SUMMARY

Python Full Stack Developer with 3+ years of expertise in Agile methodologies and crafting robust web applications. Proficient in front-end tech like HTML, CSS, React, and back-end frameworks including Node.js and Python (Django, Flask, FastAPI). Skilled in microservices architecture, RESTful API design, and cloud-based solutions using AWS, Red Hat OpenShift, and VMware. Experienced in CI/CD pipelines, DevOps practices, and maintaining data integrity across MySQL, PostgreSQL, and MongoDB databases. Adept at Git for version control, fostering collaborative and innovative development environments.

SKILLS

Methodology: SDLC, Agile, Waterfall

Languages: Python, SQL, PL/SQL, R, UNIX Shell,

Frameworks: Django, Flask, Node.js, React.js, Express.js, Angular.js

Package & Tools: NumPy, Pandas, Web2py, CherryPy

AWS Services: EC2, ELB, IAM, S3, Cloud Watch, Redshift, Autoscaling, Cloud Formation

Web Technologies: HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, XML, Restful API, Redux

Databases: SQL Server, MySQL, SQLite, MongoDB, PostgreSQL, MariaDB

Operating Systems & Tools: Windows, Linux, Git, GitHub, Jira

EXPERIENCE

Kroger, USA | Aug 2023 - Current | Python Full Stack Developer

- Applied Agile methodologies throughout the application development lifecycle, facilitating iterative progress and frequent reassessment to ensure the final product meets evolving requirements and client expectations.
- Engineered and implemented comprehensive web applications utilizing front-end technologies such as HTML, CSS, JavaScript, and React, alongside back-end frameworks including Node.js, Express, and Python (Django, Flask, FastAPI).
- Engineered microservices architecture to modularize and decouple components of web applications, enhancing flexibility, scalability, and maintainability.
- Designed and developed RESTful APIs using Node.js and Express, facilitating seamless communication between front-end and back-end systems.
- Implemented cloud-based solutions using AWS, Red Hat OpenShift (RHOS), and VMware, enhancing scalability and reliability of web applications.
- Utilized Docker for containerization and Kubernetes for orchestration, streamlining deployment processes and resource management.
- Developed a complete and operational prototype application utilizing JavaScript and Bootstrap, integrated with a REST service hosted on AWS via RESTful API Gateway, and employed MongoDB for database management.
- Integrated Django ORM for efficient database interactions, reducing development time and minimizing SQL query complexity.
- Applied DevOps practices to streamline development workflows, improve system reliability, and reduce time to market.
- Employed Git for version control, maintaining a clean and collaborative codebase.

Tata Consultancy Services, India | Jul 2021 - Jul 2022 | Associate Software Engineer

- Conceptualized, designed, and deployed a comprehensive data management system utilizing the Django framework, focusing on robust data handling and storage solutions.
- Leveraged MariaDB to design and maintain efficient database schemas, ensuring data integrity and reliability within full-stack applications.
- Automated deployment and configuration management tasks using Ansible, streamlining infrastructure provisioning and maintenance processes.
- Developed Bash scripts for various system administration tasks, enhancing automation and efficiency in deployment and maintenance workflows.
- Implemented multiple CI/CD pipelines as part of DevOps role for our on-premises and cloud-based software using Jenkins, Chef, and AWS/Docker.
- Utilized Amazon Web Services (AWS) Cloud Formation and Puppet by creating DevOps processes for consistent and reliable deployment methodology.

Mindtree, India | Jan 2020 - Jun 2021 | Python Full Stack Developer

- Experienced in various Software Development Methodologies, including the Waterfall model, to systematically drive project progress from planning to deployment.
- Engineered robust backend systems utilizing Python and Django, alongside frontend applications crafted with HTML5, CSS3, Bootstrap, JavaScript, and React, prioritizing user-centric design and functionality.
- Contributed to database design and management utilizing Python, alongside crafting Restful APIs with Flask, SQL, and PostgreSQL, ensuring efficient data storage and retrieval while maintaining data integrity.
- Deployed and managed applications on cloud platforms such as AWS and VMware, leveraging cloud services for enhanced functionality.
- Implemented robust CI/CD pipelines to automate testing, integration, and deployment phases, promoting iterative development practices and efficiency gains.

EDUCATION

Masters in Computer Software Engineering | Arizona State University, Tempe

Bachelors in Electronics and Communication Engineering | B V Raju Institute of Technology, Hyderabad
