

Rahul Hatkar

Data analyst

Location: USA | Phone: 314-527-0913 | Email: RAHULHATKAR25@GMAIL.COM | [LinkedIn](#)

SUMMARY

- Over 3 years of professional experience in data analysis, leveraging data to deliver actionable insights and improve decision-making.
- Proficient in Python and SQL for data manipulation, analysis, and building predictive models to forecast key business metrics.
- Skilled in creating interactive and automated dashboards using Power BI and Tableau, enhancing data accessibility and reducing manual reporting.
- Expertise in ETL workflows using tools like Alteryx, Talend, and Apache Airflow for efficient data integration and processing.
- Hands-on experience with cloud platforms such as AWS (Redshift, DynamoDB, S3) and data warehousing solutions like Snowflake to optimize storage and query performance.
- Strong knowledge of statistical analysis, machine learning techniques (e.g., regression, decision trees, random forests), and A/B testing to derive business insights.
- Adept at data visualization and storytelling, enabling stakeholders to make informed decisions using real-time insights.
- Experienced in collaborating within Agile (Scrum) environments, delivering high-quality projects under tight deadlines while ensuring seamless team coordination.

SKILLS

- **Programming Languages:** Python, SQL
- **Databases & Data Warehouses:** PostgreSQL, SQL Server, MySQL, Snowflake, Teradata, BigQuery
- **Data Visualization:** Power BI, Tableau, Advanced Excel
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Plotly, Seaborn, Streamlit, FastAPI
- **Data Engineering:** Alteryx, Talend, Informatica, Apache Airflow, dbt
- **Cloud Platforms:** AWS (Redshift, DynamoDB, S3, Athena, Lambda)
- **Methodologies:** SDLC, Agile (Scrum), Waterfall
- **Version Control:** Git, GitHub
- **ML Techniques:** Regression, KNN, Decision Tree, Naive Bayes, Random Forest
- **Healthcare Tools & Technologies:** HIPAA, EMR, HER
- **Analytical Skills:** Data Mining, Data Cleansing, Statistical Analysis, Data Visualization, Text Mining, ETL, Data Wrangling, Data Warehousing, Time Series Analysis, A/B Testing, SAP, SAS

WORK EXPERIENCE

CVS Health

July 2024 – December 2024

Data Analyst (Intern)

- Conducted data mining and statistical analysis to support healthcare analytics initiatives.
- Developed interactive Tableau dashboards to visualize patient data and identify cost-saving opportunities.
- Utilized AWS Redshift to manage and query large healthcare datasets effectively.
- Designed and implemented Python scripts for automated data pipelines, streamlining data ingestion processes.
- Performed text mining and sentiment analysis on customer feedback to improve service delivery.
- Collaborated with business stakeholders to translate analytical insights into actionable strategies.

Infosys BPM

January 2021 – April 2023

Data Analyst

- Analyzed large datasets using Python and SQL to identify trends and deliver actionable insights to clients.
- Created automated Power BI dashboards, reducing manual reporting time by 20 hours per week.
- Designed and maintained ETL workflows using Talend and Apache Airflow for efficient data processing.
- Conducted data cleansing and wrangling, ensuring data quality and reliability for downstream analysis.
- Collaborated with cross-functional teams in an Agile environment to improve project delivery timelines.
- Developed predictive models using regression and random forest techniques to forecast key business metrics.

- Migrated legacy data systems to Snowflake, optimizing query performance and storage efficiency.
- Performed statistical analysis to evaluate A/B testing results and improve marketing strategies.

PROJECTS

Customer Retention Prediction Model

Skills: Python, Pandas, Scikit-learn, Power BI

- Built a predictive model using logistic regression to identify customers likely to churn, enabling proactive retention strategies.
- Developed Power BI dashboards to present actionable insights to business stakeholders.

Sales Performance Analysis

Skills: Tableau, SQL, AWS Redshift

- Conducted a comprehensive analysis of sales performance, identifying key trends across regions and products.
- Created Tableau dashboards integrated with AWS Redshift to provide real-time updates for leadership teams.

Healthcare Data Quality Assurance

Skills: Alteryx, Snowflake, Python

- Designed ETL workflows in Alteryx to improve the quality and integrity of patient data stored in Snowflake.
- Automated error detection scripts using Python, reducing manual data review by 30%.

Customer Sentiment Analysis

Skills: Text Mining, Seaborn, Python

- Performed text mining on customer reviews to classify sentiment and improve user experience strategies.
- Visualized sentiment trends over time using Seaborn for effective communication with the marketing team.

EDUCATION

Webster University, Saint Louis, MO

May 2023 – Dec 2024

Master of Arts in Information Technology and Management

Kakatiya Institute of Technology and Science, Telangana, India

Aug 2018 – May 2022

Bachelor’s in Mechanical Engineering
