SKILLS

Advance Excel, SQL, Power BI, Tableau, Agile/Scrum methodologies, Program Management. Certified Scrum Master(CSM)

TECH PROJECTS

Zomato Customer Segment Analysis | 08/2025

Zomato is a multinational restaurant aggregator and food delivery company. Customer Analysis Segmentation is one of the areas to analyze the business performance of restaurants and customers registered in the service

- Purpose: Uncover insights into who Zomato's customers are, what their purchasing behaviors are, and how to group them into meaningful segments for implementing business strategies
- Methods/Techniques: Created calculated fields and groups to analyze customers and their spend behaviors
- Results: Built an interactive dashboard to demonstrate type of users and their behaviors, and created a story to explain recommended actions and propose next steps.
- Recommendations: To Improve returning customers and increase customer base, programs such as discounts for repeated customers and membership plans are suggested.

Saving SuperStore Return Analysis | 07/2025

Analyzed SuperStore returns what is causing customers to return their orders and how to reduce the volume of returned orders.

- Purpose: To Analyze returns and reduce the volume of returned orders.
- Methods/Techniques: Created calculated fields to get return rate and created different graphs to show correlation between sales and returns, return rate by category/subcategory, return rate by month to identify trends etc.
- Results: Built an interactive dashboard to demonstrate root causes of returns across filters, and created a story to explain recommended actions and propose next steps.
- Recommendations: To Reduce Returns and Improve Customer Satisfaction Superstore must act on product, regional and seasonal return patterns, enhance product description pages and quality control, and set up monthly monitoring via the dashboard to catch trends early and act in real-time.

Saving SuperStore Analysis | 07/2025

Analyzed superstore's operations so as to increase its profitability to avoid bankruptcy.

- Purpose: Advised Superstore on area of improvements for increasing Profitability to avoid bankruptcy.
- Methods/Techniques: Identified Profits and losses across various sub categories and identified which sub categories sales should be stopped, Identified best months and states to advertise as well as a recommended

budget for each state, and identified where the greatest losses correlated to returns as well as which items to stop selling based on return rate.

- Results: Provided analysis identifying specific actions to be taken to increase profitability.
- Recommendations: Superstore should stop selling loss making printer categories, should focus on subcategories like copiers, phones and accessories.

E Commerce Business Analytics | 05/2025

Analyzed E commerce Business to determine how well the website is converting product page views into purchases.

- Purpose: Advised Business on area of improvements for increasing the conversion rate of page views to purchases.
- Methods/Techniques: Created a cohort analysis of the purchases over time based on initial purchase month. Calculated retention rates based on previous cohort analysis. Created conversion funnel to show retention rates.
- Results: Provided analysis identifying specific areas for improvement.
- Recommendations: 29% of Users moved from View till shopping Cart and out of that 36% made it to purchasing the product. Overall 10% of users were converted to Customer. Product descriptions and additional features to be updated to ensure better conversions.

Manhattan vacation rental market Analysis | 05/2025

Analyzed the vacation rental market in the Manhattan borough of New York City to identify several properties ideal for investing in.

- Purpose: Advised a potential investor about the best property type and location in New York City to invest in.
- Methods/Techniques: Cleaned and filtered data to find relevant listings and create new columns and pivot tables.
- Results: Identified what bedroom size and neighborhood were most popular according to occupancy. Estimated annual revenue for each qualifying neighborhood with appropriate bedroom size.
- Recommendations: Single Bedroom properties dominate the market, suggesting investing in 1-bedroom properties in the Lower East Side neighborhood with high occupancy rate.

EXPERIENCE

Tata Consultancy Services | Operations Head | 08/2014 - 03/2025 | Bangalore, India

- **Strategic Planning:** Directed operations and governance for global enterprise clients (MARS, London Stock Exchange, American Express, Johnson & Johnson), aligning performance goals with client expectations.
- **Financial Analysis:** Conducted detailed P&L analysis, tracking revenue streams and cost levers to ensure profitability and adherence to organizational targets that improved margins by 2–5% Q-o-Q.
- **Business Intelligence:** Led Monthly/Quarterly Business Reviews (MBRs/QBRs), leveraging data dashboards to identify trends, inform leadership, and drive executive decision-making.
- **Performance Metrics:** Monitored KPIs across accounts to ensure service-level excellence and identify improvement opportunities using internal analytics tools resulted in 10% increase in SLA Compliance and Customer satisfaction.
- **Contract Management:** Oversaw end-to-end SOW and contract lifecycle management across multi year contracts totaling 100M+, ensuring legal compliance and seamless CRM system integration.
- **Resource Optimization:** Collaborated with HR to plan workforce capacity, improve utilization rates, and align staffing needs with project forecasts.
- **Billing & Revenue Tracking:** Ensured timely invoice processing, collaborated with AR/AP teams on discrepancy resolution by 98%, and improved payment turnaround time by 25%.
- **Audit & Compliance:** Led internal and client-facing audits, maintained compliance protocols, and implemented controls to ensure risk mitigation and regulatory adherence.

- **Team Leadership:** Mentored 20+ team members, conducted performance evaluations, and fostered a culture of accountability and continuous improvement.

Tata Consultancy Services | Operations Lead/Analyst | 08/2005 - 07/2014 | Bangalore, India

- **Process Automation:** Developed custom VB (Visual Basic) solutions to automate recurring client workflows, increasing operational efficiency by 30% and reducing manual errors.
- **Client Operations:** Implemented the Buyer-Initiated Program (BIP) in partnership with Amex's vendor team, improving vendor processing time and reporting transparency.
- **Compliance Monitoring:** Tracked client-mandated training and certifications to ensure 100% compliance and regulatory readiness across teams.
