Professional Summary

A highly skilled **Project Manager & Certified Scrum Product Owner (CSPO)** with **9+ years** of experience in Technology & Consulting.

- Specializes in Product Management, Digital Solutions, Business Intelligence, Data Visualization, Data Quality Governance, and Master Data Management.
- Worked extensively on **data-driven** projects, leading **cloud (SaaS)** solutions using **Agile (Scrum, SAFe, Kanban, Lean), Waterfall, and Incremental SDLC methodologies**.
- Strong expertise in **project leadership, stakeholder engagement, and business analytics** that has enabled to consistently drive measurable impact and business transformation to clients across industries like **Construction Equipment, FMCG, Health & Hygiene and Consumer Electronics**.
- Demonstrated success driving complete lifecycle execution leading large, global teams across **strategic planning, requirements, design, build, integration, SIT/UAT, production rollout, and support** to achieve measurable outcomes.
- Extensive collaboration with cross-functional teams including Database Engineering, API, UI/UX, QA, DevOps, and Product Management to deliver end-to-end solutions aligned with business goals and consistently recognized for ensuring smooth execution across client engagements.
- Strong capability in establishing **product vision, building roadmaps, and driving change management programs** aligned to enterprise goals and KPIs.
- Expert in **Salesforce Cloud for CRM** processes, with strong capability in creating actionable reports and dashboards that drive sales insights and business growth. Experienced across end-to-end business cycles including **I2M (Idea to Market), M2O (Market to Order), and O2C (Order to Cash)**.
- Advanced skills in **PLM, DevOps automation (Azure DevOps, JIRA, Terraform), Cloud & Network Integrations (Azure, F5, SAP, Mulesoft, Snowflake, Databricks), and Data Analytics (Power BI, SQL, ETL/ELT Pipelines)**, with strong capabilities in security compliance, root-cause analysis, and production support.

Education

- MBA: IIT Kharagpur, India (2016-2018)
- Bachelor of Engineering: BVBCET, India (2010-2014)

Certifications

- Certified Scrum Product Owner (CSPO)
- Lean Six Sigma Green Belt Certified

Core Competencies

- Global Project Delivery & Program Management (Agile and Scaled Agile Methodologies)
- Stakeholder Management, Enterprise Change Management, Vendor & Partner Management
- Risk & Issue Management
- Product Management, Product Ownership
- SDLC & Release Management
- Data Engineering, ETL / Integration & API-driven Architecture
- Business Intelligence and Reporting, OKR & KPI Alignment, Analytics Transformation Initiatives, Data Visualization

Tools & Technology:

- **Cloud, Data & Analytics:** Azure, Salesforce Cloud, Snowflake, Databricks SQL, Microsoft SSMS (SQL Server Management Studio), Power BI, SAP Analytics Cloud (SAC), Advanced Microsoft Excel
- **Enterprise Platforms:** SAP ERP, Salesforce (SFDC), PLM Optiva, Collibra (Data Governance)
- **Product & Collaboration Tools:** JIRA, Azure DevOps, Confluence, Figma

Achievements

- Live the DoT Award (2024) – Recognized for impactful contribution to the carbon footprint use case, demonstrating strong collaboration and client centricity.
- Move the DoT Award (2021)– Honored for driving change and innovation, client-first mindset, and courage in a high-impact client engagement.
- Live the DoT Award (2020)– Awarded for leading the automation of critical reporting programs and strengthening client relationships at Deloitte.
- Runners-up, Marksfeet (2017) – Marketing case study competition hosted by NITIE, Mumbai.
- Second Prize, The Times Group Sales Drive – Awarded for performance in a live sales project conducted at VGSOM, IIT Kharagpur.
- On the Spot Award (2014 - 2016) – Recognized thrice for exceptional client contributions at Tata Consultancy Services

Professional Experience

Project Manager— Deloitte

Bengaluru, India | May 2018 – Aug 2025

Centre of Excellence - Sales, for a global leader in lighting solutions

- Led Business Intelligence & Reporting program for C-suite executives and business transformation leaders, enabling data-driven decision-making.
- Drove automation of Market-to-Order (M2O), Quotation, and Pricing Management processes across 18 global markets, reducing manual effort and saving ~120 resource hours per month.
- Designed the Market Maturity Model to categorize markets and develop tailored sales strategies, supporting equitable goal-setting and business growth.
- Spearheaded the Self-Service Reporting initiative, scaling it to 10 global markets and reducing support incidents by 3x, while fostering a data-centric culture.
- Co-created a Commercial Excellence solution in collaboration with transformation leads, improving salesforce efficiency—boosting average customer visits per day (via SFDC) from 1.8 to 2.9.

- Led the integration of POS data to deliver real-time sell-out insights, enhancing supply chain agility; the successful pilot scaled to 200+ distributors across Europe.
- Played a key role in developing a Data Dictionary for the M2O domain, streamlining onboarding and ensuring consistent understanding of data structures.
- Demonstrated hands-on experience in data analysis, CRM, and project management, with proficiency in enterprise tools including SAP ERP, SAP Analytics Cloud, Salesforce (SFDC), JIRA, Snowflake, Power BI, Advanced MS Excel, Figma, Confluence, and Collibra

Product Owner for the world leader in construction equipment manufacturing

- Led implementation of digital product requirements for the Customer Success Office division such as Fleet Monitoring, Telematics Data Management, Machine Utilization & Productivity and Safety Services.
- Conducted detailed feature grooming and Software Requirement Specification (SRS) sessions to drive successful Program Increment (PI) planning for every release. This enabled to achieve delivery with zero customer bugs across four consecutive releases, positioning the team as top performers within the client's Digital & Technology practice.
- Championed complex features such as the "Track Savings" function, enabling a U.S. trucking client to save \$86K within three months of deployment of the feature.
- Assisted development teams by documenting UI flows in a structured format, covering all functional and edge case scenarios. This improved UI team's clarity of delivering the exact requirement and getting it first time right.
- Collaborated with Database Engineering, API, UI/UX, Data Visualization, QA, DevOps and Product Management teams to deliver end-to-end user centric and scalable solutions. In addition, provided hands-on UAT support using Snowflake, SSMS, and MS Excel to ensure high quality deliverables.
- Proficient in Agile and Scaled Agile (SAFe) methodologies with hands-on implementation experience.

Data Ownership and Data Quality for a global FMCG (Health & Hygiene) Client

- Led the Data Domain Squad as the Product Owner, responsible for the delivery of data products and management of core master datasets such as Customer Product, Material Master, Bill of Material, and Supplier Master for global markets.
- Led a strategic program to assess the company's Carbon Footprint by delivering a vital data product contributing to key sustainability goals. Achieved a 20% enhancement in data coverage compared to the previous year. The success of this program was covered as part of Reckitt's PR News. (<https://tinyurl.com/4xjyezmv>)
- Led the delivery of high-quality data products for R&D, Supply Chain, and Marketing, maintaining strict adherence to GxP (Good Practices) and CSV (Computer System Validation) compliance requirements.
- Partnered with the Data Governance Team to implement data management best practices, achieving a 2.5x improvement in data accuracy for PLM data within 6 months through master data enhancements and quality reporting.
- Led the Data Deduplication program with a strong focus on FAIR principles, achieving £8K in cost savings through reduced storage and computing requirements.
- Hands-on experience with tools such as Databricks SQL and Azure DevOps to support efficient development, data processing, and project delivery

Summer Intern — BenQ Corporation

Gurgaon, India | May 2017 – Jun 2017

Enterprise Business Opportunity for BenQ Monitors

- Researched BenQ's monitor portfolio and analyzed competitor positioning in the display market.
- Collaborated with Sales team to understand end-to-end procurement & sales processes while managing daily multi-channel customer inquiries. Analyzed customer behavior across order volume, frequency, engagement channels to uncover actionable insights.
- Identified and addressed conversion gaps through detailed Sales Funnel Analysis.
- Segmented the market to highlight key growth areas for BenQ's monitor portfolio.
- Supported the design and rollout of a brand awareness campaign for BenQ Zowie Monitors

Assistant System Engineer — TCS

Bengaluru, India | Sep 2014 – Jul 2016

Production Application Support (Apache Middleware) for a large investment bank

- Responsible for supporting the IT Infrastructure services for a leading German-based banking firm
- Monitored and resolved production issues (incident management), ensuring minimal disruption to operations adhering to client agreed SLA and ITIL best practices
- Oversaw production deployments and releases, ensuring smooth implementation of changes with minimal impact on banking websites availability.
- Improved process efficiency through automation and workflow optimization, leading to faster execution times
- Hands-on experience on Unix/Linux
