

RAKESH BADAM

Full Stack Software Developer | Angular | Java | AWS Certified | Microservices
Fairfax, VA | 703-646-0798 | rakeshbadam7799@gmail.com |[linkedin.com/in/rakesh981](https://www.linkedin.com/in/rakesh981)

Summary

Full Stack Developer with 4+ years of experience delivering enterprise applications using **Angular (9+), Java, and Spring Boot**. Skilled in building scalable **microservices** and responsive UIs, with expertise in **XML, XSLT, JAXB, JAXP, MVC design pattern, and Spring Security**. Proficient in **Terraform, Helm, and Kubernetes** for cloud-native deployments. Strong background in **Agile/Scrum, CI/CD pipelines, and production support**. Experienced in **AWS (EC2, S3, RDS, Lambda, API Gateway)** for secure, high-availability solutions. Consistently drive business impact through cost savings, reliability, and customer retention.

Core Skills

Frontend: Angular (RxJS, NgRx, Lazy Loading, Micro Frontends), Angular 9+, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap
Backend: Java, Core Java, Spring Boot, Spring MVC, RESTful APIs, GraphQL, Hibernate/JPA, XML, XSLT, JAXB, JAXP, Maven, Gradle
Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, API Gateway), Docker, Kubernetes, Jenkins, GitHub Actions, Git, GitLab, Serverless
Infrastructure as Code (IaC): Terraform, AWS CloudFormation, Ansible, Helm,
Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Oracle, NoSQL
Messaging: Kafka, RabbitMQ, ActiveMQ
Testing: JUnit, Mockito, Postman, Cypress, Selenium, API Test Suites
Monitoring: Grafana, Prometheus, Datadog, ELK (Elasticsearch, Logstash, Kibana), AWS CloudWatch
Security: Spring Security, OAuth2, JWT, OWASP Standards
Optimization: Query Tuning, Redis/Memcached Caching, Load Balancing, Application Profiling
Methodologies: Agile (Scrum, Kanban), TDD, Code Reviews, Sprint Planning, Design Patterns, Architecture Reviews

Certifications

- AWS Certified Developer – Associate (2024)
- Service-Oriented Architecture – Coursera

Experience

Full Stack Software Developer

Principal Financial – Fairfax, VA | 06/2024 – Present

- Built Angular components (Angular 9+, RxJS, NgRx) with **MVC architecture**, lazy loading, and reusable modules, improving UI performance by 25% across 200K+ users.
- Developed **Spring Boot microservices** handling 20K+ daily financial transactions with an average response 450ms, applying **Singleton and Factory design patterns**.
- Automated infrastructure provisioning using **Terraform, Helm, and Kubernetes**, reducing deployment time by 40%.
- Managed **AWS cloud resources** (EC2, RDS, Lambda, API Gateway) to maintain 99.9% uptime, ensuring business continuity for mission-critical financial systems.
- Designed **observability dashboards** with Grafana, Prometheus, and Datadog, enabling proactive issue detection and reducing MTTR by 20%.
- Actively participated in **architecture reviews and design discussions**, ensuring scalability and alignment with enterprise best practices.
- Provided **production support for critical microservices**, resolving incidents quickly and ensuring SLA compliance.

Associate Software Engineer

Tata Consultancy Services – India | 06/2021 – 06/2022

- Delivered enterprise-grade apps using **Java, Spring Boot, Angular, MySQL, and XML/XSLT transformations**, reducing API response times by 20% for customer-facing modules.
- Designed and maintained **CI/CD pipelines** with Jenkins and GitHub Actions, cutting release cycles by 30% and enabling rapid deployments with minimal errors.
- Deployed scalable apps on **AWS ECS and Lambda with Kubernetes orchestration**, supporting 50K+ end users during peak loads with zero downtime.
- Integrated secure **REST APIs** with **Spring Security, OAuth2, and JWT**, ensuring authentication and compliance with enterprise standards.
- Built and optimized **Kafka/RabbitMQ pipelines** to process high-volume messages, reducing data processing delays by 40% across distributed systems.
- Contributed to all phases of the **Software Development Life Cycle (SDLC)**, from requirements gathering and design through development, testing, deployment, and maintenance
- Involved in **project life cycle activities**, from design to deployment and production support, in a global delivery environment.

Software Developer

Settle Metal – India | 05/2019 – 03/2021

- Built an **e-commerce platform** using Angular + Spring Boot, improving user experience and transaction processing speed, and supporting 5K+ daily active users.
- **Containerized** legacy Java services into **Docker images**, orchestrated with **Kubernetes**, enabling **zero-downtime deployments** and reducing infrastructure costs by 15%.
- Improved performance by introducing **Redis caching and load balancing**, lowering server costs and enhancing page load speed by 30%.
- Automated workflows using **Camunda BPM**, streamlining business processes and reducing manual effort across operations teams.
- Applied **Observer and Strategy design patterns** in service development, enhancing maintainability and scalability of modules.

Education

Master of Computer Science – George Mason University, Fairfax, VA | 2024

Bachelor's of Computer Science - GITAM University, Hyderabad, India
