

Full Stack Developer with 4+ years of experience designing and developing secure, high-performance web and backend applications. Skilled in **.NET Core**, **Node.js**, **JavaScript**, **React**, and **Python**, with hands-on experience in **cloud platforms (Azure, AWS)**, **DevOps automation**, and **CI/CD pipelines**. Proficient in building scalable solutions using **relational and NoSQL databases**, containerization (Docker, Kubernetes), and Agile methodologies. Adept at troubleshooting, performance optimization, and delivering business-driven analytics solutions.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Atlanta, GA

Netline Technologies(Contract)

Jan 2024 –Present

- Designed and implemented modular **.NET Core microservices** supporting internal portals and REST APIs, improving system scalability and fault isolation.
- Managed deployments to **Azure Kubernetes Service (AKS)** using **Docker** containers and **CI/CD pipelines in Azure DevOps**.
- Built and deployed Dockerized applications to Azure Kubernetes Service (AKS) via Azure DevOps CI/CD pipelines, reducing deployment time by 30%.
- Integrated third-party APIs for identity verification and financial data processing, ensuring security and compliance.
- Automated workflows using Python scripts, improving operational efficiency.
- Collaborated with cross-functional teams in Agile sprints, participating in backlog grooming, sprint reviews, and retrospectives.
- Participated in code reviews, root cause analysis, and performance profiling to resolve production issues and improve system stability.
- Led initiatives in service observability and logging, reducing mean time to resolution (MTTR) by 30%.

Software Developer

Chicago, IL

Astute

May 2023 – Dec 2023

- Built and enhanced backend services in **.NET Core**, to modernize legacy architecture and improve system responsiveness.
- Integrated **SOAP (WSDL/XSD)** and **REST APIs** to enable inter-system communication and legacy system upgrades.
- Ensured secure API access, logging, and traceability, contributing to reliable and auditable data workflows.
- Supported Agile development by contributing to documentation, daily stand-ups, and sprint retrospectives.
- Collaborated with front-end teams to design full-stack features using **ReactJS**, **TypeScript**, and **Node.js**.
- Wrote and maintained unit, integration, and E2E tests, improving code coverage and reducing post-release bugs.
- Delivered data-intensive backend features with complex SQL and NoSQL queries across **PostgreSQL**, **SQL Server**, and **Snowflake**.
- Participated in technical discussions across teams to align architecture with business and compliance needs.

Software Developer Intern

St. Louis, MO

UnikPro

Jan 2023 – May 2023

- Integrated APIs for system interoperability using SOAP (WSDL, XSD) and REST with version control via GitHub.
- Built backend services in **Python** and **SQL Server**, utilizing **SSIS pipelines**, stored procedures, and functions for data processing.
- Designed SQL Server and T-SQL scripts to support application data layers, pipelines, and reporting use cases.

Software Developer

Telangana, IND

EartPro

Mar 2020 – Aug 2021

- Collaborated with cross-functional teams to implement backend systems in C# and ASP.NET, automating test baselines and improving DevOps workflows.
- Integrated identity and authorization workflows using OIDC-based patterns (e.g., Okta/Auth0), contributing to secure access control in internal systems.
- Participated in agile product planning and design reviews, improving backend reliability and ensuring system cohesion across teams.

PROJECTS

Retail Database Q&A System (OpenAI & Lang Chain)

- Developed a Q&A system to translate natural language queries into SQL for managing T-shirt inventory, sales, and discounts using Lang Chain and OpenAI.
- Built an AI-powered interface using LangChain + Hugging Face embeddings + ChromaDB for natural-language-to-SQL interactions with real-time MySQL inventory data.

ML Enabled Helpdesk [Python, Tableau]

- Implemented a smart call routing service with the XGboost algorithm, using various attributes of an individual.
- Executed locality-sensitive hashing search for over 1000 tickets, improving the quality of satisfaction for customer care by 60%.

FedEx Omnichannel Shipping Approach [JavaScript, HTML, CSS]

- Utilized knowledge of Excel to meet various KPIs with the end goal of decreasing total logistics costs.
- Achieved a 59% improvement in total transportation costs, a 55% improvement in total logistics costs, and a 142% increase in next-day shipping transactions.

TECHNICAL SKILLS

Languages & Frameworks

- JavaScript (ES6+), ReactJS, TypeScript, HTML, CSS, Python, Node.js, C#, .NET Core, Java (basic)
- C#, .NET Core, Python, Java, JavaScript (ES6+), TypeScript, ReactJS, Node.js, Spring Boot

Systems and Architecture

- Microservices, REST APIs, Multithreading, Client-Server, SaaS Security, Messaging Systems (Kafka, Azure Service Bus)

Databases

- PostgreSQL, SQL Server, MySQL, MongoDB, Snowflake

Cloud & DevOps

- Azure (AKS, Redis, Cosmos DB), AWS (EC2, S3 – familiar), Docker, Kubernetes, Azure DevOps, CI/CD Pipelines

Testing & Quality Assurance

- xUnit, JUnit, PyTest, Selenium (basic), Logging, Monitoring, Debugging, Log Analysis, Post-deployment Validation.

EDUCATION

Master of Science in Business Analytics [The University of Texas at Dallas](#).

Dallas, TX

Bachelor's in Computer Science Engineering- [Gitam](#)

Telangana, IND
