

Rajeshkannan Sekar

SQL Developer / Data Analyst

☎ +1 (726)219-9791 mr.rajeshkannan@gmail.com 🏠 San Antonio, TX- 78240. [🌐 LinkedIn](#)

Profile

- Results-driven professional with 8+ years of experience in SQL development, leading end-to-end decision-making for ETL processes. Proficient in database optimization, data engineering, OLTP, OLAP, data warehousing, query tuning.
- Recognized and awarded for strong analytical skills, problem-solving capabilities, and attention to detail. Passionate about overcoming complex challenges and delivering impactful, results-oriented solutions that drive business success.

Awards & Certifications

- Recognized and awarded by both client and management for the ORIENTAL INSURANCE project, independently uncovering insights and reducing data errors that significantly improved the quality of a decade's worth of data across all Lines of Business (LOBs) in the Insurance Information Bureau of India (IIB) data warehouse. (Feb. 2023) - [LinkedIn](#)
- Earned the Hacker rank SQL (Advanced) Certification. (Feb. 2025) - [Hacker rank](#)

Professional Experience

Role: Specialist-Software Development, *Org: (Azentio Software Pvt.Ltd)* **Chennai, India** 10/2020 - 10/2023

- For Oriental Insurance Client, I led Data Build, Cleaning, and Performance Tuning of all LOB tables in DWH for the IIB Extraction process. I took ownership of DWF Tables and Packages. enhancing query performance and ensuring data integrity.
- Spearheaded end-to-end design and execution of data build and ETL processes, ensuring seamless, reliable data transfer from OLTP systems to OLAP data warehouses for high-performance analytics and reporting.
- Mentored and provided technical guidance to junior developers, assisting them in understanding business logic, query optimization, etc. Demonstrated the ability to **work independently**, ensuring efficient problem-solving.
- Integrated Python scripts with SQL Developer to automate data extraction, transformation, and loading (ETL), significantly reducing manual intervention and processing time.
- Created complex DML statements involving multiple tables joins to retrieve and manipulate data across various related tables.
- Collaborated with cross-functional teams to define KPIs and automate data validation, improving reporting accuracy and efficiency.
- Familiar with Agile/Scrum methodologies and actively participated in sprint planning, code reviews, and continuous integration activities to align with SDLC best practices.

Role: Retainer Engineer, *Org: (Aforeserve Ltd)*

Chennai, India 04/2018 - 02/2020

- For the India Cements client, Transformed raw data into meaningful reports and dashboards using SQL and BI tools, enhancing visibility into business performance.
- Designed and implemented indexing and partitioning strategies to enhance query performance and data retrieval.
- Performed in-depth data analysis to identify trends, anomalies, and insights that supported strategic decision-making.
- Automated routine database operations such as data loads, backups, and log cleanups using Unix shell scripts, improving efficiency and minimizing manual intervention.

Role :Associate, *Org: (HCL Infosystem Ltd)*

Pondicherry, India 01/2015 - 11/2017

- Created complex DML statements involving multiple tables joins to retrieve and manipulate data across various related tables.
- Knowledgeable in handling large-scale data migration and reconciliation tasks, ensuring data integrity, consistency, and minimal downtime.
- Automated routine database operations such as data loads, backups, and log cleanups using Unix shell scripts, improving efficiency and minimizing manual intervention.
- Tracking data flow Monitoring, logging errors, monitoring job performance, and ensuring compliance with standards.

Education

Master of Computer Applications *Aalim muhammed salegh college of engineering*

Chennai, India 2011-2014

BSc Computer Science *Nazareth college of arts and science*

Chennai, India 2007-2010
