Professional Summary

Analytical and results-driven **Data Analyst** with expertise in **SQL**, **Python**, and business intelligence tools. Skilled in building data pipelines, designing dashboards, and applying statistical and machine learning methods to solve business problems. Experienced in transforming raw data into actionable insights and communicating findings to both technical and non-technical audiences.

Core Skills

Programming & Querying: SQL, Python (Pandas, NumPy, scikit-learn), R

Visualization & BI: Tableau, Power BI, Excel (Pivot, Power Query), Looker Studio

Databases & Modeling: MySQL, PostgreSQL, Data Warehousing, ER Modeling

Data Engineering: ETL Pipelines, AWS (S3, Glue, Redshift), Git, Flask

Statistics & ML: Regression, Classification, Sentiment Analysis, Hypothesis Testing, Forecasting

Other Tools: Jupyter, VS Code, GitHub, Advanced Excel

Experience

Data Analyst

AVJ Solutions, TX

Aug 2025 – Sep 2025

- Owned end-to-end reporting for product and operations: SQL data modeling (CTEs, window functions), reusable datasets, and KPI pipelines.
- Designed Power BI/Tableau dashboards with trend, cohort, funnel, and variance analysis; implemented row-level security and scheduled refreshes.
- Automated Python-based data quality checks (null/range/referential) to reduce reporting errors and alert anomalies.
- Defined metrics, data dictionary, SLAs, and lineage with stakeholders; drove dashboard adoption and documentation.
- Optimized heavy queries via indexing/partitioning; tuned refresh/extract strategies for efficiency.

Data Analyst — Capstone Project

Twitter/X Political Bias Analytics

2025

- Gathered & cleaned 100K+ tweets from APIs; performed validation and de-duplication before analysis.
- Engineered features and trained Logistic Regression and BERT models achieving 92% F1-score; created trend and KPI dashboards.
- Built interactive Tableau dashboards for stakeholders; documented data dictionaries and pipeline steps for reproducibility.
- Automated recurring data pulls and dashboard refreshes with Python & SQL pipelines.

Projects

Business Intelligence Analyst — Student Information System

2022

- Designed a MySQL data model for 1,500+ student records; defined KPI reports (enrollment, performance, retention).
- Tuned SQL (indexes, CTEs) to improve response time by 60%; created Power BI/Excel dashboards for admin decisions.
- Implemented reconciliation checks and authored lightweight documentation.

Data Analyst — Social Distance Monitoring (Computer Vision)

2022

- Applied OpenCV & YOLOv3 to real-time video streams (30 FPS) to detect distancing violations.
- Aggregated outputs to heatmaps and Tableau visuals for operational insights; validated detections against manual samples.
- Automated preprocessing, inference, and reporting with Python pipelines.

Education

University of North Texas, Denton, TX
M.S. in Data Science

May 2025

Vaagdevi College of Engineering, Warangal, India
B.Tech in Computer Science

2018 – 2022

Certifications

Microsoft Certified: Azure Data Scientist Associate (DP-100)
Data Science & Machine Learning in Python — Udemy
CCNAv7: Introduction to Networks — Cisco
Web Developer Certification — GoDaddy
