ABOUT ME

Software Engineer with 3 years of experience in building data-driven applications, leveraging modern technologies, and applying machine learning techniques. Strong background in data mining, statistical analysis, and handling high-volume real-time data streams. Passionate about healthcare informatics and deploying AI/ML models in cloud-based environments.

CORE COMPETENCIES

Integration Platforms: MuleSoft, EDI, SAP Rollouts

Cloud Technologies: Azure, AWS, OpenShift

API Management: MuleSoft API Manager, RESTful APIs, API security, policy enforcement

Development & Architecture: Service-Oriented Architecture (SOA), Microservices, System Design

Database Management: MySQL, Redis, MongoDB

Tools: Docker, Kubernetes, Git, Jenkins, CI/CD, Kafka

Project Management: Offshore team management, Agile Methodologies, Solution Design, Code Review

PROFESSIONAL EXPERIENCE

AI & Software Engineering Intern

Jan 2025 – May 2025

Assembli AI, Omaha (NE), USA

- Early AI employee at Assembli AI, optimizing construction workflows and reducing cost estimation and proposal generation time from **50+ hours** to minutes.
- Developed an end-to-end pipeline for real-time invoice data extraction and pattern matching using Large Language Models (LLMs).
- Improved data ingestion and processing efficiency for high-volume real-time data streams, reducing processing time by **80%**.

Full Stack Developer

Feb 2024 – Dec 2024

SkyRang, Gwalior(MP), INDIA - (www.skysrang.com) - Personal Initiative

- Co-founded and developed an online decoration service web application from scratch with a content and order management system using JSP, Java, Hibernate, MySQL, HTML, CSS, Bootstrap, and JavaScript streamlining service ordering and admin management.
- Deployed the website on AWS, serving over **700 users** across **3 cities** in India.

Software Development Engineer

Jul 2021 – Jan 2024

Reliance Jio Infocomm Limited, Bangalore (KA), INDIA

- Designed and developed CAAS (Cache as a Service), a centralized cache management system, handling **800 GB** of data for **4 teams** in an agile environment.
- Ensured high availability, data persistence, and scalability, handling up to **1500 requests** per second, with easy integration as a separate cache layer.
- Managed deployments and resolved exceptions for FeatureHub, reducing Change Lead Time (CLT) by **75%** for independent features deployment.

Skills used: Java, SpringBoot, MySQL, Redis, Kafka, REST APIs, JUnit, Kubernetes, System design.

OTHER IMPORTANT PROJECTS

Cancer Subtype Analysis using Machine Learning, Master's Project

Jun 2024 – Dec 2024

University of Nebraska, Omaha (NE), USA

- Designed C3MOD, a Python-based library for clustering cancer subtypes using multi-omics data (miRNA, mRNA, and methylation).
- Processed high-volume healthcare datasets (**8K+** patient records) utilizing machine learning and bioinformatics techniques (Link: [GitHub](#)).
- Implemented cloud-based model deployment, enabling researchers to analyze large-scale patient data efficiently.

ADDITIONAL SKILLS

- Expertise in designing and deploying enterprise integration solutions with Mule ESB and Any Point platform.
- Strong understanding of data governance, API development, and security best practices.
- Hands-on experience with MuleSoft API Manager for policy enforcement and API management.
- Proficient in troubleshooting and mentoring junior developers in the design and implementation process.

EDUCATION

University of Nebraska at Omaha (NE), USA

Expected May 2025

Master of Science in IT Innovation | 4.0/4.0 GPA.

Indian Institute of Technology (IIT), Roorkee, India

May 2017 – June 2021

Bachelor of Technology, Electronics and Communication Engineering
