Full Stack Web Developer with 8+ years of experience building scalable and efficient web solutions. Specialized in both Front-End and Back-End development, complex database design, and cross-functional collaboration. Strong focus on performance, maintainability, and business impact.

PROFESSIONAL EXPERIENCE

United Nearshore Operations (UNO)

Full Stack Developer

**Santiago,
Dominican Republic**
Aug 2016 – Present

- Lead end-to-end development and maintenance of mission-critical internal applications for departments including HR, Finance, Call Analytics, and Operations.
- Architected and implemented RESTful APIs and Single Page Applications (SPAs) using Laravel, Vue.js, jQuery, and Bootstrap to streamline workflows and improve efficiency.
- Designed and maintained robust PostgreSQL database systems, including advanced features like stored procedures, triggers, and materialized views to support real-time data access and reporting.
- Spearheaded automation initiatives for repetitive tasks and reporting, reducing manual workload and human error.
- Conducted performance tuning, database indexing, and schema optimization, significantly improving query execution time and resource usage.

Alegnor / Epromos

Full Stack Developer (Part-Time)

Remote
May 2023 – Dec 2025

- Maintain and develop new features for the Epromos e-commerce platform using Laravel, BigCommerce, Stencil, jQuery, and React.
- Migrated legacy Cornerstone theme components to React, resulting in a more maintainable and modular codebase.
- Improved user interface and enhanced UX by redesigning key components and optimizing rendering performance.
- Reduced page load time by 40% through implementation of GraphQL, lazy loading strategies, and effective promise management across pages.
- Contributed to bug fixing, responsive design updates, and performance audits to improve site reliability and user engagement.

True Apex

Full Stack Developer (Part-Time)

Remote
Nov 2021 – Mar 2023

- Improved and maintained multiple internal systems using Laravel, WordPress, Vue.js, and Bootstrap.
- Translated PSD designs into responsive, modern Single Page Applications (SPAs), matching original design specifications.
- Integrated external platforms such as Spotify, Deezer, Apple Music, and Stripe to enhance service functionality and user engagement.
- Delivered the project successfully within scope, meeting both functional and design expectations.

Cloud Defense

SQL Developer (Part-Time)

Remote

Apr 2021 – Oct 2021

- Designed and optimized complex SQL queries for use across multiple development teams.
- Improved reporting systems using PostgreSQL by implementing advanced indexing strategies, materialized views, and proper query structuring with window functions.
- Introduced database caching layers and performance tuning that led to a 50–60% overall improvement in query execution time.
- Reduced load times in specific modules from 10–15 seconds down to under 100 milliseconds.
- Successfully completed the project with measurable performance gains and scalable results.

EDUCATION

UTESA – Universidad Tecnológica de Santiago

Bachelor's Degree in Systems Engineering

Santiago,

Dominican Republic

2012 – 2020

TECHNICAL SKILLS

- Back-End: PHP (Laravel), Node.js
- Front-End: JavaScript (Vue.js, React, jQuery), HTML, CSS (Tailwind, Bootstrap, Vuetify)
- Databases: PostgreSQL, MySQL, SQL Server
- DevOps/Others: Complex SQL scripting, Server Management, Data Migrations
- Soft Skills: Project Leadership, Problem Solving, Client Communication, Decision Making

LANGUAGES

- Spanish: Native (C2)
- English: Upper-Intermediate (B2)
