

Ram Linga Reddy Chevva

Java Full Stack Developer

Columbia, SC 29201 | 803-856-2200 | ramlingareddy2k@gmail.com | [LinkedIn Profile](#) | [My Portfolio](#)

Professional Summary

Proficient Java Full Stack Developer with experience building responsive web applications and APIs using Java, Spring Boot, React.js, and Angular. I am skilled in cloud technologies like AWS, CI/CD pipelines, and Agile methodologies. Strong technical foundation in full-stack development and database management with a focus on delivering scalable, secure solutions.

Professional Experience

Java Full Stack Developer

Northern Trust Bank – New York, NY

Jul 2024 – Present

- Developed web applications using Java, Spring Boot, React.js, and Angular to build responsive user interfaces and backend services.
- Designed and implemented RESTful APIs to enable communication between front-end and back-end systems, ensuring seamless data flow.
- Worked with AWS services for application deployment, storage, and backup, including EC2, S3, and RDS.
- Collaborated in an Agile environment, utilizing Jenkins for continuous integration, and wrote tests using JUnit and Mocha to ensure code quality and reliability.

Teacher's Assistant

University Of South Carolina – Columbia, SC

January 2023 – May 2024

- Assisted in teaching Python and HTML courses, providing support in lectures, lab sessions, and course material development to enhance student understanding.
- Monitored Python and HTML lab sessions, offering hands-on guidance and troubleshooting technical issues to ensure smooth learning experiences.
- Graded assignments, projects, and exams related to Python programming, HTML development, and web technologies, providing detailed feedback to help students improve their skills.
- Collaborated with faculty to update and refine course content, ensuring alignment with current trends in Python development and web design practices.

Java Developer

Mouri Tech – Hyderabad, India

September 2021 – June 2022

- Developed and maintained web applications using Spring Framework, Hibernate, and front-end technologies like React.js, Angular, HTML5, CSS, and JavaScript in an Agile environment.
 - Built and deployed REST APIs on AWS, and managed Oracle database interactions, including queries, stored procedures, and performance optimizations.
 - Implemented CI/CD pipelines with Jenkins and GitHub, enabling automated deployments, and performed integration testing with Selenium and behavior-driven testing with Cucumber.
 - Enhanced user interfaces and optimized application performance using Hibernate caching and other front-end design best practices.
-

Education

Master of Science: Computer Science

University of South Carolina – Columbia, SC

August 2022 – May 2024

- Completed advanced coursework in Computer Architecture, Database Management Systems, Analysis of Algorithms, and Azure Cloud Native Development.
 - Gained practical experience in Wireless and Mobile Systems for IoT, Health IT, and Network System Security.
 - Strong foundation in Java programming and full-stack development, with a focus on building scalable, secure applications.
-

Technical Skills

- **Programming Languages:** Java, Python, JavaScript, HTML, CSS
- **Frameworks & Libraries:** Spring Boot, Hibernate, React.js, Angular
- **Cloud & Tools:** AWS (EC2, S3, RDS), Azure Cloud, Jenkins, GitHub, Docker
- **Databases:** Oracle, MySQL
- **Testing:** JUnit, Mocha, Selenium, Cucumber
- **Development Practices:** Agile, CI/CD, RESTful APIs

Projects

- **Sitting Posture Detection using FMCW Audio Signals**

Course: Wireless and Mobile Systems for the IoT

Developed a privacy-focused posture detection system using FMCW (Frequency-Modulated Continuous Wave) audio signals. The system transmits sound waves from a laptop's speaker, captures reflections via the microphone, and applies signal processing with K-Means clustering to classify sitting postures. Tested the system with three different sitting postures, captured the retrieved audio signals, and visualized them using spectrograms to highlight differences. Demonstrated posture classification effectiveness through K-Means clustering. This fully software-based, real-time solution has potential IoT integration for ergonomic monitoring.

- **Contoso Pizza Web App**

Course: Azure Cloud Native Development

Developed an interactive web application for seamless online pizza ordering. Users can browse the menu, customize orders, manage their cart, and complete secure transactions. Built with **HTML, CSS, JavaScript, .NET Core, ASP.NET, SQL, and Azure**, the application ensures smooth user experience with efficient cart management and a secure checkout process, enhancing the overall ordering journey.

- **Certification Web App**

Course: Azure Cloud Native Development

Developed a centralized system for managing employee certifications with automated expiry notifications and a manager dashboard. Features include **role-based access control, secure authentication (JWT), and email alerts** to ensure timely renewals. Built with **React, Node.js, MongoDB, SQL, Azure, Docker, HTML, CSS, and JavaScript**, the application enables employees to easily add and update certifications while providing managers with real-time tracking and insights.
