Professional Experience

Data Operations Analyst

University of North Texas

Denton, Texas

August 2024 – May 2025

- Managed and updated student assistant databases using SQL, ensuring accurate records of attendance and working hours.
- Cleaned and validated time-tracking data using Python (Pandas) to maintain consistency and reliability.
- Developed automated Power BI dashboards to monitor work hours, attendance patterns, and departmental support metrics.

Data Analyst

Merlin Softech & Telecom Pvt Ltd

Hyderabad, India

July 2022 – July 2023

- Designed and maintained dashboards in Power BI and Tableau to track performance and department-level metrics.
- Utilized SQL and Excel for data extraction and automation, delivering actionable insights to support business decisions.
- Collaborated with cross-functional teams to define reporting requirements, document KPIs, and enhance visibility of business processes.

Data Analyst

Keshvin Automotors Pvt Ltd

Andhra Pradesh, India

March 2021 – March 2022

- Developed automated dashboards and reports using SQL, Python, Power BI, and Tableau, improving reporting efficiency by 40%. & Led sales data analysis initiatives that supported a 15% increase in monthly sales through data-driven insights.
- Streamlined data processes, reducing manual effort by 30% and enhancing KPI tracking across departments.
- Worked with team members to standardize data models and optimize ETL pipelines for real-time analytics.

Data Analyst

Techciti Technologies Pvt Ltd

Bangalore, India

May 2020 – November 2020

- Analyzed infrastructure and client usage data using SQL and Excel to support tailored IT solution recommendations.
- Developed Power BI dashboards to present performance, cost efficiency, and system utilization metrics.
- Cleaned and transformed large datasets using Python (Pandas) and collaborated with pre-sales teams to deliver accurate, data-driven client insights.

Projects

Blinkit Sales Analysis Dashboard – Power BI, SQL, Excel, DAX, Power Query

GitHub

- Developed dashboards to track orders, delivery efficiency, and sales performance across regions.
- Integrated diverse data sources (Excel, SQL) into a unified star-schema data model.
- Partnered with stakeholders to deliver tailored reports, reducing manual analysis time.

Bank Database System – SQL, Triggers, Views, Stored Procedures, ER Modeling

GitHub

- Designed a relational banking schema with ER diagrams simulating real-world operations.
- Implemented queries, stored procedures, and triggers to generate transaction and compliance reports.
- Connected SQL tables into Power BI, creating governed reports to ensure data quality and consistency.

Education

University of North Texas

Master's in Data Engineering, GPA : 4.0/4.0

Denton, Texas

Aug 2023 – May 2025

Skills & Interests

Programming Languages : Python, SQL, C, HTML, CSS

Tools & Technologies : Apache Spark, PySpark, Databricks, Snowflake, GCP, Azure (Azure Data Factory, Azure Data Lake, Azure Synapse, Azure SQL), BigQuery ML, GitHub (Version Control), ETL/ELT Data Pipelines, AWS (S3, EC2), Streamlit

Data Visualization & Concepts : Power BI, Tableau, Looker Studio, DAX, Power Query, Data Modeling, Dashboard Design, KPI Dashboards, KPI Implementation, KPI Development, KPI Tracking, Data Storytelling, Trend analysis

Data Analysis : Pandas, Matplotlib, Numpy, Seaborn, Scikit-Learn, Excel (VLOOKUP, Pivot Tables, Advanced Functions), EDA, Data Cleaning
