PROFESSIONAL SUMMARY

Software Developer with **5 years** of professional experience delivering end-to-end SaaS, FinTech, and IT solutions. Specialized in Java, C++, Node.js, Spring Boot, Spring MVC, Spring Security, Angular, and React.js with strong expertise in object-oriented programming, REST API design, and microservices architecture. Skilled in building and consuming APIs, managing relational/NoSQL databases, and deploying cloud-based solutions. Experienced in handling the entire development lifecycle from design and coding to deployment and maintenance.

TECHNICAL SKILLS

- **Programming Languages:** Core Java, C++, Python, JavaScript (ES6+), Node.js, SQL, NoSQL.
- **Frameworks & Libraries:** Spring Boot, Spring MVC, Spring Security, Angular, React, Django, Express.
- **Databases:** Oracle, MySQL, PostgreSQL, MongoDB, DynamoDB, Redis, Redshift.
- **Cloud & DevOps:** AWS (EC2, ECS, S3, Lambda, RDS), Docker, Kubernetes, Jenkins, Git, GitHub, CI/CD.
- **ETL Tools:** Pentaho Data Integration.
- **Web Technologies:** REST APIs, GraphQL, JSON, XML.
- **Ai Tools:** Github Copilot (Gen AI)
- **Key Competencies:** Production Issues, Object-Oriented Programming (OOP), RESTful API Design, Microservices Architecture, Version Control, Front-End Design, Problem Solving.

PROFESSIONAL EXPERIENCE

Full Stack Developer – Delton Solutions | Atlanta, GA

July 2024 – Present

- Built and deployed full-stack applications with Spring Boot, AngularJS, and React.js, improving client onboarding speed by 35%.
- Leveraged GitHub Copilot (Gen AI) to accelerate coding, reducing development effort by 20% and improving code quality.
- Developed secure RESTful APIs and optimized queries, enabling seamless integration with 10+ client platforms.
- Migrated enterprise systems to AWS (EC2, ECS, RDS, S3) achieving 99.9% uptime and lowering infrastructure costs by 15%.
- Implemented automated CI/CD pipelines with Jenkins, Docker, and Git, reducing deployment cycles from 4 hours to under 30 minutes.

Tech Stack: AngularJS, React.js, AWS, REST APIs, SQL, Spring Boot, Gen AI

Software Engineer – DeepTarget, Inc. | Auburn, AL

August 2023 – April 2024

- Enforced Git/GitHub version control practices in an Agile Scrum environment, ensuring smooth collaboration and code reviews.
- Developed and maintained fintech platforms with Spring Boot, Node.js, and AngularJS, cutting transaction time by 20%.
- Integrated relational (Oracle, PostgreSQL) and NoSQL databases, improving real-time reporting for compliance.
- Enhanced dashboards with React.js, delivering insights to 1,000+ end-users.
- Created and consumed REST APIs to securely handle 50k+ daily requests.

Tech Stack: Spring Boot, Node.JS, Angular, JavaScript, AWS, REST APIs, Microservices, Oracle, PostgreSQL, NoSQL.

Software Engineer – Data Foundry | India**October 2019 – December 2022**

- Developed RESTful services using Java and Spring Boot, supporting large-scale clinical trial workflows and improving data processing speed by 40%.
- Engineered cloud-native integrations using AWS (S3, Lambda, RDS, SNS), enhancing system reliability and achieving 99.9% uptime.
- Built complex ETL workflows using Pentaho, automating clinical data ingestion and reducing manual data processing by 60%.
- Designed relational and NoSQL data models improving query performance for analytics dashboards.
- Optimized distributed microservices architecture, reducing server resource consumption by 25% and improving overall application scalability.

Tech Stack: Java, Spring Boot, AWS, SQL/NoSQL (Oracle, DynamoDB, MongoDB, Redis, Redshift), Pentaho ETL, Docker, Microservices

EDUCATION

- Master of Science in Computer Science – Auburn University at Montgomery, AL
- Bachelor of Technology in Computer Engineering – Jawaharlal Nehru Technological University, India
