WORK EXPERIENCE

Katpro Technologies

March 2024 – Present

Software Developer

Tampa, FL

- Designed and implemented automated business workflows for Coke Florida, leveraging Nintex and SharePoint to digitize manual processes, integrate external systems through Power Automate, and optimize internal form processing. Delivered measurable improvements in efficiency, reducing processing time and enhancing cross-departmental collaboration.
- Designed and optimized LLMs and deployed NLP solutions, enhancing product functionality, process accuracy, and scalability.
- Reduced manual intervention by 40% and improved data accuracy by designing and implementing a system to automate promotional data workflows, campaign analysis, and optimization using Microsoft Graph Query API.
- Enhanced operational efficiency by 60% by building NLP automation using Anthropic API process to streamline repetitive tasks.
- Boosted productivity by 50% by developing a scalable assistant using Make.AI for task scheduling, information retrieval, and workflow orchestration.

Commonwealth Financial Network

Jan. 2023 – July 2023

Software Development Engineer Intern

Waltham, MA

- Led the integration of complex website designs into responsive, dynamic CMS platforms using HTML5, CSS3, JavaScript, enhancing web functionality and user experience while adhering to UX/UI best practices and accessibility standards.
- Utilized Google Analytics for web optimization, performed comprehensive site audits, and implemented responsive design strategies to increase site performance and user engagement.

EDUCATION

Northeastern University

Dec. 2023

Masters in informatics

Boston, MA

SRM University

June. 2021

Bachelor of Engineering in Computer Science

Chennai, India

- Related courses: AWS Cloud Architecture, Information Systems Design, Database Management System, Web Development, Data Structures, Object-Oriented Programming, Programming in Java, PHP, Computer System, AI, Algorithms, Software Engineering Principles, Operating Systems, Program Design

CERTIFICATIONS, SKILLS & TOOLS & FRAMEWORKS

- Certifications:** AWS Solutions Architect Associate, AWS Cloud Practitioner, Google Analytics, IBM Docker Essential.
- Skills:** Java, C++, Python, R, JavaScript, Typescript, ReactJS, NodeJS, Redux, XML, SEO, DOM, MacOS
- Tools and frameworks:** Git, Agile, Jira, Jenkins, TDD, Kubernetes, DevOps, MySQL, SQLite, Firebase, MongoDB, AWS, Azure

PROJECTS

Klayscale – Clayshoot Event Management and Scoring System (<https://klayscale.com/>)

Katpro Technologies

Tampa, FL

- Led the development and optimization of Klayscale platform using React for UI and Firebase for real-time data syncing, improving user engagement and system performance by 40% and enabling support for 5x more traffic.
- Engineered and deployed Firebase Cloud Functions and Firestore for serverless backend and real-time data processing, reducing backend complexity and improving data retrieval speed by 30%.
- Implemented secure user authentication with Firebase Authentication and optimized state management using React Hooks, Context API, and Redux, enhancing application scalability, performance, and user experience. Led the development and successful deployment of a software solution, functional across platforms and available on both the Play Store and App Store.

APSync

Katpro Technologies

Tampa, FL

- Developed a text extraction and reconciliation solution for purchase orders and invoices. Processed and stored data in NoSQL database. Frontend: Angular; Backend: Java/Vertex.
- Developed features for payment advice uploads using NIFI and Kafka, and APIs for partial payments, payment reconciliation, and ledger uploads.

Image Editing Application Using the MVC Principles

Northeastern University

Boston, MA

- Engineered an advanced image manipulation tool using Java, leveraging Object-Oriented design concepts, MVC and Command design principles. Developed a robust GUI using Java Swing framework, providing extensive configuration controls for better user experience. Enabled multiple operational modes (Interactive, Script and GUI) offer versatility.
