

Rajdeep Hundal

Software Engineering | Software Development

Email: hrajdeep712@gmail.com

Phone: (210) 577-5839

Address: 4900 Woodstone Dr, Apt 1307, San Antonio TX 78230.

Profile

Rajdeep is a Computer Science graduate from the University of Wisconsin–Superior and holds a Post Graduate Diploma in Project Management from The University of Winnipeg PACE. She has over six years of experience including full-stack development, testing, and project management across e-learning, healthcare, and gaming sectors. With a strong foundation in Java for backend, and JavaScript for frontend, she is committed to delivering impactful solutions and supporting organizational success. She also has experience using docker at her last job for containerization and has basic understanding of CI/CD pipelines and Kubernetes.

- Github (personal) - <https://github.com/rhundal>
- Github (Tamu) - <https://github.com/rhundal7>

Key skills

- Java/J2EE
- Spring boot, REST API, Microservices
- Angular/JS, ReactJS, NodeJS
- jQuery
- Bootstrap, CSS
- JavaScript, HTML
- XML
- MongoDB, PostgreSQL, MySQL
- Docker and CI/CD, Kubernetes

FDM Skills Lab

FDM Trainee - Software Engineering:

FDM Skills Lab | Apr 2025 – Present

Developed Agile web-based applications, contributing to high-performance IT solutions in fast-paced environments.

- **Agile Software Development: Fundamentals, OOP Essentials and AI Integration**

Learned Agile and Scrum concepts, enhanced AI prompting efficiency, covered foundational OOP principles, and started using version control with GitLab.

- **Advanced Coding Techniques: Clean Code, Unit Testing, Design Patterns & Multithreading**

Used Collections and Generics to manage data, executed tasks concurrently with Multithreading, and applied SOLID principles for maintainable and flexible software. Utilized SonarLint for static code analysis and implemented TDD with JUnit and Mockito to enhance design and maintainability.

- **Data Management & Advanced Programming: SQL Fundamentals, Logging, Lambdas, and Streams Integration**

Utilized SQL for database management, handling data with joins, subqueries, and functions. Leveraged Java 8 features like streams and lambdas to process collections in a functional, concise, and readable way. Used logging to assist support teams in troubleshooting and monitoring.

- **Software Development: API Development using SpringBoot**

Focused on API development using Spring Boot to create REST APIs. Emphasized unit and controller testing within Spring, along with Spring Data JPA, Web Client, and Micro services architecture.

- **Web Development using Angular**

Worked on front-end design using HTML, CSS, and Bootstrap. Developed a single-page application with Angular, consuming REST APIs from SpringBoot backend. Implemented routing and HttpClient for API communication.

Experience

Software Applications Developer I

Texas A&M University | August 2023 – November 2024

Description: Contributed to full-stack development and process automation at TAMULib, enhancing internal tools and participating in open-source initiatives. Gained hands-on experience with UI redesign (AngularJS and React), backend development (Java and PHP), and DevOps tools (Docker) within academic library systems.

- Installed and documented DSpace 7.6 for Windows to support digital repository development.
- Redesigned the internal helpdesk UI by customizing CSS and enhancing usability.
- Updated and maintained frontend code for MyLibrary, resolving issues via Kace ticketing system.
- Integrated Google Analytics into multiple library web applications for usage tracking.
- Participated in 8 FOLIO development sprints (including 1 open-source), contributing to backend workflows, containerized deployments with Docker, and collaborative development using GitHub and Camunda.
- TAMU GitHub URL - <https://github.com/rhundal7>

FastTrack Developer Apprenticeship

Cook Systems | Dec 2022 – Feb 2023

Description: Worked on several backend and full-stack projects during an intensive developer apprenticeship, gaining hands-on experience in RESTful API development, frontend design, and collaborative software engineering:

- **Project Management App** - Created backend endpoints for user management, announcements, and project tracking using Spring Boot. Contributed to frontend planning with the ReactJS team and tested API functionality with Postman.
- **Other Related Projects** - Contributed to additional backend and full-stack projects during the apprenticeship, including team-based builds and solo challenges. View projects on GitHub – <https://github.com/rhundal> and <https://rhundal.github.io/portfolio>

Project Lead

HCL America Inc. | Feb 2022 – Sep 2022

Description: Supported IT infrastructure deployment for Ascension Technologies clinics and hospitals by streamlining project coordination, improving communication between teams, and ensuring timely completion of deliverables through structured reporting and collaboration.

- Enabled AT and HCL in successfully installing IT Infrastructure for AT clinics and hospitals through synthesizing data by creating new templates for team members.
- Ensured that resources were utilized effectively through collecting and publishing project/program reports to various stakeholders (within and outside HCL)
- Improved communication between AT and HCL teams across various levels by maintaining deliverables in the central repository.
- Accomplished project milestones by coordinating periodic reviews, tracking meeting minutes and closing action items in a timely manner to meet deadlines.
- Enabled timely completion of the projects by responding to inquiries, problems, or questions about Field Services

Education

BS.C. in Computer Science

University of Wisconsin – Superior / August 2004 – May 2007

Post graduate Diploma in Project Management

The University of Winnipeg PACE – Manitoba, Canada | May 2018 – May 2019
