Professional Summary

Full Stack .NET Developer with 3+ years of experience designing and delivering secure, scalable, and high-performance web applications using **ASP.NET Core, React.js, and SQL Server**. Skilled in building **RESTful APIs**, implementing **Test-Driven Development (TDD)**, and architecting **microservices-based solutions**. Proficient in deploying applications to **cloud platforms** such as **Azure** and **AWS**, and experienced in **DevOps pipelines**, Agile methodologies, and modern front-end frameworks including **React, Angular, and Blazor**. Proven track record of leading enterprise modernization initiatives, resulting in a **25% improvement in system performance**.

Highlights:

- Strong analytical and debugging skills for root cause identification
- Effective communicator and collaborator in Agile Scrum teams
- Quick learner with a growth mindset and adaptability

Technical Skills

Languages: C#, JavaScript, TypeScript, SQL, Python, Java

Web: React.js, Angular, Blazor, Razor Pages, Bootstrap, HTML5, CSS3

Backend: .NET Core 2.1/3.1, .NET 5/6/7/8 (LTS), ASP.NET Core MVC/Web API, Entity Framework Core, Microsoft Identity, Razor Pages, Blazor, microservices, RESTful APIs, WCF

Database: SQL Server, NoSql / MongoDB, MySQL, T-SQL, Stored Procedures, Indexing

DevOps/Cloud: Azure (App Services, SQL, Blob), AWS (EC2, S3), Docker, Jenkins, Git, CI/CD

Testing: NUnit, MSTest, Moq, TDD, Integration Testing

Tools/Practices: Azure DevOps, Jira, Rally, RabbitMQ, Agile/Scrum, SOLID, Microservices

WORK EXPERIENCE

EPAM Systems - Hyderabad, India

Junior Software Engineer | Jan 2022 - Jun 2023

- **Developed enterprise-grade applications for Refinitiv (London Stock Exchange Group)** using AngularJS and ASP.NET Core MVC, applying SOLID principles with Object Oriented Programming(Oops) and best practices to architect modular business systems.
- Delivered solutions in Capital Markets domain for Refinitiv (a London Stock Exchange Group company), collaborating with financial analysts and engineering teams.
- **Designed and optimized SQL Server databases** with complex T-SQL queries, stored procedures, and triggers, improving query performance by 25% while leveraging ADO.NET and Entity Framework (Code-First) for robust data access
- **Developed and maintained WCF-based SOAP web services and RESTful APIs** in .NET Core, enforcing data security measures and ensuring high availability
- **Established CI/CD pipelines in Azure DevOps** with automated testing, reducing deployment time by 50% and enabling daily releases. Also Containerized .NET Core APIs using Docker and deployed to AWS EC2 for scalable deployment.
- **Led critical system modernization for Thomson Reuters** with leading 4-member team, delivering 400,000+ logging system updates within 6-week sprint, recognized by management and client for exceptional project execution
- **Championed TDD workflow using MSTest**, achieving 80% code coverage and reducing production defects by 35%
- **Migrated legacy VB.NET applications** to modern ASP.NET Core stack, improving performance and maintainability
- **Demonstrated leadership in Agile Scrum teams with Agile methodology** using Jira and Azure Boards, participating in sprint planning, daily stand-ups, and retrospectives and participated in aspects of Software Development Life Cycle(SDLC).

Coolkaru Info Solutions Pvt Ltd - Hyderabad, India

Full Stack Developer | Jun 2020 - Dec 2021

- Developed multilingual enterprise UIs using React.js, Redux, and Ant Design, delivering responsive interfaces for global user base
- Built secure backend APIs using ASP.NET Core with JWT authentication, Entity Framework (Code-First), and Dependency Injection to manage service lifetimes and promote loose coupling
- Integrated role-based access control (RBAC) and followed SOLID principles for scalable and maintainable architecture
- Embraced TDD approach with NUnit/Moq testing framework, reducing defect rate by 30% and improving code quality
- Designed SQL Server database schemas with optimized indexing strategies and stored procedures for high-performance data retrieval
- Generated dynamic Excel reports using EPPlus and PDF exports with iText7, streamlining business reporting processes
- Implemented message queuing with RabbitMQ for asynchronous processing and improved system scalability
- Participated in Agile ceremonies using Rally for task tracking and Jenkins for automated deployments

Key Projects

Hours Calculator | *ASP.NET Core, SQL Server, Azure, JWT*

- Enterprise timesheet system with dual user roles, automated Excel processing, and PDF/Excel report generation

CGPA & SGPA Calculator | *PHP, MySQL, Bootstrap*

- Academic performance tracker with real-time GPA calculations - **Project Expo Award Winner**

College Model Website | *React.js, Redux*

- Responsive pharmacy branch portal with dynamic announcements and centralized student information access

Library Management System | *PHP, MySQL, Bootstrap*

- Web-based system with secure authentication, advanced search, and downloadable content management

Education

University of North Texas - Denton, TX

Master of Science (M.S.), Computer Science | Aug 2023 - Present

Certifications

- Cisco Certified Network Associate (CCNA)
- Scrum: The Basics
- Developing Secure Software
- Agile Foundation
