

RAKSHIT VASTRAD

Tucson, AZ | +1 - (520) 246-0234 | rakshitvastrad@gmail.com | [Tableau](#)

Summary

Data Analyst skilled in transforming complex datasets into actionable insights to drive strategic decisions. Experienced in SQL, Tableau, and Python for building dashboards, analyzing engagement trends, and benchmarking content performance. Proven track record in collaborating with cross-functional teams to optimize audience engagement and monetize content effectively.

Education

University of Arizona MS, Management Information Systems (GPA: 3.66/4)	Aug 2023 - Dec 2024
Visvesvaraya Technological University BE, Computer Science (GPA: 3.87/4)	Aug 2018 - Jun 2022

Experience

The University of Arizona Adjunct Professor - Databases with SQL	Aug 2025 - Present
- Instructed a class of 30 students on database management concepts, including ER diagrams, normalization, and advanced SQL queries for database creation and manipulation. - Managed 6 projects focused on designing company database models, enhancing each project's structure and performance.	

University of Arizona Research Assistant (Machine Learning)	Feb 2025 - Present
- Analyzed over 1,200 academic papers on personality prediction via social media using regression and clustering techniques to uncover underlying behavioral trends. - Utilized causal inference and confidence interval analysis to validate model robustness across variable conditions (CI: 0.05 to 0.5), demonstrating strong analytical skills. - Supported the creation of meta-models for ensemble learning evaluation, emphasizing data-driven insights in research methodologies. - Developed reproducible research workflows by integrating Airflow for scheduled data processing and pipeline management, ensuring data accuracy and reliability.	

University of Arizona Teaching Assistant (Data Mining)	Aug 2024 - Dec 2024
- Mentored 8 project teams through supervised machine learning projects using Python (scikit-learn, Keras, TensorFlow), emphasizing feature selection, A/B testing, and model tuning to derive actionable insights. - Designed and implemented real-time experiments and automated model pipelines using Git and Airflow, ensuring consistent data quality and workflow efficiency. - Coordinated peer code reviews to bolster code quality, enforce Git workflow standards, and promote a collaborative data analytics environment.	

Eller Dean's Office Marketing Data Consultant	Jan 2024 - May 2024
- Reduced Customer Acquisition Cost by 20% through predictive modeling and data segmentation analysis, providing clear insights into market performance. - Conducted clustering on 40+ MBA programs to benchmark brand presence and visualized outcomes in Tableau dashboards, facilitating strategic content and marketing decisions. - Developed regression models to forecast application volumes and inform marketing spend allocation, translating data findings into actionable business strategies.	

University of Arizona Product Manager (Carepy Project)	Aug 2023 - Dec 2023
- Decreased student therapy costs by 25% using causal inference to identify under-served segments, contributing to improved resource allocation. - Launched a Minimum Viable Product (MVP) and iterated the design based on A/B tested user feedback to optimize user engagement. - Managed data flow integrations and prototype development using Figma and SQL pipelines, ensuring robust data infrastructure and accurate reporting. - Conducted stakeholder interviews to translate strategic insights into actionable user stories and data-driven feature enhancements.	

Happiest Minds Technologies Java Developer	Aug 2022 - Jul 2023
- Optimized system performance by designing APIs in Java, leading to a 30% improvement in data processing times. - Improved system scalability and maintainability by implementing a multi-layered architecture using Java, AngularJS, Bootstrap, and MySQL.	

Relevant Projects

Analysis of Credit Card User Attrition Data	Aug 2024 - Jan 2025
- Cleaned and merged large-scale datasets (10,000+ rows), built models predicting attrition based on 15+ features. - Deployed model using AWS SageMaker and created interactive dashboards with Tableau.	

Amazon Prime Video Database Design	Aug 2023 - Dec 2023
- Built and normalized relational schema; deployed use-case simulations for video performance metrics. - Wrote optimized queries for data retrieval and reporting aligned with operational goals.	

Skills

Machine Learning & Statistics: Regression, Clustering, Time-Series Analysis, Causal Inference, A/B Testing, Classification, Deep Learning, Analytical Skills Languages & Tools: Python, Java, SQL, scikit-learn, TensorFlow, Keras, Git, SageMaker, Airflow, Tableau, Excel, Data Visualization Tools, Event Analytics Tools, Data Infrastructure Data Science Workflow: Data Mining, Data Cleaning, Feature Engineering, Model Training & Validation, Hyperparameter Tuning Other: MVP Design, Product-Market Fit, Figma, Oracle SQL Server
