Summary

Data Scientist / Senior Analyst with 5+ years of experience in **advanced analytics, experimentation, and causal inference**, driving data-informed product and business strategies. Skilled in **SQL, Python, R, Tableau, and Power BI** with expertise in **A/B testing, clustering, propensity modeling, and predictive modeling** across large-scale customer datasets. Proven record of partnering with **product, engineering, marketing, and operations teams** to design experiments, uncover behavioral insights, and optimize customer experience. Adept at building compelling **data stories and visualizations** that influence executives and shape product roadmaps.

Education

The University of Texas at Dallas

MS, Business Analytics & AI (Focus: Data Science & Product) **GPA: 3.72**

Jan 2023 – Dec 2024

Bharati Vidyapeeth's College of Engineering

B.Tech, Electrical & Electronics Engineering

Aug 2011 – Jun 2015

Projects

- **Image Classification on CIFAR-10** - Developed and evaluated **ANN** and **CNN** architectures for **CIFAR-10 image classification** implemented **padding, pooling, strides, and data augmentation** in CNNs, with **dropout layers** across both models to reduce overfitting. **CNN improved accuracy by 6%** over the ANN baseline.
- **Credit Card Fraud Detection** - Built **ML models (Logistic Regression, Random Forest, XGBoost)** on large-scale transaction data to identify fraud, achieving **95% precision**. Demonstrated scalable **risk monitoring** capabilities applicable to **wholesale credit risk**.
- **Generative AI for Text Automation** - Deployed **LLM-based workflow (LLaMA 3.1, LangChain, Streamlit)** to automate outbound communications, improving efficiency and lead conversion by **20%**.
- **Telecome Customer Retention Forecasting** - Designed **churn prediction models (XGBoost, Time Series Forecasting)** achieving **AUC 0.87**, improving retention strategies by **15%**.

Work Experience

Unibots, India

Business Analyst – Product

Jan 2019 – Sep 2021

- Designed and developed **12+ interactive dashboards** in **Power BI** and **Tableau** to track **budget variance, cost allocation, forecast accuracy, and ad performance KPIs**, reducing manual reporting time by **30%** and accelerating month-end close by **12%**.
- Conducted end-to-end **A/B and multivariate testing** on **ad formats, placements, and creatives**, applying **causal inference** and **hypothesis testing** to validate lift, driving a **6% reduction in CPA** and a **5% increase in campaign efficiency**.
- Engineered **100+ features** from **large-scale clickstream and ad log data** using **SQL, Python (Pandas, NumPy, Scikit-learn)**, and **AWS Redshift**. Applied **data preprocessing, missing value imputation, and PCA**, improving **predictive model accuracy by 10%** and reducing **data processing time by 25%**.
- Built and deployed **predictive pricing and churn models (Logistic Regression, Random Forest, XGBoost)**, achieving **AUC-ROC of 0.82** and enhancing **customer retention targeting**. Implemented **monitoring pipelines** to detect **model drift** and ensure ongoing reliability.
- Collaborated with **Finance, FP&A, and Marketing** teams to define **KPI frameworks, business metrics, and governed datasets**, improving cross-team reporting consistency by **20%** and ensuring compliance with **audit standards**.
- Automated **ETL pipelines** integrating data from **Snowflake, AWS Redshift, and campaign logs**, improving **data refresh frequency** from weekly to daily and enabling faster **business reviews**.
- Delivered **executive business reviews** synthesizing **experimental results, budget utilization, and performance trends** into actionable recommendations, directly influencing **ad optimization, pricing, and resource allocation** decisions.

OYO, India

BDM-Pricing Analyst

Aug 2018 – Dec 2018

- Built **dynamic pricing models** in **Excel** to optimize **P&L** by analyzing **demand trends**, resulting in a **10% increase in revenue**.
- Conducted **cohort and customer segmentation** analysis, reducing **churn below 10%** and increasing **Average Room Rate (ARR)**, contributing to an **8% growth in Monthly Recurring Revenue (MRR)**.

Practo, India

AAM-Sales Ops Analyst

Jun 2015 – Aug 2018

- Customized **dashboards** and **EMR-integrated analytics** for **30+ enterprise healthcare clients**; boosted **patient retention by 15%** through optimization of **lifetime value (LTV)** and **monthly active users (MAU)** using **Salesforce CRM**.
- Delivered **churn and segmentation insights** across patient cohorts using **SQL** and **Excel modeling**, drove a **10% uplift in retention** and enabled **cross-sell opportunities** through improved **go-to-market (GTM)** strategy.

Technical Skills

- **Business Intelligence & Reporting:** Tableau, Power BI, Microsoft Excel (Pivot Tables, VBA, Power Pivot), KPI Tracking, Dashboard Development, Storytelling with Data, Microsoft Visio, Data Visualization, Cross functional Communication, Stakeholder Management, Reporting Automation, Business Requirement Documentation (BRD), Google Analytics, Adobe Analytics, Amplitude, Content Square
- **Data Analysis & Programming:** SQL (MySQL, Snowflake, Quicksight), Python (Pandas, NumPy, Scikit learn, keras, Tensorflow, Pytorch), R, Data Wrangling, Exploratory Data Analysis, Statistical Analysis, Business Analysis, Hypothesis Testing, Statistical Modeling
- **Experimentation & Causal Methods:** Experimental Design, A/B testing defining statistical parameters, minimum detectable effect, sample size determination, randomisation, staggered rollouts using holdout groups, CUPED, lift measurement, validity checks, bias detection, causal inference, difference in differences, regression discontinuity, multivariate testing, test and learn frameworks, experiment design and evaluation
- **Advanced Analytics & Modeling:** Predictive Analytics, Machine Learning, Econometrics, Linear Regression, Logistic Regression, Decision Trees, Random Forest, XGBoost, Natural Language Processing, Large Language Models, Deep Learning, Recommendation Systems, Generative AI
- **Big Data & Cloud Technologies:** ETL ELT Processes, Data Modeling, Snowflake, AWS (S3, Redshift, Athena, Glue), NoSQL (MongoDB), Hadoop Ecosystem, Apache Spark, DBT, GCP, Azure, Data Quality & Governance, Databricks
- **Business & Product Analytics:** Go To Market Strategies, Growth Accounting, Customer Lifetime Value, Funnel Analysis, Sales Analytics, Market Mix Modeling, Customer Relationship Management Analytics, Jira, Confluence, Agile & Scrum, Program & Project Management, Financial Analytics, Variance Analysis, Cost Optimization, Test Result Analysis, Statistical Significance, Confidence Intervals

Certifications

- **DBT Fundamentals (DBT)**
- **Complete SQL Bootcamp (Udemy)**
- **Data Science with R & Python (Jigsaw Academy)**
