

Objective

To obtain an internship as a Data Scientist/Analyst where I could implement my theoretical knowledge on predictive analytics, machine learning algorithms and gain some practical, professional experience.

Education

- RUTGERS University, New Brunswick, New Jersey Dec - 2017
MBS – Analytics: Discovery Informatics & Data Sciences
 - Rajiv Gandhi University of Knowledge Technologies, India Jul - 2016
Bachelors in Computer Science and Engineering
-

Technical Skills

Programming languages	Java, Python, C, R Programming
Web Development	React JS, Bootstrap, CSS, HTML
RDBMS	SQL, PL/SQL
Tools & IDE	Weka, R Studio, IBM SPSS Modeler, Eclipse, MS Excel, MS PowerPoint, Matlab

Academic Projects

- An Ensemble model to predict an archaeological site.** Aug 2016 – Dec 2016
Languages & Tools Used: IBM SPSS Modeler, Python, Excel
Description: Successfully implemented an ensemble model which contained logistic regression, neural networks, Quest, Cart and Discriminant algorithms on Mexico land sites data to predict an arch archaeological site.
 - Predicting the optimum size of a class.** Feb 2016 – May 2016
Languages & Tools Used: Matlab, Python, Excel
Description: Utilized linear regression and k-means clustering algorithm on student's marks list to predict ideal student size for a class to get maximum out of the students.
 - Sentiment Analysis** Aug 2015 – Dec 2016
Languages & Tools Used: Python, Sentiwordnet
Description: Developed and implemented a novel algorithm (named HARN) which overcomes the limitations (Context based and Comparative sentences) of sentiment analysis exclusively using python.
 - Internet of Things Application** May 2015 – Aug 2015
Languages & Tools Used: Raspberypi
Description: Created a simple IOT application using Raspberry pi where status of the light (on/off) will decide the status of door (opened/closed)
-

Publications

- Rajashekar, Akhil Gangavarapu, Nagarjana Devi "Sentiment analysis using HARN algorithm", 6th International Conference on IT Convergence and Security. September 26-29, 2016.
-

Experience**Software Developer Intern, CyberEye, India**May 2015 – Aug 2015

- Worked on front end development technologies like ReactJS, Flux architecture in developing a website for an NGO to showcase their activities.
