

RAHUL MISTRY

12723 Autumn Crest Dr, Herndon, VA, 20171 • 571-279-7676 • rahul20mistry@gmail.com

SUMMARY

Hands-on experience in data management, relational databases, and object-oriented programming, with a strong passion for working with data. Proficient in Python, R, and SQL. Actively seeking a full-time position to apply and expand these skills in a data-driven environment.

SKILLS

- **Programming Languages:** Python, R, SQL, Javascript, Java, C++, HTML
 - **Databases/Tools:** Oracle, SQL Server, Tableau, Spark
 - **Developmental Environments:** R Studio, PySpark, Eclipse, Visual Studio, Unix Terminal
 - **Others:** Microsoft Office Suite (Word, Excel, etc.)
 - **Certifications:** Salesforce Administrator(in progress), AWS Solutions Architect(in progress)
-

WORK EXPERIENCE

Salesforce Intern, Saberpoint

Jan 2025 - May 2025

- Collaborated with cross-functional teams on Salesforce projects focused on data management, workflow automation, and report development, ensuring alignment with business requirements.
- Assisted in configuring objects, fields, validation rules, and automation tools (e.g., Flows, Process Builder) to optimize system efficiency and user experience.
- Supported user training and documentation efforts to improve adoption and streamline business operations.
- Pursued Salesforce Administrator certification, demonstrating commitment to continuous learning and platform mastery.

IT Intern, Digital Management Inc (DMI)

Jun 2022 - Aug 2022

- Developed and optimized Oracle SQL queries for large-scale data extraction, transformation, and reporting to support business intelligence and operational analysis.
 - Collaborated with the OPM DMI Enterprise Mainframe Team to create and maintain process documentation and deliver comprehensive status reports for data-driven projects.
 - Assisted the Program Manager in tracking project risks and issues, contributing data insights to enhance risk mitigation strategies.
-

PROJECTS

- Hypothesis Testing and Predictive Model of Flight Landings and Delays - **Python**
 - Used chi-square tests and Random Forest Regressor models on a dataset to find and predict which was the most common form of flight delay.
 - Trends in Major League Baseball in the 21st Century - **RStudio**
 - Researched trends in Pitching and Hitting statistics in the MLB since 2000 and made summaries and graphs to visualize those trends.
 - Insights on Growth Trends, Operational Comparisons, and Spreads in Fast Food - **JavaScript**
 - Using JavaScript and an external data set, created multiple visualization designs to show trends, and wrote a paper expanding upon those results.
 - System Assessment on the United States Postal Services - **Research Paper**
 - Wrote and collaborated on a semester-long research project that assessed how the United States Postal Service works and how they evaluate and handle risks and threats.
-

EDUCATION

Bachelor of Science in Data Science, Pennsylvania State University

Aug 2020 - May 2025

College of Information Sciences and Technology

- Relevant coursework: Data Management for Data Science, Data Analytics with Scale, Visualization & Visual Analytics, Machine Learning and Data Mining
