PROFESSIONAL SUMMARY

Motivated and detail-oriented graduate with a Master's degree in Technology Management and with strong expertise in SQL development, data warehousing, and analytics. Skilled at transforming complex datasets into actionable insights through statistical analysis, data visualization, and narrative reporting. Experienced in building reports and dashboards using Tableau, Power BI, and Excel to support business decision-making. Adept at collaborating with stakeholders, managing client-facing communications, and ensuring data quality through thorough validation and QA. Known for being a self-starter who thrives in fast-paced, entrepreneurial environments and delivers results with urgency and precision.

TECHNICAL SKILLS

- **Data Analysis & Reporting:** SQL, Microsoft Excel, Tableau, Power BI, SSRS
- **Databases & Warehousing:** SQL Server, Snowflake, Oracle, MySQL, PostgreSQL, Schema design, indexing, performance tuning
- **ETL & Data Integration:** SSIS, Cloud-based ETL (AWS, GCP), data mapping & transformation, data quality checks
- **Statistical & Analytical Skills:** Trend analysis, correlation, anomaly detection, data validation
- **Data Visualization & Storytelling:** Interactive dashboards, narrative insights, KPI monitoring
- **Tools & Platforms:** Microsoft Office Suite, Linux/Unix
- **Soft Skills:** Client-facing communication, analytical thinking, problem solving, stakeholder collaboration, responsiveness, training & presentation, self-starter attitude

PROJECTS

Fraud Detection Reporting System for Banking Transactions

- Designed and developed SQL queries, stored procedures, and functions to extract, transform, and load large volumes of transactional data from core banking systems into Snowflake.
- Built data models and applied indexing and performance tuning to optimize query efficiency for reporting.
- Developed interactive dashboards in Tableau to visualize fraud patterns and trends, enabling business users to identify high-risk activities quickly.

- Performed data validation and QA checks to ensure accuracy and reliability of the reports provided to stakeholders.
- Collaborated with business teams to gather reporting requirements and present analytical insights to non-technical stakeholders.

Claims Processing ETL Pipeline for a Health Insurance Platform

- Automated daily ETL ingestion pipelines using SSIS and cloud-native ETL services to load data into SQL Server and Snowflake data warehouses.
- Applied SQL-based transformation logic and implemented data quality rules to ensure compliance with healthcare data standards.
- Created Excel-based analytical reports and Power BI dashboards for claims status tracking and KPI monitoring.
- Configured source-to-target data mappings, documented data specifications, and conducted stakeholder training on data workflows.
- Partnered with cross-functional teams and acted as a data subject matter expert to address client questions and evolving data requirements.

EDUCATION

Southeast Missouri State University, Cape Girardeau, MO

Master of Science in Technology Management

Sreenidhi Institute of Science and Technology, Hyderabad, India

Bachelor of Technology in Information Technology
