Summary

Experienced statistical Programmer with strong background in SAS programming within pharmaceutical & biotechnology industry, supporting clinical trials across phase I to IV. Extensive experience in developing and validating SDTM and ADaM datasets, generating TLFs (Tables, Listings, and Figures), and ensuring compliance with CDISC, FDA, and ICH guidelines. Skilled in collaborating with biostatisticians, data management, and clinical teams to deliver high quality, submission ready outputs. Strong knowledge of clinical trial processes, GCP standards, and end to end statistical reporting. Demonstrated ability to collaborate with global teams.

Skills

SAS	Base SAS, SAS/MACROS, SAS/SQL, SAS/GRAPH, SAS/ODS.
SAS Procedures	FREQ, TRANSPOSE, REPORT, TABULATE, UNIVARIATE, MEANS, SUMMARY, DATA_NULL_.
Platforms	UNIX, Windows (SAS 9.4, SAS studio, SAS system viewer)
Microsoft Office	Word, Excel, PowerPoint, Access
Soft Skills	Strong Organizational and time management skills
Databases:	NCBI, Protein Data Bank, Swiss-Port
Software:	AutoDock, Azure Data studio, Docker, Quantum 3.3.0, Hex5.1, Pymol, and Spdv viewer
Instruments:	HPLC, GC, UV spectrophotometer, IR spectrophotometer

Experience

Pfizer, USA	June 2019 - July 2024
Statistical Programmer (Contract)	
• Worked on different therapeutic areas like Oncology, Rheumatoid Arthritis, Ulcerative Colitis, and COVID-19. • Generated TLFs for safety and efficacy analysis using SAS/Base, SAS/Macros and SAS/Graph. • Worked on creating and validating SDTM specification and datasets according to CDISC standards. • Extensively worked on generating and validating ADaM specifications and datasets to support analysis and reporting. • Created and reviewed SDTM/ADaM submission packages by creating, and reviewing aCRF, control terminology, patient profile, SDRG (SDTM Reviewers Guide), ADRG (ADaM Reviewers Guide), and Define.XML specifications for regulatory submissions. • Reviewed project-related documents, including protocol, SDTM/ADaM specifications, SAP, TLF shells to ensure alignment with project objective and compliance. • Worked on CSR, PSUR, RMP, PMP, DSUR, DMC, EU/BR submissions. • Worked on ad-hoc and analysis and responded to manuscript/publication requests, providing additional analysis as needed for ongoing clinical studies and regulatory support. • Programmed and validated ISS datasets and safety TLFs ensuring consistency across multiple studies and adherence to CDISC. • Collaborated with clinical, statistical, and data management teams to coordinate the collection, querying, and reporting of clinical trial outcomes, ensuring timely and accurate results.	
Rang Technologies, USA	July 2018 - June 2019

Data Analyst (Intern)

- Worked on oncology phase II study.
- Developed SDTM datasets and specifications (e.g., DM, DS, VS, MH, EX) and ADaM datasets and specifications (e.g., ADSL, ADAE, ADTTE) as per CDISC standards.
- Used RECIST criteria to evaluate tumor response (BOR and OR).
- Conducted data transformation and manipulation using procedure such as PROC TRANSPOSE, PROC FORMAT, and PROC INFORMAT to prepare datasets for analysis and reporting.
- Gained experience in joining multiple datasets using SQL joins and the MERGE statement, streamlining data integration, and ensuring consistency across different datasets.
- Developed macro for report generation.
- Developed SAS programs to create safety and efficacy outputs as per mock shells and SAP.

NYC Health + Hospitals/Harlem, USA

Jan 2017 - Apr 2017

Intern, Infection Control Department

Volunteer, Infection Control Department

Mar 2018 – July 2018

- Conducted daily monitoring of transmission-based precautions (airborne, droplet, contact, droplet & contact, airborne & contact) to ensure that patients are properly isolated in different units (Intensive care unit (ICU), Surgery, Critical care unit (CCU), Neonatal intensive care unit (NICU), and Pediatric Intensive care unit (ICU)).
- Worked on antimicrobial stewardship program.
- Actively participated in ensuring accuracy and analysis of infection control data that includes number of healthcare associated infections presented to Infection control committee (ICC) on the monthly basis.
- Attended several training sessions related to infection prevention principles: safe injection practices, Personal protective equipment (PPE), Occupational safety health administration (OSHA) & hand hygiene at the network of new employee orientation, hospital specific new employee training and yearly updates.
- Participated in the development and implementation of corrective actions undertaken to correct and manage issues that may be of an infectious or communicable nature.
- Monitored call bell response time to ensure timely response to patients and designed strategies to overcome high volume of call bell.
- Audited sterilization reports of the central sterile unit to ensure compliance with the documentation.
- Actively participant in all compliance trainings modules including annual physical, mandatory training, health insurance portability and accountability act (HIPPA), Patient safety etc.
- Conducted rounds throughout the hospital, under the guidance of the infection preventionists, focuses on patient care area for case findings and reporting communicable diseases.
- Monitored and documented staff and visitor's compliance with infection control practices.
- Monitored staff for adherence to evidence-based practices on each floor.
- Actively participant in education of staff members and monitoring of standard infection practices.
- Collaborated with infection preventionists in the review, revision and drafting of infection prevention and control policies and procedures.
- Worked on designated project related to infection Prevention in Healthcare, such as, Central Line Associated Bloodstream infections (CLABSI), Catheter Associated Urinary Tract Infections (CAUTI), and Hand Hygiene Compliance Audits.

Monroe College, USA

Sept 2017 – Dec 2017

Tutor

- Assisted graduate students with writing research projects, assignments and reviewed student papers for clarity, structure, and academic integrity.
- Provided ongoing academic support, helping students understand course materials and improve their academic performance.
- Coordinated student appointment with writing specialists and faculty members to ensure effective academic support.
- Tutored students in Microsoft Excel for statistical analysis, Biostatistics, and the Blackboard Learning Management System (LMS), focusing on new students' technical skills development.

- Administered written assessment as assigned, ensuring fair and accurate evaluation of students' progress.

Education

- Pursuing **DBA**, Belhaven University, USA
- **Master of Science in Data Science and Analytics**, New England College, USA
- **Master of Science in Computer information systems and cybersecurity**, New England College, USA
- **Master of Public Health in Epidemiology and Biostatistics**, Monroe College, USA
- **Master of Technology – Bachelor of Technology (dual degree) in Biotechnology**, Lovely Professional University, India
