✉ [gudalarahul97@gmail.com](mailto:gudalarahul97@gmail.com)    ☎ 6696667202    📍 Fremont, CA 94538    [in linkedin.com/in/rahulgudala](https://www.linkedin.com/in/rahulgudala)

## PROFESSIONAL SUMMARY

---

Results-driven Software engineer with knowledge of contemporary development frameworks, Python, and JavaScript. skilled in creating and putting into practice scalable, effective solutions that enhance user experience and application performance. An experience of working well in agile teams, optimizing code for maintainability, and participating in initiatives that have a quantifiable business benefit. enthusiastic about using excellent problem-solving abilities to develop modern software.

## EXPERIENCE

---

**Software Engineer, Virtusa, Hyderabad, India**

08/2020 – 08/2023

Client: Google

- Boosted application performance by troubleshooting and resolving complex issues using Python and JavaScript, improving runtime efficiency by 30%.
- Developed desktop and mobile applications using React, Node.js, and Django, delivering scalable and maintainable solutions.
- Optimized codebase through refactoring and peer code reviews, enhancing readability, modularity, and system performance.
- Ensured software quality with unit, integration, and functional testing, reducing post-deployment bugs.
- Collaborated with cross-functional teams in an Agile/Scrum environment, meeting tight project deadlines consistently.
- Reduced development time by implementing automation scripts and reusable components across projects.
- Mentored and trained a team of 15 engineers on framework best practices, coding standards, and workflow optimization, improving overall team productivity.
- Integrated APIs, third-party libraries, and performance monitoring tools to enhance application functionality and reliability.
- Conducted data analysis and performance profiling to identify bottlenecks and enhance application scalability.
- Implemented asynchronous programming and caching strategies to enhance backend throughput and reduce server response time by 20%.

## EDUCATION

---

**Master of Science, Computer Science in Software Engineering,**

08/2023 – 05/2025

*Concordia University Wisconsin, Milwaukee, WI*

- GPA 3.6

## SKILLS

---

### Analytical problem-solving

#### Proficient Languages

Python, JavaScript

#### Skilled in multiple programming languages

Java, JavaScript, C++, Python, HTML, and CSS

#### API

Postman

#### Cloud Services

AWS, Azure

#### Frameworks

React, Node, Express

### Proficient in object-oriented programming

#### Methodologies

Agile, Scrum

#### Database

DBMS, MongoDB, SQL

#### Software development

Mobile, Web Applications

#### Software testing

Automation & API

## ACHIVEMENTS

---

**Completed a project in "DRDL(DRDO)" Hyderabad for a period of three months.**

**Lead a team for the Google iO Project**

**Worked as a crucial team member for a project in Google.**

**Completed AI Research as a part of the Master's Degree**

## ACADEMIC PROJECTS

---

### **Christian Verse Web Application**, *Master's Course Project - RESTful API & Integration*

- Designed and developed a fully functional web application to retrieve and display Bible verses dynamically using RESTful APIs.
- Utilized JavaScript for backend logic, MongoDB for data storage, and Postman for API development, testing, and integration workflows.
- Built the frontend with HTML and CSS, ensuring a responsive and clean user interface.
- Implemented efficient data retrieval and search functionality to allow users to query and view different Bible verses.
- Demonstrated proficiency in full-stack web development and REST API design, aligning with course objectives and real-world integration practices.

### **Student Scoop - Mobile App Prototype**, *Master's Project - User Experience Design*

- Designed a ride-sharing and event coordination app for college students, inspired by platforms like Scoop.
- Created multi-page interactive prototypes using Axure RP 10 with a focus on intuitive navigation and clean UI.
- Simulated user flows with JavaScript and implemented user-centered design through wireframing and usability testing.
- Applied mobile-first design principles and demonstrated practical UX strategy and prototyping skills.

### **1:4 Patch Antenna Array for Telemetry**, *Research Project - DRDO, Hyderabad*

- Designed and simulated a 1: patch antenna array using HFSS to enhance real-time telemetry and data reception for missile systems.
- Improved antenna performance in terms of gain, bandwidth, and signal reliability for remote object tracking.
- Collaborated with DRDO experts, gaining hands-on experience in RF systems and defense-grade antenna design.
