EDUCATION

Masters, Information Systems Sciences

Aug 2023 - May 2025

New Jersey Institute of Technology

GPA: 3.7

Bachelor of Engineering, Computer Science

Aug 2018 - Jun 2022

Neil Gogte Institute of Technology

SKILLS

- **Data Analysis & Visualization:** Advanced Excel (pivot tables, formulas, and advanced functions), Tableau, Power BI, **SQL**, Python (Pandas), Clean Data, Analyzing Sales Trends, Visual Reports, Data Visualization Tools, Data Analytics
- **Business Analysis:** Requirements Gathering, Process Mapping, Stakeholder Communication, Agile (Jira)
- **Statistical Analysis:** Machine Learning, Regression, A/B Testing
- **Tools & Platforms:** MongoDB, AWS (basic), Git, MS Office Suite
- **Reliable Transportation**

PROJECTS

Personal Portfolio Web Application | Django, Bootstrap, SQLite

Jan 2025

- **Developed** a full-stack web application using Django and Bootstrap to showcase professional skills
- **Enhanced** cross-device responsiveness, **reducing bounce rate by 20%**
- **Tracked** code changes using Git and GitHub, ensuring **100% reproducibility** and a smooth development workflow

Data Visualization Project | Data Analytics for Information Systems

May 2024

- **Analyzed** historical shipment pricing and logistics data, enabling a **15% cost reduction**
- **Developed** interactive dashboards using Tableau to track real-time shipment trends and vendor performance, similar to **KPIs** for sales and operations
- **Retrieved** and **cleaned** large datasets using **SQL** and **Python** to ensure data accuracy for analysis
- **Delivered** data-driven insights to stakeholders that supported strategic decisions and enhanced risk mitigation

NLP-Driven Transcription Project (The Admirals Project)

Jan 2024 - May 2024

- **Spearheaded** the automation of **80%** of consultant ticket transcriptions, **boosting efficiency by 30%**
- **Defined** the project scope and documented user stories in an **Agile** environment using Jira, accelerating team delivery by **15%**
- **Visualized** system logic with UML diagrams, increasing clarity for team members and boosting product adoption by **30%**

Predictive Modeling of Weather Conditions

Aug 2023 - Mar 2024

- **Engineered** machine learning models to increase accuracy by **15%** and reduce errors by **20%**
- **Tuned** predictive models using Gradient Boosting, attaining an **AUC score of 0.84**
- **Employed** Python and Tableau to analyze model performance, which resulted in a **20% revenue increase**
- **Leveraged** data to provide actionable insights for optimizing resource allocation and business planning

Website Developer | Property Finder

Aug 2023 - Dec 2023

- **Created** a Django-based website with a responsive UI across **3+ screen formats**
- **Doubled** performance speed by testing and debugging based on **200+ user responses**
- **Pioneered** a scalable platform using React, Node, and MongoDB for over **1,000 international students**

Shift Taxi – On-Demand Moving Service for International Students

Aug 2023 - Dec 2023

- **Analyzed** competitors like Uber and U-Haul to propose a new hybrid business model
- **Conducted** over **10 user interviews** to gather key requirements that shaped the product vision and design
- **Developed** a strategic proposal that **cut costs by 15%** and streamlined service delivery
