

RAJASHEKAR
Dot Net Developer

Email id: RAJASHEK235@gmail.com

Ph.: +1(304)282-7268

PROFESSIONAL SUMMARY

- Over 6+ years of experience in **Analysis, Design, Development** and **Deployment** of various commercial applications with involvement in all stages of **Software Development Life Cycle (SDLC)**.
- Good Hands on Exposure with **Banking, Insurance and Health domains**.
- Experienced in developing and deploying web-based solutions on various architectures like **n-Tier, Client/Server, MVC (Model View Controller)** using Microsoft tools and technologies.
- Extensive experience of designing and developing software applications with **ASP.NET 3.5, 4.0 & 4.5**.
- Experience in designing and developing applications using **ASP.NET, ADO.NET, C#, MVC 3.0/4.0, WCF, WPF, Web services, Entity Framework, Web API, HTML, XML, CSS, bootstrap, Java Script, AngularJS, AJAX, JQuery, Web Forms and WinForms**.
- Used **Web Services** to build interoperable applications.
- Worked on **Windows Communication Foundation (WCF), WEB API**.
- Good Experience on **SSRS technology** and good knowledge on **SSIS technology**.
- Expertise in using **ADO.NET** objects such as **Connection Object, Command Object, Data Reader Object, Dataset Object** and **Data Adapter Object**.
- Experience in using **Language-Integrated Query (LINQ to Objects and LINQ to SQL)** and retrieve data from data sources.
- Experience in **Test Driven Development (TDD)** and Automation.
- Worked on **Entity Framework** and have knowledge on all different approach.
- Extensive working experience in database design and development, for creating complex database queries, writing **Constraints, Indexes, Views, Triggers, Functions** and **Stored Procedures** using **T-SQL** and **PL/SQL** in SQL Server 2010/2012/2014.
- Experience in using Language-Integrated Query (**LINQ**) in .NET objects to query and retrieve data.
- Experience in handling backend data sources like **MS SQL Server 2010/2012/2014**.
- Experience of Source code version control using **SVN** and **Team Foundation Server (TFS)**.
- Experienced in a fast paced **Agile** Development Environment and **Scrum**.
- Involved in **Unit testing** and **bug fixing** of the system.
- Good management skills, demonstrated proficiency in leading and mentoring individuals to maximize levels of productivity, while forming cohesive team environment.
- Good experience in coordinating between onsite and offshore model.
- Have good communication skills and proven capabilities as a good team player.
- Ability to work in both a stand-alone and a team environment.

TECHNICAL SKILLS

.NET Technologies	ASP.NET 3.5/4.0/4.5, MVC 3.0/4.0/5.0, ADO.NET, VB.NET, WinForms, Web Forms WEB API, XML, CSS, ASMX Web Services, .Net Remoting, AJAX, WCF, WPF and LINQ
Languages	C#, VB.NET, Java.
Web Technologies	HTML, DHTML, CSS, XML, XAML, IIS, jQuery, AngularJS, Bootstrap.
Operating Systems	Windows Server 2003 / 2008, Windows 7 / 8 /10.
Databases	SQL Server 2008 / 2010 / 2014, Oracle 10g / 11g, MS-Access.
IDE	VS.NET 2010 / 2013, Visio, Visual Source Safe, TFS, Tortoise SVN.
Web Services	Web Services, WCF, RESTful Service.
Reporting Tools	Crystal Reports, SQL Server Reporting Services (SSRS).

PROFESSIONAL EXPERIENCE

HSBC Bank, Mettawa, IL

March 2015 – Till Date

Project: CCAR

Role: .NET Developer

Description:

The CCAR GUI is a user-interface process that allows the users to control the processing of the loading and reporting procedures required for the CCAR Regulatory Reports. The users of the Tool log in through the initial login screen with their Windows user id and password. The Tool contains the internal file of the valid user ids for authentication.

Responsibilities:

- Involved in understanding user requirements, designed and developed web UI and back end applications.
- Interacted with business analysts, end users and worked on the application specifications to develop detailed functional, technical design and test specifications that fully satisfy business requirements.
- Design web application wireframe as per business requirement.
- Used **ASP.NET MVC 4** and C# to build the application, used Razor View Engine and Worked on Views, Controller and Models.
- Designed and develop user interface for public web application and intranet application using **Visual Studio 2013, ASP.NET, C#.NET, AJAX, XML, WCF, RESTful Service with WCF, JQUERY, JSON** and **CSS** with object oriented programming techniques.
- Used various features of C# (like **reflections, generics, partial classes** etc.).
- Responsible for creating **JQuery** Data Table with filters and sort items, pagination.
- Developed presentation layer of both public and intranet application.
- Develop application infrastructure component like logging, exception handling, data access, caching and cryptographic application block.
- Participated in peer reviews.
- Develop systems using .NET components and implemented the Data Access layers using **ADO.NET**.
- Used ADO.NET objects such as data reader, data adapter and dataset for consistent access of the data from data layer.
- Worked with developers to resolve and fix the issues found in testing the structure and functionality of the application
- Designed and Developed reports using SSRS. Reports were developed against a variety of data sources which included SSRS.
- Created custom html helpers based on our project requirements for the razor view.
- Working in an Agile-Scrum environment and have implemented Pair Programming.
- Used **TFS** for version control.
- Develop **stored procedures, functions, triggers** using SQL and T-SQL in SQL Server 2014 for fetching data and binding.

Environment: MVC 4.0, Visual Studio.Net 2013, C#.NET 4.0, ASP.NET, ADO.NET, WCF, SSRS, LINQ, XML, AJAX, SQL Server 2014, TFS, CSS, JavaScript, JQuery, NUnit.

HealthPlan Services, Tampa, FL

Jan 2014 – Feb 2015

Project: Fully Integrated Dual Advantage

Role: .Net Developer

Description:

HealthPlan Services (HPS) is the nation's largest independent provider of sales, benefits administration, retention, reform and technology solutions to the insurance and managed care industries. We've worked to develop new approaches designed to improve health and well-being. In many ways, we've grown with transformation of the health care system.

Responsibilities:

- Participated in enhancements, design reviews, and ensured design meets functional and operational needs.
- Designed and developed the **C#** components for implementing business logic in middle tier in 3-tier application interacting with SQL Server database using Managed provider using **ADO.NET**.
- Developed complete Data access layer Component using **C#**.
- Designed and Developed UI Framework for Single Page Web Application using **AngularJS, Bootstrap**,

JavaScript, jQuery, HTML5.

- Implemented Form Based authentication and Role based authorization to authenticate users.
- Utilizing **.Net MVC 3 (Razor), MVC** and Unity Inversion of Control / **Dependency Injection**.
- Prepared plan brochures with **Telerik rad Controls**.
- Used **ADO.Net** Technology to connect the web forms to data sources such as MS SQL Server and Xml files for manipulating data in database.
- Developed SQL queries, T-SQL procedures, Functions, triggers to handle the business rules data integrity and for various data transactions.
- Used Data Transformation Services to import the data in SQL server from heterogeneous data sources like excel Access and Oracle.
- Used in Source Code Control Systems like MS Visual Source Safe (VSS) and Team Foundation Server (TFS), Cruise Control .NET
- Used Fiddler 2.0 for debugging any issues with the Web Application.
- Performed extensive Unit testing using N-Unit, developed Test Plans, Test Cases.
- Visual SourceSafe was used to maintain the version and source control.

Environment: Visual Studio 2012, C#, ASP.NET, Telerik Rad controls, MVC, ADO.NET, HTML5, jQuery, AngularJS, Bootstrap, DHTML, CSS, JavaScript, XML, Web Services, Fiddler 2.0, IIS 6.0, SQL Server 2012.

MetLife Insurance, NJ

June 2012 – Dec 2013

Project: Auto Insurance Application

Role: .NET Developer

Description:

MetLife is insurance company. It offers insurance for health, life, car and business oriented insurance policies. System was upgraded and maintained and used HIPAA, HL7 standards and FACETS. The Auto Insurance Applications web application developed using ASP.NET, Ajax controls and ADO.NET. The Application aims in providing and comparing the Insurance quotes. The application is developed using n-tier architecture through SDLC.

Responsibilities:

- Implemented business logic using **C#.NET**.
- Implemented master page for Asp.net Pages.
- Involved in the Broker management Feature.
- Design, develop, test, support and deploy desktop, custom web, and mobile applications.
- Developed GUI using **ASP.NET** and C# as code behind language to implement the business logic.
- Developed the Web pages in **ASP.NET, C#**.
- Presented Data in connected and disconnected mode using ADO.NET objects.
- Created composite **web custom controls** for easy reuse.
- Improved code reusing and reduced class coupling through Dependency Injection design pattern.
- Implemented data editing, Filtering, Sorting, Paging in Data list and Data grid controls using ADO.NET.
- Edited **XML** files to configure **ASP.NET** applications.
- Performed **Client-side** validation and logic using **JavaScript**.
- Designed a **CSS (Cascading Style Sheet)** file for giving a standard look and feel for all the Form.
- Implemented **authentication** and **authorization**.
- Extensively used Application and page level **tracing** feature of .Net to trace and debug the code.
- Created **stored procedures** to extract the data from the **SQL Server**.
- Developed Web services using **ASP.NET** and **C#**.
- Provide extensive production support and fix problems in a short span of time.

Environment: Visual studio 2010, ASP.NET 3.5, ADO.NET, SQL Server 2008, AJAX, XML, IIS, HTML, C#.NET, MS Unit, Java Script, AJAX, JSON

State Farm Insurance, Bloomington, IL

March 2011 – May 2012

Project: Health Insurance Management System – HIMS**Role: .Net Developer****Description:**

State Farm Insurance is provider of auto, health, home and life insurance. **Health Insurance Management System (HIMS)** is fully automated and integrated application for managing the Policy plans, Agent Commission, Incurred but not Paid and Settlements. This Insurance Management System gives information of the client, policy details and premium rates and monitors the policies for delayed payments. It manages different claims per policies, claim settlements and allows coverage verifications.

Responsibilities:

- Understanding the client requirements and estimate the duration for Look and Feel module.
- Implemented the **VB.NET 2.0** code for business change for each customer as per requirements.
- Creating the typed datasets in VB.NET 2.0 for entities which carries the data from one layer to another layer.
- Retrieving the configurable data from **XML** files and displaying in front end **GUI**.
- Writing **PL/SQL** queries in Oracle 10g to perform schedules in the meeting module.
- Developed Proto types screen using Flex interface.
- Created **VB.NET** Parent and Child Forms for the Application
- Written **VB.Net** code for Business Logic Layer.
- Written User Controls using **XAML/VB.Net** in **WPF**.
- Created Dependency properties and Data Bindings in **WPF**.
- Implemented **Multi-Threading** for back ground printing process.
- Developed control layer and handling delegates and events of controls.
- Created Windows service for automating the process in **VB.Net**
- Used Microsoft Application Data Block for **ADO.Net** layer development.
- Written the **N-Unit** Test Cases.
- Implemented validation for targeting module by using **VB.NET** validation Layer.
- Implemented **WCF** service for remote call to get the details of customer.
- Implemented data caching for the customer related data in business logic layer.
- Created the Universe for generating Active Reports.
- Used **Tortoise SVN** for version control.
- Written Stored Procedures and **UDFs** in **TOAD**.

Environment: VB.Net, WinForms, Win Services, WPF, VBA, Flex, Oracle 10.0, Sybase, Windows XP, WSS 3.0, Toad-Unit, Perforce, Tortoise SVN, MS Visio and Active Reports.

Refulgent Technologies, India**Dec 2009 – Feb 2011****Role: Jr. Software Engineer****Project: HRMS****Description:**

The project is the web application for company based human resource management system, the solution is to help the company to manage the information about each employee inside this company, such as employee basic data, salary, attendance, and bonus. The HR department can use that to select the best employee from a specific department, it not only improved the efficiency of the people under HR department, but also let every employee to know their working details.

Responsibilities:

- Responsible for analysis and design specifications, development and testing
- Wrote design documents like Technical Specification, Test Scripts and Data Preparation.
- Designed the class objects for Business logic.
- Involved in **Employee Module, HR Module**.
- Developed the **Business Logic DLL**.
- Understanding the Issues, Change request and wrote test script for the same.
- Extensively used stored procedures, Views, User defined Functions.
- Used **NUnit** for doing Unit Testing.

- Developed **SQL procedures** for faster response time between client and database server.
- Design of the database schema and the underlying business logic, along with its implementation in SQL scripts, stored procedures on **SQL Server 2008**.
- Worked on **3 Tier** Architecture.
- Designed and developed screens for User Interface & Interaction also developed various Search Screens for different strategies.
- **ADO.NET** (SQL Client) was used for Database interaction. Used Dataset, Data View and Data Reader objects for data retrieval and manipulation.
- Involved in maintenance, module testing, unit testing and Integration testing.
- Solving the performance related issues both at the Database level and the Coding level.
- Handling the support activities like communicating with client, understanding the issues, doing the impact analysis, effort estimation and solving the issues.
- Developed web pages using Classic ASP and used C# to develop code and to communication with server via SOAP.

Environment: C#, .Net Framework 3.5, ASP.Net, ADO.Net, Web Services, SQL Server 2008, IIS, Java Script, HTML, CSS, Ajax, Visual Studio 2008.

EDUCATION

- **Bachelors in Computer Science, JNTU, India.**
