to gather, clean, and analyze data, developing with **DAX** a content strategy that boosted social media engagement by 15% significantly.
- Created dashboards, including one based on a MakeoverMonday project where I identified issues in the original dashboard and improved it using **Tableau** and **Power BI**. I shared my findings in a **Medium blog**, highlighting how these improvements helped interpret data, identify trends, and contributed to an increase of 10% in customer retention.
- Analyzed flight delay data to identify key causes of delays, such as weather conditions and carrier issues. Based on the findings, actionable recommendations that helped airlines improve on-time performance, leading to a **6%** customer satisfaction.
- Completed online projects focused on advanced SQL concepts, including complex joins, aggregations, and subqueries. Strengthened my understanding of database management, data modeling, and query optimization, enhancing my ability to analyze and report data more effectively.
- Collaborated with *cross-functional* teams in **ClickUp** to gather business requirements and align data solutions by developing interactive dashboards, such as those in my Tableau portfolio. These dashboards replaced ad-hoc analyses, providing real-time insights and reducing reporting time by 40%.
- Strengthened foundational skills in data visualization and business intelligence by working on personal projects, deepening my knowledge of industry best practices and ensuring the timely adoption of new features in Power BI and Tableau.

2022/06 – 2024/05
Russellville, United States

Graduate Assistant, Arkansas Tech University 📄

- Arrange orientation, organize, and budget international events, customer service, *Canva design, Banner updates*.
- Led a project using **Power BI** to analyze international student data at ATU, generating reports and charts for showing the **80%** decreased number of International students from **Kingdom of Saudi Arabia**.

2023/05 – 2023/08
Conway, United States

Full Stack Developer Intern, Gainwell Technologies 📄

- Worked on Early Intervention System utilizing **.NET, SQL, and SSRS** for administering Medicaid Part C for 5 States.
- Created SQL statements; updated reports in **SSRS**; peer code reviews.
- Peer reviewed others' work for compliance with requirements on **JIRA** Tickets

EDUCATION

2022/08 – 2024/05
Russellville, United States

Master of Applied Science in Information Technology, Arkansas Tech University 📄

- GPA: 3.92. Coursework: **Database Systems**, Web-based Info Systems, **Data Science**, Networks, Systems Analysis & Design.
- Expertise: Database Dev/Admin, Web Development, Emerging IT Trends.
- Earned Graduate Certificate in Information Technology concurrently with Master's.
- Completed capstone Internship, applying academic knowledge to real-world IT challenges.

CERTIFICATES

Analyze Data to Answer Questions 📄 — Google Coursera | **Data Everywhere** 📄 — Google Coursera | **Prepare Data Exploration** 📄 — Google Coursera | **Process Data from Dirty to Clean** 📄 — Google Coursera | **Share Data Through the Art of Visualization** 📄 — Google Coursera | **Technical Support Fundamentals** 📄 — Google Coursera

PROJECTS

2024

Breast Cancer Classification with Machine Learning, Arkansas Tech University 📄

- Developed a model using **Support Vector Machine (SVM)** on the Wisconsin Breast Cancer dataset to classify benign and malignant tumors. Compared SVM with **K-Nearest Neighbors (KNN)** and **Naive Bayes (NB)**, achieving **16%** accuracy through hyperparameter tuning. Improved diagnostic accuracy with feature selection and kernel optimization.

2023

Occluded Traffic Sign Detection with (YOLOV3) Convolutional Neural Networks, Arkansas Tech University

- Built a traffic sign detection system using **YOLOv3** to accurately detect occluded signs, achieving **100% accuracy** on test images. This project improves real-time object detection for intelligent transportation systems and self-driving vehicles.

2017

Research on Characteristics of Female Directors of Public Limited Companies in Bangladesh,

Ahsanullah University of Science and Technology

- Analyzed gender diversity in **leadership** roles within Bangladesh's financial sector, revealing *women hold only 1%* of director positions, mostly in non-executive roles and often appointed through family connections. Recommended strategies to reduce bias and improve gender equity in corporate leadership.
