EDUCATION

Northeastern University, Boston, Massachusetts

Sep 2024 – Present

Master of Science in Computer Science - GPA: 4.0

Courses: Programming Design Paradigm, Database Management Systems, Computer Systems, Algorithms

Boston University Questrom School of Business, Boston, Massachusetts

Sep 2018 – May 2022

Bachelor of Science in Business Administration

Concentration: Business Analytics; Minor: Computer Science

Information Systems: Advanced SQL and Microsoft Access Skills

Jan – May 2021

- Configured tables, selected primary key fields, formed appropriate relationships and foreign keys on Access and PostgreSQL
- Proficient in writing SQL queries to extract, manipulate, and analyze large datasets, optimizing database performance and ensuring data accuracy.
- Designed data visualization projects using Tableau Desktop and created Dashboards to gain insights into company performance relative to industry

Massachusetts Institute of Technology

Mar 2023 – Jun 2023

Applied Data Science Program

- Demonstrated proficiency in data analysis and visualization by successfully completing projects involving dimension reduction and cluster analysis using numpy, pandas, matplotlib, and seaborn. Gained experience with JSON parsing and manipulation in Python for handling structured data.
- Wrote Python scripts to automate data wrangling tasks, including cleaning, merging, and reformatting structured datasets using libraries like json, pandas, and numpy

PROJECTS

Clinic Management System: Model, View, Controller - <https://github.com/rajivrny/clinic-management-system>

- Designed a modular architecture featuring distinct Room, Patient, Staff, and Clinic classes, ensuring separation of concerns and scalability with functionality to initialize the model from a text file, enabling seamless clinic setup and data persistence.
- Developed both text-based and GUI controllers using the command design pattern, enabling user-friendly interaction through console commands or clickable UI elements while enhancing maintainability and flexibility.
- Created a visual representation of the clinic layout, including room assignments and staff-patient mappings, as a JPanel/JFrame.
- **Languages:** Java, Singleton Pattern, Factory Pattern, JUnit, javax.swing, Version Control, Command Design Pattern

Analysis of Wildlife Strikes in Commercial Aviation - <https://github.com/rajivrny/wildlife-strikes>

- Extracted, transformed (ETL) 25,000+ rows of wildlife strike data into MySQL database using batch processing.
- Utilized database to gain insight through SQL queries for analysis and visualization to create clear, informative graphs.
- **Languages:** R, MySQL, DBI, lubridate, uuid, Batch Processing, ETL Pipelines, Relational Database Design, Foreign Key Constraints, Version Control (Git), Markdown Documentation

SKILLS

Programming: Java, SQL, Python (JSON, Pandas, Numpy, Scikit-Learn), R, JavaScript, Jupyter Notebook, Git/Github, LucidChart, JUnit, Mockito, Tableau, LaTeX, MySQL, Matplotlib

Microsoft Tools: Word, PowerPoint, Excel, Access, Microsoft Project, and Visual Basic

Certifications: Tableau Certified Desktop Specialist

WORK EXPERIENCE

Wolfe Research LLC, New York City, New York

Sep 2022 – June 2023

Data Research Assistant

- Created financial models (Excel) and maintained graphs for 30+ companies within the Telecom and Global Internet industries to reflect critical company data in a digestible format for clients in the form of 15+ PowerPoint presentations
- Interpreted quarterly sales reports and collaborated with team members to formulate notes for 30+ companies saving 10 hours per week of research and ultimately used in quarterly events which each generated \$10,000+ of revenue
- Used Salesforce CRM to generate visual metrics from 200+ research papers and webcasts, analyzing interactions, views, and engagement to enhance the experience for 5,000+ clients
- Transformed raw Telecom provider data containing 5,000,000+ entries from the Federal Communications Commission (FCC) by region into a structured format using R, creating pivot tables to enhance data presentability
