 Hollywood, FL

 www.linkedin.com/in/ram-akhil-mogili

Summary

Analytical and detail-focused Data Analyst with strong experience in transforming raw data into meaningful insights across enterprise systems. Skilled in SQL, Python, ETL development, data modeling, and dashboard creation. Adept at improving data quality, optimizing pipelines, and collaborating with cross-functional teams to deliver scalable analytical solutions. Experienced in working with cloud platforms, BI tools, and complex datasets to support business decisions, operational efficiency, and reporting accuracy.

Data Analyst

06/2025 – Present

American Airlines, Data Analyst

- Analyze LMS, training, and operational datasets to identify performance trends and improvement areas
- Develop dashboards and analytical reports using Tableau, SQL, Excel, and Python.
- Perform data cleaning, validation, and transformation to ensure accuracy and reporting readiness.
- Build automation scripts for recurring workflows, reducing manual effort and improving delivery speed.
- Collaborate with cross-functional teams to define data requirements and deliver actionable insights.
- Work with Snowflake, creating optimized queries, views, and reusable data models for analytics.
- Support cloud-based analytics using AWS (S3, Lambda, CloudWatch) for data processing and monitoring.
- Improve dashboard load performance through query optimization and data model restructuring.

07/2024 – 05/2025

Raytheon Technologies, Data Analyst Intern

- Built enterprise BI dashboards leveraging data from the corporate EDW to support operational and performance reporting.
- Performed statistical analysis to identify business trends and provide data-driven recommendations.
- Supported migration of legacy analytics into enterprise platforms and optimized datasets for BI consumption.
- Collaborated with BI developers, analysts, and SMEs to deliver end-to-end analytical solutions.
- Utilized Python, SQL, Tableau, and Excel to create validated, accurate visualizations.
- Ensured high data reliability through stringent data quality checks and validation procedures.
- Developed Snowflake queries, reusable transformations, and optimized models for executive dashboards.
- Presented insights to stakeholders through clear visual storytelling and structured reporting.

08/2022 – 12/2023	Wipro, Hyderabad, India, Data Analyst - Designed and developed ETL pipelines using Python, SQL, SSIS, and Azure Data Factory to load, clean, and transform product master data. - Integrated SAP/Hybris Backoffice data for multi-region portals using automated workflows and IMPEX scripts. - Performed data cleansing, attribute validation, classification mapping, and region-based catalog structuring. - Built product hierarchy data models improving product visibility and reducing data inconsistencies. - Implemented SQL-based data quality checks to identify missing attributes, duplicates, and incorrect mappings. - Improved ETL performance through query tuning, indexing, and pipeline optimization. - Managed version control using Git and automated deployments through Azure DevOps CI/CD pipelines. - Supported SIT/UAT by generating validation datasets, debugging catalog issues, and preparing SQL test reports. - Monitored production sync processes and resolved catalog failures using Azure Logs and SQL debugging.
08/2021 – 07/2022	Wipro, Hybrids QA - Worked on the SAP Hybris eCommerce platform performing functional, regression, and integration testing. - Created, executed, and documented test cases for newly implemented features and portal changes. - Collaborated with development and SAP teams for issue tracking, data flow validation, and user acceptance testing. - Utilized Atlassian tools (JIRA, Confluence) to manage bugs, backlog stories, and sprint reports. - Supported back-office testing for order processing, product catalog, and payment integrations.

Education	
08/2024 – 08/2025	Masters in Information Technology, Atlantis University 4 GPA
06/2018 – 07/2021	Bachelors in Computers, Andhra Loyola College 3.6 GPA

Skills		
- SQL, Tableau, Excel, Power BI, Statistical Analysis, Data Modeling - Snowflake, SQL Server, MySQL, SAP/Hybris Backoffice Data Structures - Data Cleaning, Data Validation, Pipeline Optimization, Dashboard Development, Troubleshooting, Documentation, Cross-Functional Collaboration	- Python (Pandas, NumPy), Shell Scripting - Azure, Git, Azure DevOps Pipelines, AWS (S3, Lambda, Cloud Watch)	- Azure Data Factory, SSIS, DBT, Fivetran, Airflow, IMPEX Scripts - LMS Analytics, EDW Systems, Jira, Agile/Scrum
