

Ram Nagesh Oruganti Full Stack Developer

ramoruganti@myjobsemail.com | (602)-388-5429 | Tempe, AZ | LinkedIn

Summary

Full Stack Developer with over 3 years of experience in Java Spring Boot, React. Proficient in AWS and Azure cloud technologies for deploying and scaling high-performance web applications. Skilled in integrating back-end solutions to ensure seamless functionality. Committed to delivering innovative, maintainable code and meeting project deadlines with top-quality results, leveraging the latest industry trends and best practices.

Technical Skills

- **Front-end Technologies:** HTML5, CSS3, JavaScript, React.js, Bootstrap
- **Back-end Technologies:** Java, Spring Boot, Hibernate, Micro-services, MVC Framework, SOAP, RESTful APIs, Maven, JDBC, JPA, Spring MVC, XML, Jest, J2EE
- **Databases:** MySQL, MongoDB, PostgreSQL, NoSQL, Oracle, MS SQL Server
- **Tools and Technology:** Selenium, Amazon Web Services (AWS), Microsoft Azure, Docker, Kubernetes, Terraform, Git, Kafka, Jenkins, GitHub, Agile, Scrum, JIRA, SDLC, Gradle, JUnit, Postman, Data Structures and Algorithms

Professional Experience

Full Stack Developer, Leidos

08/2023 – 05/2024 | Remote, USA

- Developed a **Personal Finance Tracker** application with **React** for a dynamic, responsive front end and **Java** with **Spring Boot** for backend services, creating real-time dashboards and charts that boosted user engagement and enhanced financial tracking capabilities.
- Designed and implemented secure **RESTful APIs** using **Spring Boot** to manage data transactions, integrated **OAuth2** authentication for user access control, and included third-party integrations. Used Postman for comprehensive **API testing**, ensuring reliable and efficient system performance.
- Enforced containerization with Docker and streamlined deployment using **Jenkins CI/CD pipelines**, deploying Java applications on **Kubernetes** with **AWS EC2** for scalable compute resources and **AWS RDS** for managed database solutions.
- Utilized **Spring Data JPA** to design and manage robust **SQL** database structures, optimizing performance and maintaining data integrity with **AWS RDS** for enhanced scalability and reliability.
- Integrated **React** components with backend services and united with **UX/UI designers** to refine application functionality. Achieved 25% boost in user satisfaction and 30% drop-in support queries by improving usability and design.

Full Stack Developer, Deloitte

10/2021 – 07/2022 | Hyderabad, India

- Designed and developed an **Online Healthcare Appointment System** using **Java Spring Boot**, creating **RESTful APIs** to facilitate secure appointment scheduling, patient management, and real-time notifications, effectively supporting over 5,000 users.
- Built responsive and intuitive front-end interfaces with **React**, which improved user experience and increased patient engagement and appointment bookings by 45%.
- Integrated **PostgreSQL** with backend services to optimize data storage and retrieval, reducing query response times by 25% through advanced indexing and efficient data modeling techniques.
- Deployed the application on **Azure** using **Docker** containers, achieving 99.9% system uptime and scalability to handle peak loads during high-traffic periods.
- Streamlined development with **continuous integration pipelines** using **Git** and **Jenkins**, reducing deployment time by 30% and ensuring consistent code quality across development teams.
- Conducted extensive unit testing with **JUnit** and used **Azure Monitoring tools** for system monitoring, which reduced post-deployment issues by 35%, ensuring a secure and stable platform for both patients and healthcare providers.

Software Engineer, Genpact

01/2020 – 09/2021 | Hyderabad, India

- Developed robust **Java Spring Boot** services, optimizing backend processes and integrating **RESTful APIs** to ensure smooth data flow between multiple services and improve system efficiency.
- Designed and implemented secure data handling practices with **JWT** authentication and **Spring Security**, improving customer data management by 30% and ensuring compliance with data protection regulations.
- Utilized **Hibernate ORM** to streamline complex database transactions, reducing query response times by 25% and improving data consistency across a large-scale, high-transaction environment.
- Automated backend testing using **JUnit** and **Mockito**, improving test coverage and reducing defects by 40%, ensuring high-quality code and minimizing downtime in production systems.
- Led **Java Spring Boot microservice** architecture design, significantly enhancing system scalability, reducing response times, and improving system performance under heavy user traffic by 20%.

Education

Master of Science, Arizona State University

08/2022 – 05/2024 | Tempe, USA

Computer Software Engineering

Bachelor of Engineering, Vasavi College of Engineering

08/2016 – 05/2020 | Hyderabad, India

Electronics and Communication Engineering
