rahulsen2599@gmail.com ◇ [linkedin.com/in/iamrahulsen/](https://www.linkedin.com/in/iamrahulsen/)

OBJECTIVE

With two years of Software Engineering experience and a solid foundation in Problem Solving and System Design, I am eager to showcase my skills and excel in any task through dedication, creativity, and strong problem-solving abilities.

WORK EXPERIENCE

Cognizant

Software Engineer

July 2021 - July 2023

Kolkata, WB, India

- Analyzed the design and implemented core backend features by designing and optimizing RESTful APIs, enhancing system efficiency, and ensuring seamless communication with OAuth services
- Migrated legacy SOAP API to modern RESTful architecture, cutting request time by 87% and improving system performance, while automating cloud integrated CI/CD deployment of microservices using AWS CodePipeline.

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python

Web Development: HTML, CSS, Bootstrap, JavaScript, Ajax, ReactJS, Express, NodeJS, PHP

Frameworks & Libraries: Spring Boot, Spring REST API, Spring Data JPA, Spring Cloud, Maven, JUnit

Cloud Platforms & Tools: AWS(EC2, ECR, ECS, CodePipeline), Azure(Databricks, ADF, Synapse Analytics), Git

Database Technologies: SQL (MySQL, PostgreSQL), NoSQL (MongoDB)

EDUCATION

Florida State University, Tallahassee

August, 2023 - May, 2025

Master of Science, Computer Science, **GPA: 3.86/4.0**

- Continued the research work in Imbalance Classification and Class Overlapping Problem.
- Part of the Biking Club and ACM Chapter Member at FSU.

University of Engineering & Management, Kolkata

2017 - 2021

Bachelor of Technology, Computer Science & Engineering, **GPA: 9.39/10**

- Achieved Institutional Rank of 8th (**Top 2% of the University**).
- Research Assistant Prof. Dr. Shankhadeep Chatterjee in work revolving around Imbalance Classification Problems.

PROJECTS

Refundify - Developed an e-commerce platform showcasing microservices interaction in a distributed environment, with a focus on scalability, performance, and fault tolerance using Kubernetes, Docker, and Kafka. Implemented load balancing, autoscaling, and monitoring, deploying the system on AWS via CI/CD with AWS CodePipeline. ([Github](#))

F1 Insights Engine - Designed and implemented a solution architecture on Azure's Spark Databricks platform to handle multi-format data, enabling automated transformation, analysis, and reporting. Integrated features like data deletion, time-travel, and version restoration for flexibility and compliance. Optimized for performance and scalability, supporting large-scale data operations and delivering actionable insights. ([Github](#))

RESEARCH AND PUBLICATIONS

- Class biased Sarcasm detection using Variational LSTM Autoencoder, in International Conference on Computational Intelligence, Data Science and Cloud Computing, Springer, 2022, pp 289–297.
- NO PHISHING! Noise Resistant Data Resampling in Majority biased detection of Malicious Websites, in International Conference on Emerging Technologies in Data Mining and Information Security, Springer, 2022, pp 655–662.
- Contour-marker based segmentation for tumorous and non-tumorous brain mri detection, in International Conference on Internet of Everything, Microwave Engineering, Communication and Networks, 2021, IEEE Xplore.
