

Rama Narasimha Reddy Lakkireddy

+1 (469)-469-1946 | rama.lakkireddy21@gmail.com | <https://www.linkedin.com/in/ram-lakkireddy/> | United States

Full Stack Software Developer with **5 years** of experience in designing, developing, and modernizing enterprise applications using **C#, .NET Core, ASP.NET MVC, Web API, and SQL Server**. Proven expertise in **cloud-native solutions (Azure & AWS), RESTful API development, containerization (Docker, Kubernetes), and modern frontend technologies like React.js and Angular**. Skilled in **CI/CD, Agile**, and optimizing performance across databases and distributed systems. Strong focus on delivering secure, scalable, and maintainable code.

Technical Skills

Languages: C#, ASP.NET Core, JavaScript, TypeScript, Python, HTML5, CSS3, SQL, LINQ, T-SQL

Frameworks/Libraries: .NET 6/7, .NET Core, Entity Framework, Web API, MVC, Blazor, React.js, Angular, jQuery

Databases: SQL Server, PostgreSQL, MySQL, MongoDB, SSIS, Query Optimization

Cloud Platforms: Azure (App Services, Functions, Azure SQL, AKS, AAD), AWS (EC2, S3, RDS, Lambda)

API & Security: RESTful APIs, OAuth2, JWT, Azure Active Directory, Swagger

DevOps & Tools: Azure DevOps, GitHub Actions, Docker, Kubernetes, CI/CD Pipelines, Visual Studio

Testing: xUnit, NUnit, Selenium, Postman, Cypress

Version Control & Agile: Git, GitHub, TFS, JIRA, Agile/Scrum

Professional Experience

Full Stack Software Developer - State of Washington (Attorney General's Office), Olympia, WA, USA

Feb 2024 – Present

- Worked on **modernizing legacy financial systems** by building and maintaining robust web applications using **ASP.NET Core, C#, .NET MVC** and **SQL Server**.
- Contributed to integrating internal .NET applications with **Workday ERP** by developing **RESTful APIs** and **GraphQL services**, ensuring seamless data flow across platforms.
- Leveraged **Entity Framework** for database access and manipulation and used **LINQ queries** to perform complex data operations efficiently and cleanly.
- Designed and deployed **cloud-native solutions** using **Microsoft Azure**, including **Azure Functions, App Services, SQL Database, and Blob Storage**, to reduce downtime and improve scalability.
- Developed responsive and user-friendly frontends with **React.js, TypeScript, and Tailwind CSS**, focusing on accessibility and modern design standards.
- Built automated **CI/CD pipelines** using **GitHub Actions** and **Azure DevOps**, significantly improving deployment speed and reducing manual effort.
- Improved data handling and reporting by optimizing both **relational (PostgreSQL, SQL Server)** and **NoSQL (MongoDB)** databases, writing complex queries and stored procedures.
- Containerized applications using **Docker** and deployed them to **Kubernetes clusters**, allowing for scalable and reliable multi-environment deployments.
- Wrote and maintained **automated tests** using **xUnit, Selenium, and Playwright**, helping reduce bugs and increase confidence in every release.
- Participated actively in **Agile ceremonies** including daily stand-ups, sprint planning, and retrospectives using **JIRA**, helping align technical deliverables with business goals.

Software Developer - University of North Texas (UNT System), Denton, TX, USA

Jan 2022 – Dec 2023

- Contributed to the development of a modern **Library Management System**, helping the university transition from legacy platforms to a scalable, user-friendly system using **.NET Core, C#, and Angular**.
- Customized and extended multiple **UNT internal web applications** to meet the needs of academic departments, improving functionality, usability, and performance.
- Designed and built **RESTful APIs** with **.NET Core Web API** and secured them using **JWT authentication, OAuth2, and Azure Active Directory (AAD)** for role-based access control.
- Automated data processing tasks using **ETL pipelines** built with **SQL Server Integration Services (SSIS)** and **Entity Framework**, resulting in faster and more accurate reporting.
- Created front-end components using **Angular**, connecting them to backend services through robust APIs, and ensured seamless cross-browser compatibility and responsive design.
- Managed data in **SQL Server, PostgreSQL, and MongoDB**, optimizing schema design and improving query performance for large datasets.
- Built and maintained **CI/CD workflows** using **GitHub Actions, Azure DevOps, and Docker**, reducing deployment errors and accelerating release cycles.
- Deployed applications to **Azure Kubernetes Service (AKS)** and **Azure App Services**, increasing system resilience and reducing infrastructure costs.
- Wrote **unit and integration tests** with **xUnit, NUnit, and Playwright**, catching bugs early in the development lifecycle and ensuring quality releases.
- Participated in regular **peer code reviews**, contributing to a culture of clean code, shared knowledge, and continuous improvement within the development team.

Software Engineer – Cyient (Multinational Technology Company), Hyderabad, India

May 2020 – Dec 2021

- I worked on building enterprise-level applications using **C#, ASP.NET MVC, and .NET Core Web API**, collaborating with cross-functional teams to design solutions that were both scalable and easy to maintain.
- On the backend, I used **Entity Framework** to manage data operations and wrote complex queries with **LINQ**, working with both **SQL Server** and **PostgreSQL** databases.
- For the frontend, I created responsive **UI** components using **Razor Pages, JavaScript, and Bootstrap**, helping improve load times and user interaction.
- I developed and integrated **RESTful APIs** to support seamless data exchange between various internal and external systems.
- Automated our deployment pipeline using **Azure DevOps** and **GitHub Actions**, making releases more consistent and reducing manual errors.
- I also gained hands-on experience with **AWS**, deploying services using **EC2**, managing storage through **S3**, and setting up **RDS** for database hosting.
- To ensure code quality, I wrote automated tests using **xUnit** and **Selenium**, which helped us catch bugs early and maintain a stable codebase.
- For monitoring and logging, I implemented **Serilog** and used **Azure Application Insights** to track system performance and troubleshoot issues quickly.
- I was actively involved in our Agile process, participating in daily standups, sprint planning, and retrospectives using **JIRA** and **Confluence**.
- Security was a top priority, so I implemented **OAuth2, JWT tokens**, and **role-based access control** to secure our APIs and user data.

Software Engineer Intern- BHEL, Hyderabad, India

Mar 2019 – Apr 2020

- During my internship, I helped build internal tools that supported manufacturing and business operations using **ASP.NET MVC** and **.NET Core**.
- I contributed to developing microservices with **.NET Core Web API** and containerized them using **Docker**, which made them easy to deploy and scale independently.
- I built modern, interactive frontend components using **Angular** and **React.js**, connecting them to APIs for dynamic content updates.
- I worked with **SQL Server** and **MySQL** databases, writing optimized queries and procedures to improve performance.
- I helped automate our build and deployment process using **Jenkins** and **GitHub Actions**, setting up pipelines that included unit testing and automatic deployment.
- I also worked on cloud deployment tasks, setting up **AWS EC2** instances, managing **S3 buckets** for file storage, and provisioning **RDS** for databases.
- On the security side, I implemented **JWT-based authentication** and supported integrating **Azure Active Directory (AAD)** for secure access.
- I regularly participated in **code reviews** through **GitHub** and **SonarQube**, helping ensure our code was clean, secure, and well-documented.
- As part of an Agile team, I attended daily meetings, used **JIRA** to manage tasks, and collaborated with teams across departments using **Slack** and **Confluence**.

Projects

Workday Integration & System Modernization - One Washington

- Upgraded legacy **.NET MVC** applications to align with **Workday standards**, improving reliability and maintainability.
- Built secure **RESTful APIs** and **GraphQL services** to connect internal **.NET** applications with Workday, ensuring seamless and accurate data transfer.
- Optimized **ETL processes** and restructured databases to support smooth migration of financial and procurement data from legacy systems to the Workday platform.
- Deployed cloud-first solutions using **Azure App Services, Azure Functions**, and **Azure SQL**, helping reduce downtime and improve scalability.

Library System & Web Application Enhancements – UNT System

- Helped develop a new **Library Management System** using **.NET Core, Angular**, and **C#**, making it more scalable and user-friendly.
- Customized internal university applications to meet the specific needs of various academic departments, improving usability and performance.
- Built interactive dashboards using **Power BI** and **SSRS** to provide real-time insights for faculty and administrators.
- Managed **SQL Server, PostgreSQL**, and **MongoDB** databases, while improving data quality and optimizing queries for better performance.

Telecom Network Management System - Cyient

- Designed and built a robust **Network Management System** using **ASP.NET Core, C#, and SQL Server**, enabling real-time visibility into network performance.
- Developed and integrated **REST APIs** to feed performance data into third-party analytics platforms for faster fault detection and resolution.
- Deployed the application to the cloud using **AWS EC2, S3**, and **RDS**, and containerized services with **Docker** for modular deployment.
- Improved data processing performance by optimizing **stored procedures**, indexing strategies, and backend logic for high-volume data streams.

Education

Master's:

Master of Science in Business Analytics (Information Technology) | GPA: 3.8

University of North Texas, Denton, TX, USA | Dec 2023

Bachelor's :

MallaReddy Engineering College (Autonomous), Hyderabad, India - 2020
