Professional Summary

Analytical and detail-oriented Data Analyst with over 5 years of experience delivering data-driven insights across banking and healthcare domains. Proficient in transforming complex data into actionable intelligence using SQL, Python, Power BI, and Tableau. Skilled in building automated ETL pipelines, predictive models, and dashboards that enhance decision-making and operational efficiency. Adept at collaborating with cross-functional teams to align analytics solutions with business goals.

Technical Skills

Data Analytics & Visualization: Power BI (Advanced – KPI Dashboards, Row-Level Security), Excel (PivotTables, Power Query, Macros), Tableau, SQL (Advanced Queries, Joins, Window Functions), PostgreSQL, Python (Pandas, NumPy, Matplotlib, Scikit-learn), R.

ETL & Data Engineering: ETL Development & Automation, AWS Glue, Apache Airflow, dbt, AWS Lambda, Step Functions, Data Validation & Transformation.

Data Modeling & Architecture: Dimensional Modeling (Star/Snowflake), OLAP, Data Lineage, AWS Glue Catalog, CloudWatch, Audit-Ready Pipelines.

Machine Learning & Predictive Analytics: SageMaker, MLflow, Scikit-learn, Feature Engineering, Statistical Forecasting.

Cloud & Databases: AWS (S3, Redshift, Athena, Glue, Lambda, IAM), Google BigQuery, SQL Server, Snowflake.

Business Intelligence & Reporting: KPI Tracking, Trend Analysis, Forecasting, Root Cause Analysis, Executive Reporting.

Collaboration & Project Management: Agile/Scrum, Jira, Confluence, Git, Microsoft Teams.

Domain Knowledge: Banking Analytics, Regulatory Reporting, Healthcare Quality, HIPAA Compliance.

Education

Master's in Computer Science – Auburn University at Montgomery, Alabama (June 2024)
Coursework: Data Intensive Computing, Statistical Analysis, Machine Learning, Data Visualization.

Professional Experience

Data Analyst – Capital One, USA | Sep 2024 – Present

- Analyzed large-scale complaint, quality, and risk datasets using SQL, Python, and BigQuery to identify performance gaps and forecast risks.
- Developed interactive Power BI dashboards integrating Redshift and PostgreSQL data, improving reporting efficiency by 65%.
- Built automated ETL workflows using AWS Glue, Airflow, and dbt with 99% data validation accuracy.
- Applied ML models in scikit-learn and SageMaker to detect anomalies and predict failure trends.
- Designed data architecture and governance frameworks in AWS Glue Catalog and CloudWatch.

ensuring full audit traceability.

- Partnered in Agile sprints with cross-functional teams to deliver scalable analytics solutions.

Data Analyst – Cognizant, India | Jan 2020 – Apr 2023

- Designed Power BI and Tableau dashboards to monitor key banking KPIs such as loan performance and credit risk exposure.
- Developed SQL-based ETL workflows to extract and clean multi-source financial data improving accuracy by 35%.
- Built Python scripts for transaction-level fraud detection and anomaly tracking.
- Created predictive models using Scikit-learn to forecast delinquency rates and identify high-risk customers.
- Automated reporting via Power BI Service scheduling, reducing manual effort by 40%.
- Partnered with finance and compliance teams to enhance audit and regulatory reporting.

Academic Projects

- **Healthcare Outcome Prediction:** Developed ML models (Logistic Regression, Random Forest) to forecast patient recovery outcomes using 500K+ records.
- **E-commerce Customer Behavior Analysis:** Processed 100M+ interactions using Hadoop, Spark, and Kafka; built Power BI dashboards improving marketing efficiency by 20%.
- **Financial Market Predictive Modeling:** Built ARIMA, LSTM, and Gradient Boosting models improving forecast accuracy by 25%.
- **Music & Mental Health Analysis:** Applied K-Means and PCA to identify links between music preferences and mental well-being.
