

OBJECTIVE

Seeking to apply expertise in business analysis, statistical modeling, and data visualization to uncover actionable insights, enhance operational efficiency, and support data-driven decision-making in fast-paced environments.

EDUCATION

Youngstown State University (YSU), Youngstown, OH	College of Science, Technology, Engineering and Mathematics
Master of Science in Computer Information System	GPA: 3.9/4.0, December 2024
Bachelor of Science in Mathematics with a minor in Economics	

PROFESSIONAL EXPERIENCE

Bosphorous Enterprises, Coraopolis, PA	
Operations Manager — January 2020 – December 2023	
- Streamlined workflows using Power BI and Tableau, reducing operational costs by 25%. - Designed KPI dashboards, enabling data-driven decision-making across leadership teams. - Automated processes with SQL and Python, improving data processing efficiency by 30%. - Improved retailer performance by 20% through targeted collaboration with marketing and engineering teams.	

ACADEMIC PROJECTS

Research Assistant & Co-Author – Alzheimer’s Risk Factors Visualization, Youngstown State University	Fall 2024
- Developed data visualizations to analyze dementia risk factors across the U.S. and Canada. - Assisted in research to support public health and gerontology efforts in Alzheimer’s prevention. - Utilized expertise in computer science and health informatics to enhance data analysis and presentation.	
Process Capability Analysis, Youngstown State University	Fall 2024
- Utilized Minitab to analyze process variability and ensure alignment with client requirements. - Presented statistical findings in clear, actionable formats for non-technical stakeholders. - Achieved a 98% adherence to quality control standards across key processes.	
Hospital Resource Allocation System, Youngstown State University	Spring 2024
- Built an SQL-based database system to manage hospital resource allocation efficiently. - Visualized patient inflow and resource usage trends using Power BI dashboards. - Enhanced decision-making, reducing resource allocation inefficiencies by 20%.	
Predictive Sales Analysis, Youngstown State University	Fall 2023
- Analyzed large datasets using Python to predict sales trends for a retail business, achieving 92% accuracy. - Created an interactive Tableau dashboard showcasing sales projections and key market insights. - Delivered recommendations that led to a 12% revenue increase in targeted regions.	

TECHNICAL SKILLS

Programming Languages: Python, R, SQL (PostgreSQL, MySQL, SQLite, Oracle) Data Visualization and Statistical Tools: Tableau, Power BI, Alteryx, Minitab, SAS, SPSS Microsoft Office Suite: PowerPoint, Excel, Word, Visio Additional Expertise: Data Cleaning, Predictive Modeling, Trend Analysis, Exploratory Data Analysis, Agile Methodologies
