

Rajvi Soni

Data Analyst

rajvi@jobemails.net | (574) 327-0447 | USA | [Linkedin](#)

Summary

Analytical and results-driven Data Analyst with over 2 years of experience specializing in customer demographics analysis, e-commerce data insights, and segmentation. Proficient in Python, SQL, Power BI, and cloud platforms like AWS and Azure, with expertise in creating interactive dashboards and automating data workflows. Skilled in leveraging tools like AWS S3, Glue, and QuickSight to optimize data processing and improve operational efficiency. Adept at conducting exploratory data analysis (EDA), applying statistical modeling, and providing actionable insights that support marketing strategies and data-driven business decisions.

Technical Skills

- Programming Languages:** Python (Pandas, NumPy, SciPy, Matplotlib, Seaborn), SQL (Joins, CTEs, Window Functions), R
- Data Visualization:** Power BI, AWS QuickSight, Tableau
- Database Management:** MySQL, PostgreSQL, AWS Redshift, AWS S3
- Cloud Platforms:** AWS, Azure
- Statistical Analysis:** Hypothesis Testing, Regression Analysis, Predictive Modeling, Scenario Analysis
- Data Validation Tools:** Python (Pytest), Excel (VBA, Power Query)
- Data Analysis Tools:** Jupyter Notebooks, Google Analytics, PySpark
- Project Management:** Agile Methodology, Jira, Confluence

Professional Experience

Data Analyst, Genpact 01/2024 – Present | Remote, USA

- Conducted customer demographics analysis by extracting data from various sources, including databases and surveys, and cleaning it using Python (Pandas, NumPy) to ensure accurate, reliable, and structured datasets for further analysis.
- Utilized AWS S3 for storing large customer datasets and AWS QuickSight for creating interactive dashboards to visualize demographic trends, customer distribution, and purchasing behavior, enabling stakeholders to make data-driven marketing decisions.
- Segmented customers based on factors such as age, gender, location, and spending behavior using SQL queries, delivering insights into target audiences and helping the marketing team optimize campaigns based on key demographics.
- Performed exploratory data analysis (EDA) to identify trends and patterns in customer behavior. Visualized findings through histograms, scatter plots, and heatmaps using Python libraries like Matplotlib and Seaborn for easy interpretation.
- Automated data pipelines using AWS Glue to integrate and clean data from multiple sources, ensuring smooth data flow and reducing manual processing time, leading to faster and more efficient reporting and analysis.
- Generated detailed reports and dashboards in Power BI, focusing on customer segmentation and key demographic factors. Provided actionable insights that helped the business tailor product offerings and marketing strategies to specific customer groups.

Data Analyst Intern, Lifetime Brands, Inc. 01/2023 – 12/2023 | Remote, USA

- Analyzed e-commerce transaction data by extracting and cleaning datasets, focusing on customer purchasing patterns and product combinations, to gain insights into market trends and improve sales strategies.
- Applied association rule mining techniques to uncover frequently purchased products together, enabling the identification of key items for cross-selling and marketing campaigns.
- Wrote optimized SQL queries to segment transaction data by customer demographics, product categories, and seasonal trends, delivering actionable insights for sales and marketing teams to enhance product recommendations.
- Created interactive Power BI dashboards to visualize product affinities, customer behavior, and market trends, empowering stakeholders with real-time insights to support decision-making and optimize business strategies.
- Implemented data validation techniques with SQL and Python to ensure data integrity, performing anomaly detection and ensuring the reliability of insights and reports shared with cross-functional teams.

Education

Bachelor of Technology , Kent State University of Ohio	Ohio, USA
Computer Information Systems	10/2020 – 10/2024
